Moen 87627EWSRS

Moen Haelyn 87627EWSRS Touchless Kitchen Faucet User Manual

Model: 87627EWSRS | Finish: Spot Resist Stainless

1. INTRODUCTION

The Moen Haelyn Touchless Single-Handle Pull-Down Sprayer Kitchen Faucet with Soap Dispenser is designed to enhance your kitchen experience with advanced functionality and a modern aesthetic. This faucet features MotionSense Wave technology for hands-free operation, a pull-down spray head with Power Clean technology for efficient washing, and a Spot Resist Stainless finish for easy maintenance.

2. SETUP AND INSTALLATION

This faucet is designed for single-hole deck mount installation. The Duralock quick connect system simplifies the installation process. For detailed step-by-step instructions, please refer to the dedicated Installation Manual included with your product.

2.1 Power Supply

- The touchless functionality is powered by 6 AA batteries, which are included.
- An optional AC power adapter is available for continuous power, eliminating the need for battery replacement. Ensure all power and control plugs are securely connected.

3. OPERATING INSTRUCTIONS

3.1 Touchless Activation (MotionSense Wave)

To activate the water flow without touching the faucet, simply wave your hand over the sensor located on the side of the faucet base. Wave your hand again to turn the water off. This feature is ideal for maintaining hygiene and convenience when your hands are messy.

3.2 Manual Operation

The single handle controls both water flow and temperature:

- **Water Flow:** Lift the handle to increase flow; push down to decrease flow and turn off.
- **Temperature:** Move the handle to the left for hot water; move to the right for cold water.

3.3 Pull-Down Sprayer with Power Clean

The pull-down spray wand offers versatile cleaning options:

- **Extension:** Pull the spray head down from the spout to extend the hose for greater reach within and around the sink.
- **Retraction:** The Reflex system ensures smooth operation, easy movement, and secure docking of the spray head back into the spout.
- **Spray Modes:** Use the buttons on the spray head to switch between an aerated stream and a powerful spray.
- **Power Clean:** Engage the Power Clean technology for 50 percent more spray power compared to most standard pull-down faucets, ideal for tackling tough messes.

4. MAINTENANCE

4.1 Cleaning the Finish

The Spot Resist Stainless finish is designed to resist fingerprints and water spots, making it easier to keep your faucet looking clean. To clean, simply wipe with a soft, damp cloth. Avoid abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the finish.

4.2 Soap Dispenser Refill

The included soap dispenser can be easily refilled from above the counter. Simply lift the pump head and pour soap directly into the reservoir.

5. TROUBLESHOOTING

- **No Water Flow / Intermittent Flow:** Ensure the main water supply is on. Check that the 6 AA batteries are correctly installed and have sufficient charge. If using an optional AC adapter, verify it is properly connected and receiving power.
- **Touchless Sensor Not Responding:** Check battery levels. Ensure the sensor area is clean and unobstructed.
- **Low Water Pressure:** Verify that the water supply lines are fully open. Check for any kinks in the pull-down hose.
- **Sprayer Not Retracting:** Ensure the hose is not obstructed under the sink. The Reflex system should allow for smooth retraction.

6. SPECIFICATIONS

Brand	Moen
Model Name	Haelyn
Model Number	87627EWSRS
UPC	026508349656
Finish Type	Spot Resist Stainless
Material	Metal (Stainless Steel Handle)
Number of Handles	1
