3. SAFETY INSTRUCTIONS

To ensure safe operation and prevent damage, please observe the following safety precautions:

- Do not exceed the maximum load of 3680W (250V/16A). Overloading can cause overheating and fire hazards.
- Do not connect multiple power strips in series.
- This product is designed for indoor use only. Do not use in wet or damp conditions.
- Keep away from water and other liquids.
- Do not open or modify the power strip. Repairs should only be performed by qualified personnel.
- Ensure the power strip is placed on a stable surface and not covered, allowing for proper ventilation.
- Always insert plugs fully into the outlets.
- Unplug the power strip from the wall outlet when not in use for extended periods.
- The built-in child protection device helps prevent access to live parts, but adult supervision is always recommended around electrical devices.

4. SETUP

1. **Unpack:** Carefully remove the power strip from its packaging. Inspect for any signs of damage.
2. **Placement:** Choose a dry, stable location away from heat sources and direct sunlight. Ensure the 5-meter cable can reach the wall outlet without being stretched or obstructed.
3. **Wall Mounting (Optional):** If desired, use the two keyhole slots on the back of the power strip to mount it securely to a wall or desk. Ensure appropriate screws and wall anchors are used for the mounting surface.
4. **Connect to Power:** Plug the power strip's main plug into a grounded wall outlet.

5. OPERATING INSTRUCTIONS

1. **Power On/Off:** Press the integrated on/off switch located on the power strip. The indicator light will illuminate when the power strip is active (ON) and turn off when it is inactive (OFF).
2. **Connecting Devices:** Insert the plugs of your electronic devices into the available outlets. The 45° angled design allows for easier access and reduces cable clutter.
3. **Disconnecting Devices:** Gently pull the plug directly from the outlet. Do not pull by the cable.
4. **Energy Saving:** Utilize the on/off switch to cut power to all connected devices when they are not in use, helping to save energy.
