## Denfany KD2328B

# DENFANY Nano Ionic Facial Steamer Instruction Manual

Brand: Denfany | Model: KD2328B

## PRODUCT OVERVIEW

The DENFANY Nano Ionic Facial Steamer is designed for personal care at home or in a salon, providing effective moisture supplementation and deep cleansing for the skin. Utilizing ionic vaporization technology, it produces ultra-fine steam that is easily absorbed, helping to open pores, remove impurities, and prepare the skin for further treatments. Its adjustable arm and rotatable sprayer offer versatile use, and it includes an aromatherapy function for an enhanced spa experience.

## SAFETY INFORMATION

Please read and understand all safety precautions before operating the facial steamer.

- **Caution:** Hot steam may cause burns. Always maintain a safe distance from the nozzle. Keep your face at least 7.9 inches (20 cm) from the nozzle to avoid burns.
- Do not immerse the unit in water or other liquids.
- Ensure the power cord is not damaged and is properly connected to a suitable power outlet (110 volts\_of\_direct\_current).
- Do not operate the steamer if it has been dropped or damaged.
- Keep out of reach of children.

- Use only distilled or purified water to prevent mineral buildup and ensure optimal performance.
- If any electrical issues or unusual operation occur, immediately unplug the device and contact customer support.

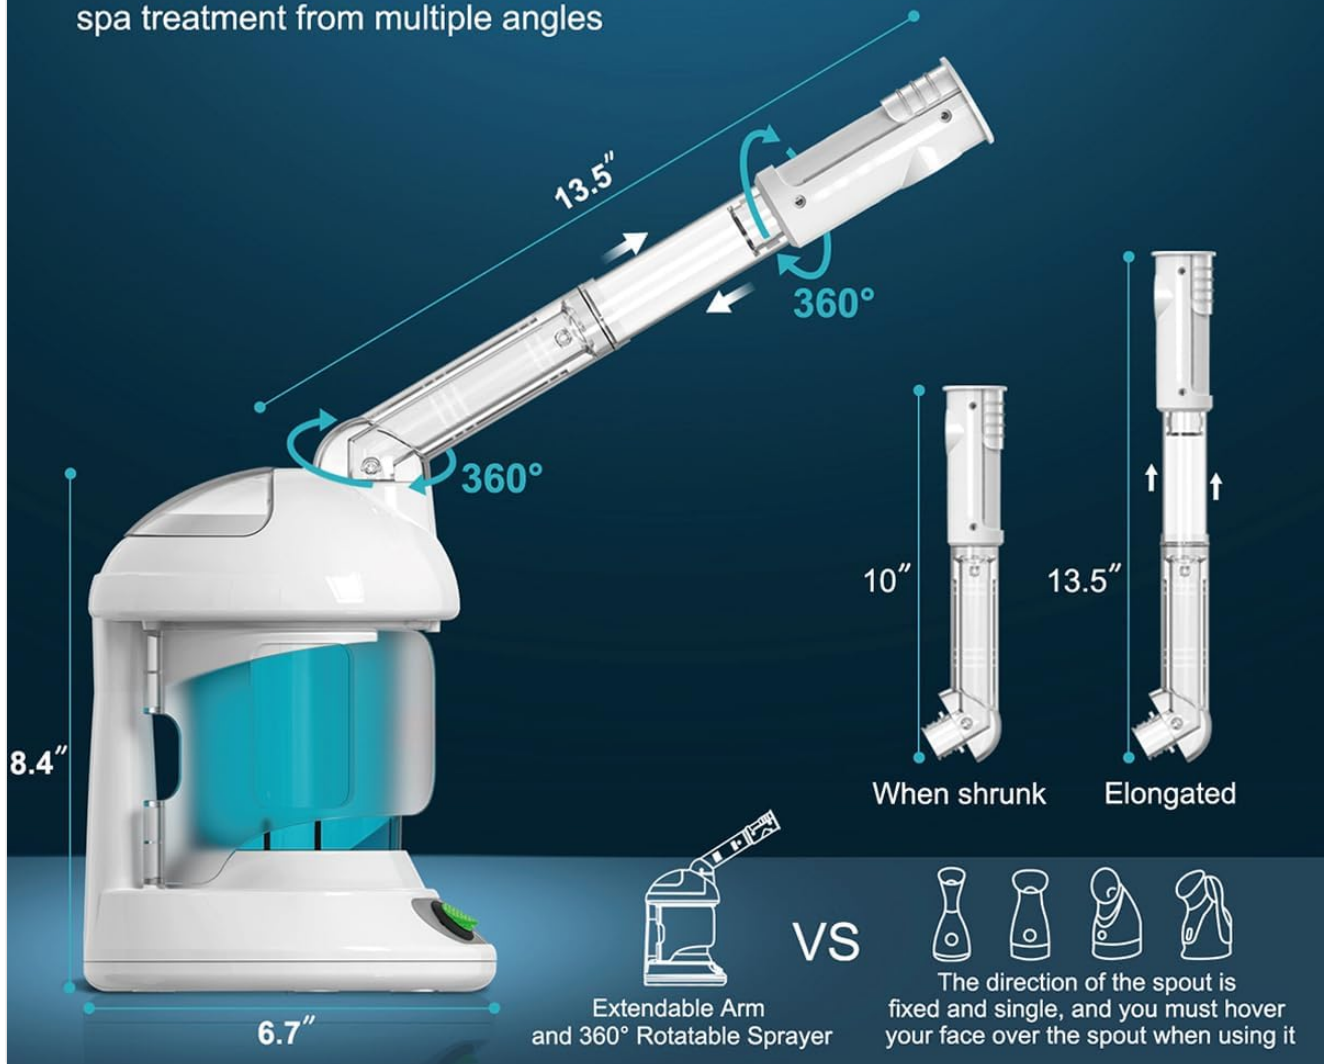

## PRODUCT COMPONENTS

The DENFANY Nano Ionic Facial Steamer package includes the following items:

- Main Facial Steamer Unit
- 360° Rotating Spray Arm (Extendable)
- Water Tank Cleaning Brush
- Pimple Popper Tool Kit
- Spa Headband
- Aroma Pads (for essential oils)

### Extendable Arm and 360° Rotatable Sprayer

- Adjustable arm length
- Nozzle orientation can be adjusted 360°
- You can stand, sit, lie down, and enjoy the perfect spa treatment from multiple angles

## SETUP GUIDE

Follow these steps for the initial setup of your facial steamer:

1. **Place the Steamer:** Position the facial steamer on a flat, stable, and heat-resistant surface. Ensure there is enough space around the unit for proper ventilation.
2. **Fill the Water Tank:** Locate the water plug on the top of the unit. Remove the plug and carefully fill the water tank with distilled or purified water. Do not exceed the 'MAX' fill line. Replace the water plug securely.

3. **Connect Power:** Plug the power cord into a standard 110V AC electrical outlet.
4. **Attach Spray Arm:** Securely attach the 360° rotating spray arm to the main unit. Ensure it clicks into place.

## OPERATING INSTRUCTIONS

Once set up, your DENFANY Facial Steamer is ready for use. Follow these steps for an optimal facial spa experience:

1. **Power On:** Press the "STEAM" switch to turn on the steamer. The indicator light will illuminate.

Image: A close-up of a finger activating the "STEAM" power button on the facial steamer's control panel.

2. **Preheating:** Allow 3-5 minutes for the steamer to preheat and begin producing a steady stream of steam.
3. **Positioning:** Adjust the length of the extendable arm and the angle of the 360° rotatable sprayer to direct the steam towards your face. Maintain a distance of at least 7.9 inches (20 cm) from the nozzle. You can lie down, stand, or sit comfortably while using the steamer.

- Aromatherapy Function (Optional):** For an enhanced experience, place a few drops of your favorite essential oil onto the aromatherapy cotton pad located in the nozzle. This will infuse the steam with fragrance.

# Fragrance Function Design

Place a few drops of your favorite essential oil on the aromatherapy cotton pad. You will have the great apparatus of aromatherapy.

Image: An illustration demonstrating the simple process of adding essential oils to the designated aromatherapy cotton pad within the steamer's nozzle.

5. **Steaming Duration:** A full tank of water can provide steam for not less than 35 minutes. Use for a duration that feels comfortable and beneficial for your skin.
6. **Post-Steam Care:** After steaming, your pores will be open, making it an ideal time for deep cleansing, blackhead removal, or applying facial cleansers, toners, and serums for better absorption.
7. **Power Off:** When finished, press the "STEAM" switch again to turn off the unit and unplug it from the power outlet.

## Benefits of Nano Ionic Steam:

- **Enhanced Penetration:** Nano Ionic steam is 10 times more effective for penetrating skin compared to ordinary steam, as it ionizes and activates water molecules for easier absorption.
- **Deep Cleansing:** The warm moisture helps to open pores, facilitating the thorough removal of dirt, oil, dead skin, blackheads, and other impurities.
- **Moisture Supplementation:** Effectively supplements moisture to the skin, leaving it feeling fresher, smoother, and more radiant.
- **Improved Product Absorption:** Prepares the skin to more effectively absorb facial cleansers, toners, and other skincare products.

## MAINTENANCE

Proper maintenance ensures the longevity and hygienic operation of your facial steamer.

1. **Empty Water Tank:** After each use, always unplug the steamer and allow it to cool down. Then, carefully empty any remaining water from the tank.
2. **Clean Water Tank:** Regularly clean the water tank to prevent mineral buildup and mold. Use the provided water tank cleaning brush. For a deeper clean, you may add a capful of hydrogen peroxide to the chamber, swish it around, and then empty it.
3. **Drying:** After cleaning, ensure the water chamber is thoroughly dried. You can place a fan over the opening where the arm screws on to help air dry the chamber for a few hours.
4. **Exterior Cleaning:** Wipe the exterior of the steamer with a soft, damp cloth. Do not use abrasive cleaners or solvents.
5. **Storage:** Store the steamer in a cool, dry place when not in use.

## TROUBLESHOOTING

If you encounter any issues with your DENFANY Facial Steamer, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No steam is being produced.	Water tank is empty or below minimum level. Unit is not properly plugged in. Not enough preheating time.	Fill the water tank with distilled water. Ensure the power cord is securely plugged into an active outlet. Allow 3-5 minutes for the unit to preheat after turning on.
Water leakage from the unit.	Water tank plug not securely closed. Unit damage or internal component issue.	Ensure the water tank plug is firmly sealed. If leakage persists, discontinue use and contact customer support.
Weak or inconsistent steam.	Mineral buildup in the water tank or heating element. Insufficient water.	Clean the water tank thoroughly as per maintenance instructions. Ensure the water tank is adequately filled.
Unit does not turn on.	No power supply. Power switch not pressed.	Check if the power outlet is working and the plug is fully inserted. Press the "STEAM" switch firmly.

For issues not listed above, or if troubleshooting steps do not resolve the problem, please contact customer support.

## SPECIFICATIONS

Feature	Detail
