

EUGAD 0017GYC

EUGAD Pet Pool with Water Jet (Model: 0017GYC)

Foldable Portable PVC Dog and Cat Bath, 80x20cm

INTRODUCTION

This manual provides instructions for the proper setup, operation, and maintenance of your EUGAD Pet Pool. Please read all instructions carefully before use to ensure safe and enjoyable experiences for your pets. This pool is designed for both dogs and cats, offering a refreshing and fun environment.

SAFETY INFORMATION AND PRECAUTIONS

- **Supervision:** Always supervise your pet while they are using the pool.
- **Claw Care:** Trim your pet's claws before use to prevent damage to the pool material.
- **Sun Exposure:** Do not expose the pool to direct, prolonged sunlight when empty or not in use, as this may degrade the PVC material.
- **Level Surface:** Place the pool on a flat, stable, and smooth surface to prevent tipping or damage.
- **Water Depth:** Ensure the water depth is appropriate for your pet's size and swimming ability.
- **Material Safety:** The pool is constructed from non-toxic, odorless PVC and robust MDF panels.

SETUP INSTRUCTIONS

1. **Unfold the Pool:** Carefully unfold the pool on a flat, clear surface. The pool is designed to be easily collapsible and expandable.
2. **Positioning:** Ensure the pool is positioned where water drainage will not cause issues.
3. **Connect Water Hose (for Water Jets):**

Image: Diagram illustrating the connection of a water hose to the pool's water jet port. The yellow connector is inserted into the pool's side port.

Image: A close-up view of the 1.5cm diameter water jet connection port located on the upper edge of the pool. Connect a standard garden hose (not included, recommended diameter $\text{Ø } 1.5 \text{ cm}$) to the injection port located on the side of the pool.

4. Prepare Water Jet Spout:

Roll The Spout Inward Before Filling

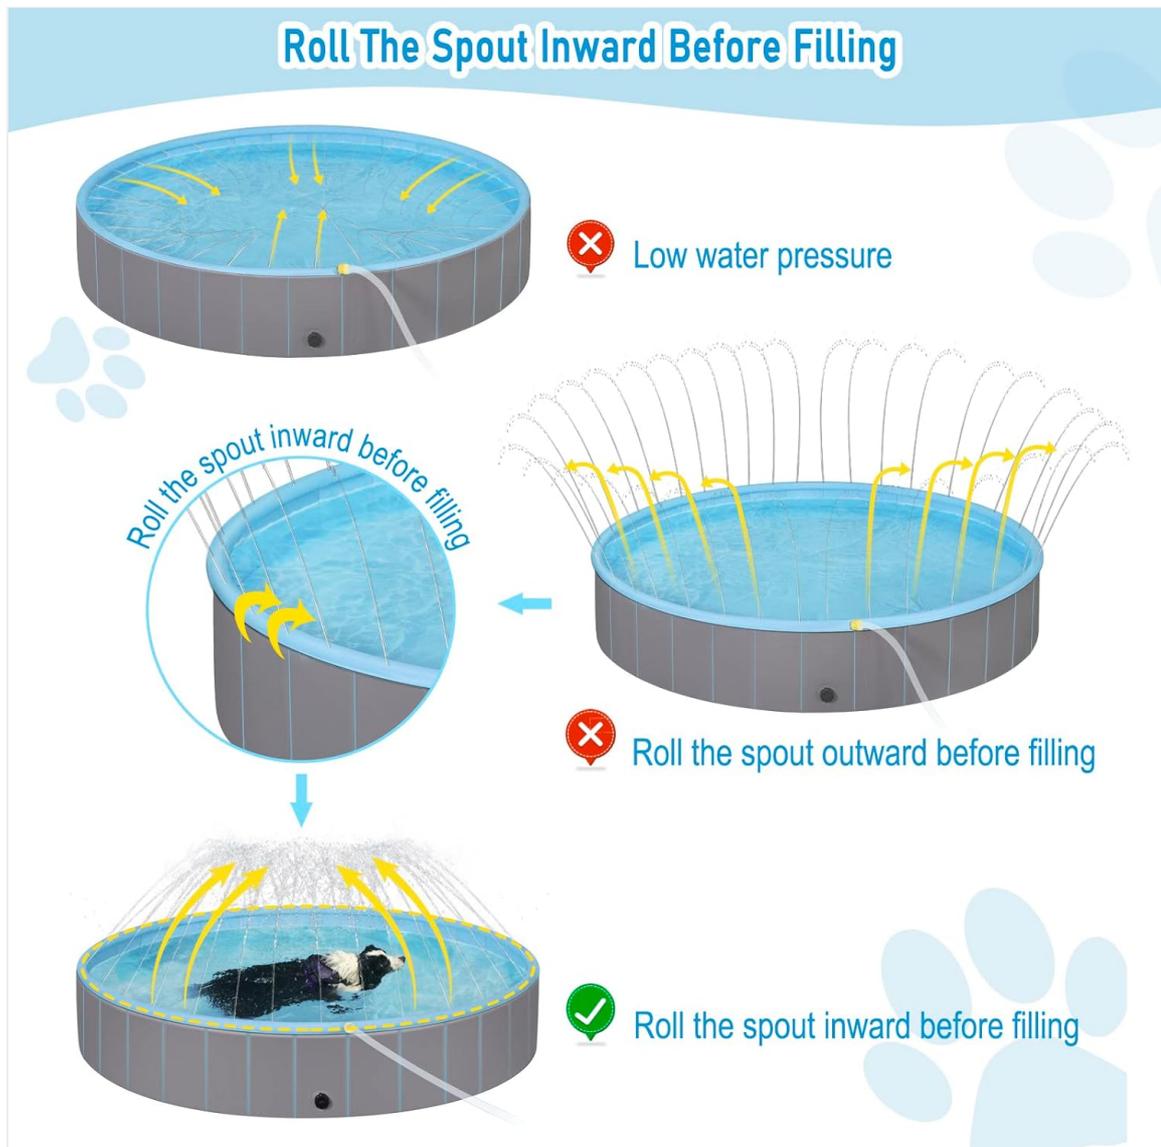

Image: A diagram demonstrating the correct method of rolling the water jet spout inward before filling the pool to ensure proper water spray. Incorrect outward rolling is also shown.

Ensure the water jet spout is rolled **inward** before filling the pool. This ensures the water sprays correctly into the pool. Rolling it outward will result in low water pressure and ineffective jets.

5. **Fill the Pool:** Begin filling the pool with water. The water jets will activate as water pressure builds. The height of the water columns will vary depending on your water pressure.

OPERATING INSTRUCTIONS

Once the pool is set up and filled, your pet can enjoy the refreshing water and playful jets.

- **Water Jet Function:** The water jets activate automatically when a hose is connected and water is supplied. Adjust the water flow from your hose to control the intensity of the jets.
- **Pet Entry:** Allow your pet to enter and exit the pool freely. The non-slip embossed bottom provides increased friction for safety.
- **Drainage:** To drain the pool, locate the drainage port on the side. Unscrew the cap to allow water to flow out quickly.

MAINTENANCE AND CARE

- **Cleaning:** Regularly clean the pool with mild soap and water. Rinse thoroughly to remove any residue.
- **Draining:** Use the quick side drainage port to empty the pool after each use or for cleaning.

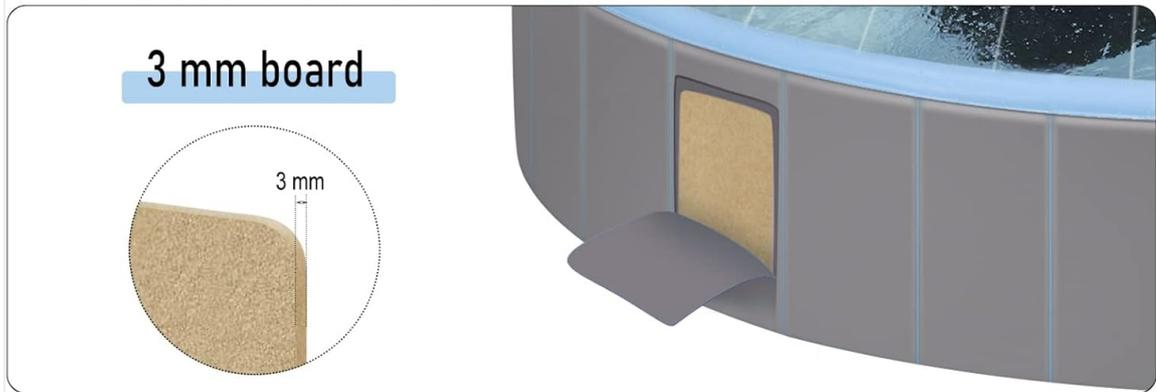

Image: A close-up of the quick drainage port on the side of the pet pool, demonstrating efficient water outflow.

- **Drying:** Allow the pool to dry completely before folding and storing to prevent mold or mildew.
- **Folding for Storage:** The pool is designed to fold compactly for easy storage and transport.

Image: Hands folding the flexible panels of the pet pool, illustrating its compact storage capability.

- **Storage:** Store the folded pool in a cool, dry place away from direct sunlight.

TROUBLESHOOTING

- **Low Water Jet Pressure:** Ensure the water hose is fully connected and the water supply is turned on. Check that the water jet spout is rolled **inward** as shown in the setup instructions. Water pressure from your source may also affect jet height.
- **Leaking:** Inspect the pool for any punctures or tears. Ensure the drainage cap is securely tightened.
- **Difficulty Folding:** Ensure the pool is completely empty and dry. The panels should fold easily. Do not force them.

SPECIFICATIONS

Feature	Detail
Brand	EUGAD
Model Number	0017GYC
Product Dimensions (L x W x H)	80 x 20 x 20 cm
Product Weight	1.7 Kilograms
Recommended Maximum Weight	15 Kilograms

Color	Light blue with light gray
Material	PVC + E1 MDF
Capacity	100 Liters
Animal Type	Cats, Dogs
Assembly Time	Approximately 5 Minutes
Special Features	Water jets, Foldable and portable design, Non-slip bottom
