LFSS2612TE0

Instruction Manual

Generic LED Refrigerator Light Bulb Replacement

Model: LFSS2612TE0 (and compatible models)

Thank you for choosing our product. Please read this manual carefully before installation and use.

1. Introduction

This manual provides essential instructions for the safe and effective installation, operation, and maintenance of your new Generic LED Refrigerator Light Bulb. This bulb is designed as a direct replacement for various Frigidaire refrigerator models, including LFSS2612TE0, LFSS2612TE1, LFSS2612TE2, LFSS2612TE3, LFSS2612TE4, LFSS2612TF0, LFSS2612TF1, LFSS2612TF2, LFSS2612TF3, LFSS2612TF4, LFSS2612TP0, LFSS2612TP1, and many others listed in the product description. It offers energy-efficient white light for optimal visibility inside your appliance.

2. Safety Information

Please observe the following safety precautions to prevent injury or damage:

- **Always disconnect power** to the refrigerator before attempting any installation or maintenance. Unplug the appliance from the wall outlet.
- Ensure your hands are dry when handling electrical components.
- Do not overtighten the bulb during installation.
- If the bulb is damaged, do not install it. Contact the seller for a replacement.
- This bulb is designed for indoor appliance use only.
- Dispose of old bulbs responsibly according to local regulations.

3. Product Overview

The Generic LED Refrigerator Light Bulb is an energy-efficient replacement designed to provide bright, clear illumination for your refrigerator's interior. It features a standard E27 screw-in base and a tubular shape, making it compatible with many appliance light sockets.

This image shows the overall design of the Generic LED refrigerator light bulb, featuring a clear tubular cover over the LED elements and a standard E27 screw-in base.

A closer view of the light bulb, highlighting the multiple LED chips arranged on an internal circuit board, visible through the clear protective casing. This design ensures bright and energy-efficient illumination.

4. Setup (Installation)

Follow these steps to replace your refrigerator light bulb:

1. **Disconnect Power:** Unplug your refrigerator from the electrical outlet to ensure safety.
2. **Locate the Old Bulb:** Open the refrigerator door and locate the existing light bulb. It may be covered by a protective shield or cover.
3. **Remove Protective Cover (if applicable):** If there is a cover, carefully remove it. This usually involves twisting, prying, or unscrewing. Refer to your refrigerator's specific manual if you encounter difficulty.
4. **Unscrew the Old Bulb:** Gently turn the old bulb counter-clockwise until it loosens and can be removed from the socket. Be cautious if the old bulb is hot or broken.

5. **Install the New Bulb:** Screw the new Generic LED Light Bulb into the socket by turning it clockwise until it is snug. Do not overtighten.
6. **Replace Protective Cover (if applicable):** Reattach any protective cover you removed earlier.
7. **Restore Power:** Plug your refrigerator back into the electrical outlet.
8. **Test:** Open the refrigerator door to confirm the new light bulb illuminates.

5. Operating

Once installed, the LED light bulb operates automatically with your refrigerator's door switch. It will illuminate when the refrigerator door is opened and turn off when the door is closed.

6. Maintenance

The LED light bulb requires minimal maintenance. To ensure optimal performance and longevity:

- **Cleaning:** If the bulb or its cover becomes dusty or dirty, disconnect power to the refrigerator and gently wipe the bulb with a soft, dry cloth. Do not use liquid cleaners directly on the bulb.
- **Inspection:** Periodically check the bulb for any signs of damage or loose connections. If any issues are observed, disconnect power and address them safely.

7. Troubleshooting

If your new LED light bulb is not functioning as expected, try the following steps:

- **Bulb Does Not Light Up:**
  - Ensure the refrigerator is plugged in and receiving power.
  - Verify the bulb is screwed in tightly into the socket.
  - Check if the refrigerator door switch is functioning correctly (the light should turn on when the door is open).
  - Inspect the bulb for any visible damage. If damaged, replace it.
  - Test the socket with a known working bulb if available, to rule out a socket issue.
- **Light is Dim or Flickering:**
  - Ensure the bulb is fully screwed in.
  - Check for any loose wiring in the refrigerator's light fixture (only if you are qualified to do so, otherwise consult a professional).

If troubleshooting steps do not resolve the issue, please contact the seller for further assistance.

8. Specifications

Feature	Detail
Brand	Generic
Light Type	LED
Wattage	3.5 Watts
Incandescent Equivalent	35 Watts
Bulb Shape Size	T6 1/2 (Tubular)

Bulb Base	E27
Light Color	White
Brightness	250 Lumens
Voltage/Frequency	100-120 Volts / 60 Hertz
Material	Glass, Metal
Indoor/Outdoor Usage	Indoor
UPC	824252677663
Manufacturer Part Number	LFSS2612TE0

9. Warranty and Support

Specific warranty details for this product are not provided in this manual. For warranty information, returns, or technical support, please refer to the product listing on the retailer's website or contact the seller directly.
