## RORIOS AA-1UF001

# RORIOS Men's Multifunction Quartz Watch Instruction Manual

Model: AA-1UF001

## INTRODUCTION

---

Thank you for choosing the RORIOS Men's Multifunction Quartz Watch. This manual provides detailed instructions for the proper setup, operation, maintenance, and troubleshooting of your new timepiece. Please read this manual thoroughly to ensure optimal performance and longevity of your watch.

## PRODUCT FEATURES

Your RORIOS watch is equipped with several functions designed for daily utility and style:

- **Analog Quartz Movement:** Provides accurate timekeeping.
- **Multifunction Dials:** Includes stopwatch, calendar, and sun/moon phase display.
- **Luminous Hands and Markers:** Ensures visibility in low-light conditions.
- **Durable Silicone Strap:** Offers comfort and flexibility.
- **Water Resistance:** Suitable for daily splashes, rain, and hand washing (30 meters).
- **Mineral Crystal:** Provides scratch resistance.

## SETUP INSTRUCTIONS

### 1. Setting the Time

1. Pull the crown (main knob on the side) out to the **second gear** position.
2. Rotate the crown to adjust the hour and minute hands to the correct time. Ensure the AM/PM is correctly set if your watch has a 24-hour indicator or sun/moon phase.
3. Push the crown back into the normal position to start the watch.

### 2. Setting the Date

1. Pull the crown out to the **first gear** position.
2. Rotate the crown to adjust the date. Avoid setting the date between 9 PM and 3 AM, as this is when the date change mechanism is engaged and could be damaged.

3. Once the date is set, push the crown back into the normal position.

### 3. Adjusting the Silicone Strap

The silicone strap is designed for comfort and adjustability. Use the foldover clasp to secure the watch on your wrist. If the strap is too long, it may require professional adjustment by removing segments or repositioning the clasp on the strap.

## OPERATING INSTRUCTIONS

### 1. Using the Stopwatch Function

Your watch features a stopwatch (chronograph) function:

1. Press the **Start/Stop Button** (typically located at the 2 o'clock position) to start the stopwatch.
2. Press the **Start/Stop Button** again to stop the stopwatch.

3. Press the **Reset Button** (typically located at the 4 o'clock position) to return the stopwatch hands to zero.

## 2. Luminous Display

The hands and markers of your RORIOS watch are coated with a luminous material. This material absorbs light during the day and emits a glow in the dark, allowing for time readability in low-light conditions. The intensity and duration of the glow depend on the amount of light absorbed.

Image: The RORIOS watch face displaying its practical luminous function, glowing brightly in a dark environment.

## 3. Water Resistance

This watch is rated for 30 meters (3ATM) water resistance. This means it is suitable for daily life activities such as:

- Rain exposure
- Accidental splashes
- Hand washing

**Important:** It is **not** suitable for showering, bathing, swimming, diving, or any water sports. Do not operate the crown or

buttons while the watch is wet or submerged, as this can compromise the water seal.

# Daily Life Waterproof

## Don't need to Worry about Water Drops

Rain

Sweat

Hand-wash

## MAINTENANCE

### 1. Cleaning Your Watch

To maintain the appearance of your watch:

- Wipe the case and crystal with a soft, dry cloth.
- For the silicone strap, you can use a slightly damp cloth with mild soap, then rinse and dry thoroughly.
- Avoid using harsh chemicals or abrasive materials, as these can damage the watch's finish.

### 2. Battery Replacement

Your quartz watch is powered by a battery. When the watch stops or the second hand starts skipping, it indicates a low

battery. Battery replacement should be performed by a qualified watch technician to ensure the water resistance seal is properly maintained.

### 3. Storage

When not wearing your watch, store it in a cool, dry place away from direct sunlight, extreme temperatures, and strong magnetic fields. The original watch box is ideal for storage.

## TROUBLESHOOTING

---

- **Watch is not running:**

Check if the crown is pushed all the way in. If it is, the battery may need replacement.

- **Time or date is incorrect:**

Refer to the "Setting the Time" and "Setting the Date" sections to re-adjust. Ensure the crown is fully pushed in after setting.

- **Luminous function is weak:**

The watch needs to be exposed to light to charge the luminous material. Expose it to bright light for a few minutes to recharge.

- **Water appears inside the watch:**

This indicates a breach in the water resistance. Stop using the watch immediately and seek professional repair to prevent further damage.

## SPECIFICATIONS

---

Image: A diagram illustrating the key dimensions of the RORIOS watch, including dial diameter, case thickness, band length, band width, and overall weight.

Feature	Detail
Model Number	AA-1UF001
Movement Type	Japanese Quartz
