GE Profile Opal 1.0 Nugget Ice Maker User Manual

Brand: Profile | Model: P4INAASSTSS

PRODUCT OVERVIEW

The GE Profile Opal 1.0 Nugget Ice Maker is a countertop appliance designed to produce chewable, crunchy nugget ice. This ice is made from compacted ice flakes, offering a unique texture suitable for various beverages. The machine is capable of producing up to 34 pounds of ice per day, with the first batch available in 20 minutes or less. Its large-capacity bin can hold up to 48 ounces of ice, ensuring a continuous supply. For extended use, an optional side water tank is available to significantly increase ice production without frequent refills. The unit also integrates smart features, allowing users to monitor device status and schedule ice production via the SmartHQ™ app, with voice control capabilities through Alexa and Google.

Key Features

- **OPAL NUGGET ICE, THE GOOD ICE:** Serve up chewable, crunchable, craveable nugget ice that's ready fast and retains its flavor, unlike traditional hard cubes. Refreshing nugget ice is made from compacted ice flakes and is perfect for cocktails, sodas and other beverages.
- **34 POUNDS OF ICE PER DAY:** Begin enjoying your first batch of ice in 10 minutes. Never run out of nugget ice thanks to a large capacity ice maker that makes one pound of fresh ice per hour and holds up to 3 lbs at a time.
- **SUPERIOR CAPACITY:** Never run out of nugget ice with a large capacity ice maker that holds up to 3 lbs at a time.
- **OPTIONAL REFILLABLE SIDE WATER TANK:** Don't miss a moment of your party for water refills. Always have nugget ice on-hand thanks to a large, built-in water tank that holds over a half gallon of fresh water. Side tank sold separately.

SETUP

Unboxing

Carefully remove all packaging materials. Ensure all components are present before discarding packaging. The box should contain the Ice Maker, Drip Tray, and Ice Scoop.

Placement

Place the ice maker on a stable, level countertop. Ensure there is adequate clearance around the unit for proper ventilation. The dimensions of the unit are approximately 17.3 inches deep, 9.67 inches wide, and 17.1 inches high.

Normal Operating Sounds

GE Profile™ Opal Nugget Ice Maker is a small appliance that makes sound similar to a refrigerator ice maker.

OPERATION

Making Ice

To begin making ice, ensure the unit is plugged in and the water reservoir is filled to the MAX fill line with potable water. The ice maker can produce its first batch of nugget ice in as little as 10 minutes and continues to make approximately one pound of ice per hour, holding up to 3 pounds at a time. The unit automatically reprocesses melted ice, ensuring a continuous supply.

Video 1: This video demonstrates the rapid ice production capabilities of the GE Profile Opal 1.0 Nugget Ice Maker, showcasing how quickly it can produce chewable nugget ice.

Optional Side Water Tank

For increased ice production and fewer water refills, an optional side water tank can be attached. This tank holds over half a gallon of fresh water, significantly extending the time between refills.

Dinner Parties

Specialty Drinks

Home Gym

Versatile Addition to Any Home

GE Profile™ Opal Nugget Ice Maker is a versatile addition to any home including home bar, home gym, basement, & more.

MAINTENANCE

Regular cleaning and descaling are crucial to ensure your GE Profile Opal Ice Maker continues to produce fresh-tasting ice and performs optimally. The cleaning and descaling schedule may need to be adjusted based on your local water hardness and how frequently you make ice.

Cleaning and Descaling Frequency

- **Sanitize:** Recommended once per week.
- **Descale:** Recommended every 2-3 weeks, or more frequently in areas with very hard water.

The Good Ice.

Enjoy restaurant-quality, crave-able, chewable nugget ice in your own home.

Figure 8: Press the 'Clean' button to initiate the cleaning cycle.

Hard Water Can Impact Your Ice Maker

Descale your Opal once a month or more frequently if you live in an area with hard water.

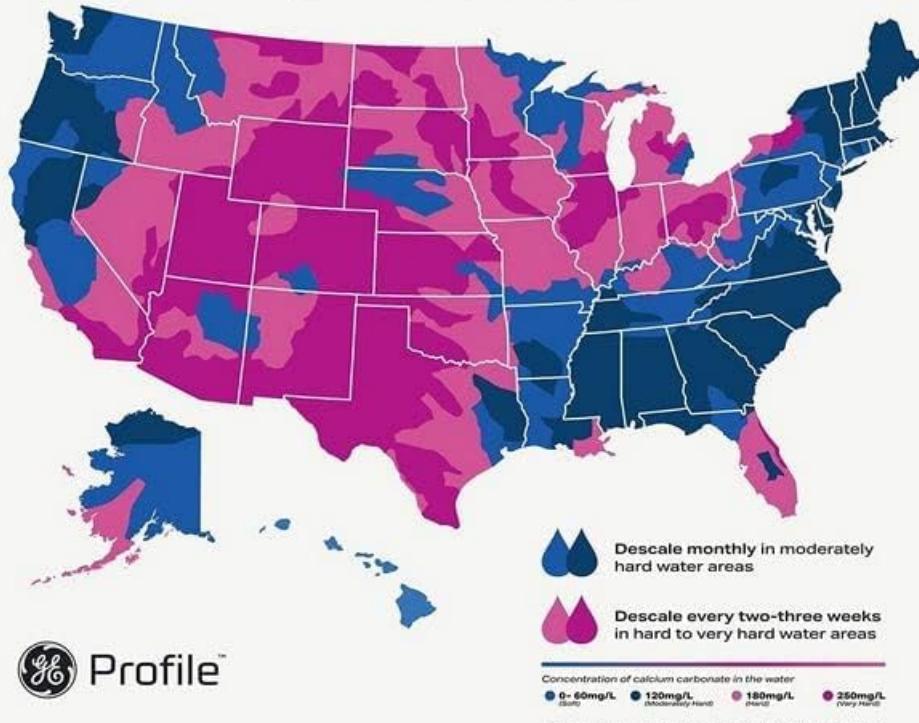

Figure 9: Hard water can impact your ice maker, requiring more frequent descaling.
