- **Comfort:** Ensure laces are tied securely but not too tightly to allow for natural foot movement.

4. MAINTENANCE

Proper care will extend the life and appearance of your sneakers.

4.1 Cleaning

- **Leather Upper:** Wipe the leather surface with a soft, damp cloth to remove dust and light dirt. For deeper cleaning, use a specialized leather cleaner and conditioner according to the product's instructions. Avoid harsh chemicals or abrasive materials.
- **Manmade Sole:** Clean the sole with a damp cloth and mild soap. A soft brush can be used for stubborn dirt.
- **Laces:** Laces can be removed and hand-washed with mild soap and water, then air-dried.

4.2 Storage

Store your sneakers in a cool, dry place away from direct sunlight and extreme temperatures. Using shoe trees can help maintain the shape of the shoes and absorb moisture.

5. TROUBLESHOOTING

Below are common issues and suggested solutions:

- **Squeaking Noise:** If the shoes develop a squeak, it may be due to friction between parts of the shoe or between the shoe and the insole. Try applying a small amount of talcum powder or cornstarch under the insole to reduce friction. Ensure the insoles are properly seated.
- **Tight Fit:** If the shoes feel too tight, ensure you have the correct size. Leather can stretch slightly over time with wear. For minor tightness, consider wearing them for short periods initially.
- **Dull Leather:** If the leather appears dull, clean it thoroughly and apply a quality leather conditioner or polish suitable for black leather to restore its luster.
- **Laces Untying Frequently:** Ensure you are using a secure knot. Double-knotting can prevent laces from coming undone during activity.
