Bitvae C5

Bitvae Cordless Water Dental Flosser User Manual

Model: C5 | Brand: Bitvae

Product Overview

The Bitvae Cordless Water Dental Flosser (Model C5) is designed to provide comprehensive oral care, offering an effective and convenient alternative to traditional flossing. It features multiple cleaning modes and intensity settings to cater to various oral hygiene needs, promoting gum health, fresh breath, and plaque removal.

Image: Visual representation of common oral health issues like food residue, bleeding gums, plaque buildup, cavities, bad breath, and difficulty cleaning braces, which the water flosser helps address.

Safety Information

- Consult with a healthcare professional before using if you have pre-existing medical conditions.
- Keep the device out of reach of children.
- Observe electrical safety precautions for battery-powered and charging devices.
- While the device is IPX7 waterproof, avoid deep water submersion. Ensure the charging port cover is securely closed before use, especially in wet environments like the shower.

Image: The water flosser is shown in a shower setting, demonstrating its IPX7 waterproof rating for safe use in wet environments.

Setup

1. **Unpack:** Carefully remove the oral irrigator and all accessories from its packaging.
2. **Charge:** Charge the device using the provided USB cable. Ensure the charging port is dry before connecting the cable. The device features a 40-day battery life on a full charge.
3. **Attach Nozzle:** Select your desired jet tip and firmly attach it to the device until it clicks into place.
4. **Fill Reservoir:** Open the water reservoir and fill it with clean water. The 261ML large capacity reservoir is designed for a 60-second full mouth clean without frequent refills.

Operating Instructions

1. **Select Mode and Intensity:** Turn on the device. Choose your desired cleaning mode (Clean, Massage, Jet) and intensity setting. The device offers 3 modes and 5 intensity settings. Beginners should start at a lower intensity (Level 1) to allow gums to adjust comfortably. The "Gentle Startup" feature gradually increases flossing pressure.
2. **Positioning:** Lean over the sink. Place the nozzle in your mouth, aiming the tip at a 90-degree angle to your gumline. Close your mouth slightly to prevent water from splashing.
3. **Flossing:** Guide the water stream along your gum line and between your teeth. Ensure you clean all surfaces of your teeth, including hard-to-reach areas and around braces. The 360° tip rotation allows for thorough cleaning.
4. **Completion:** Continue for approximately 60 seconds for a full mouth clean. Turn off the device when finished.

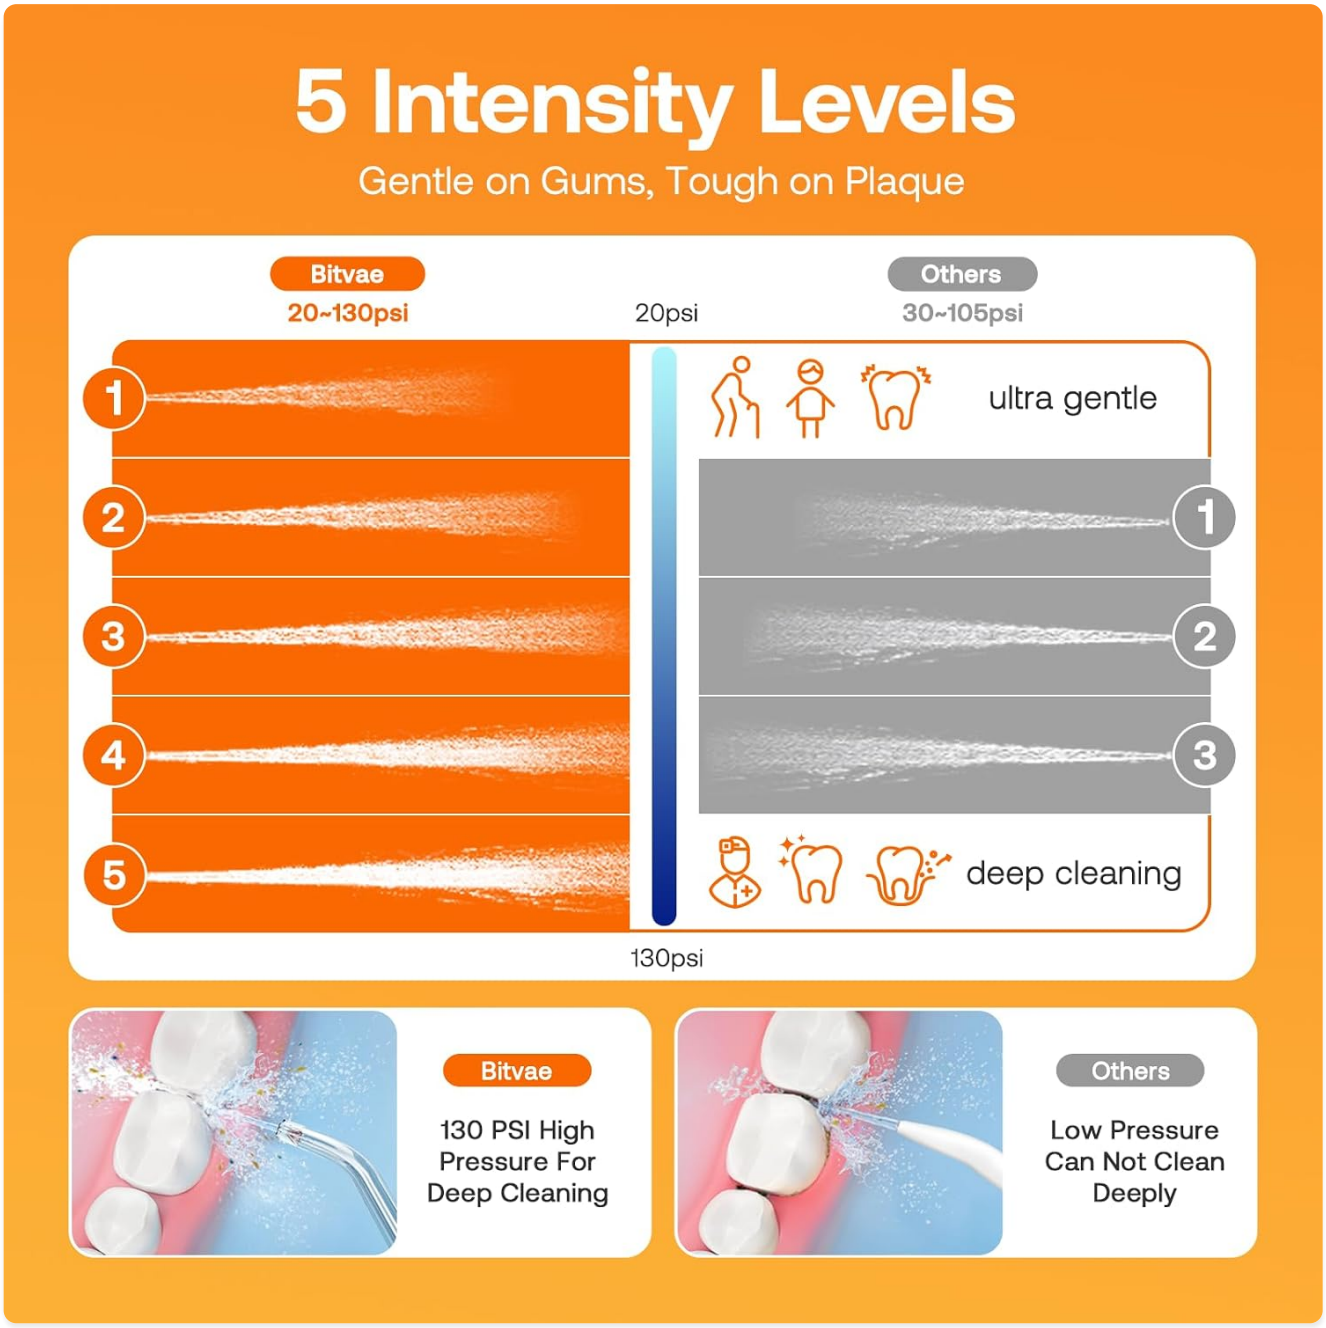

Image: A comparison chart showing the 5 intensity levels of the Bitvae water flosser, ranging from gentle to deep cleaning, with a maximum pressure of 130 psi.

Gentle Startup

Kind to Sensitive Gums with Every Startup

with Gentle Startup Flow

Gradually increases flossing pressure to help gums adjust comfortably

no Gentle Startup Flow

May cause gum sensitivity or bleeding

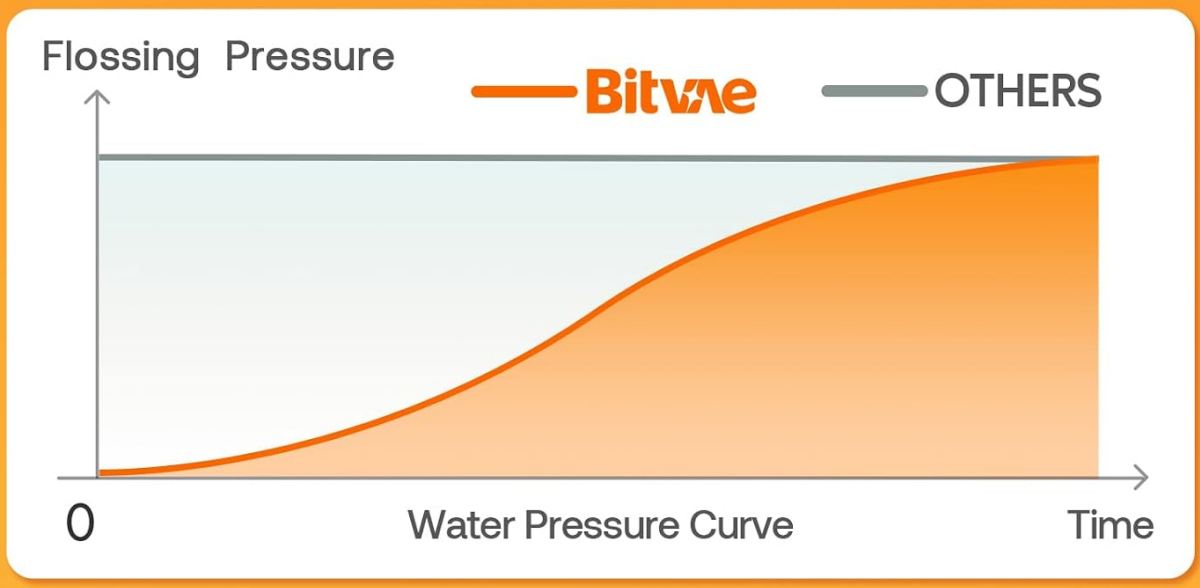

Image: A graph illustrating Bitvae's "Gentle Startup" feature, which gradually increases water pressure to prevent gum sensitivity, compared to other devices with immediate high pressure.

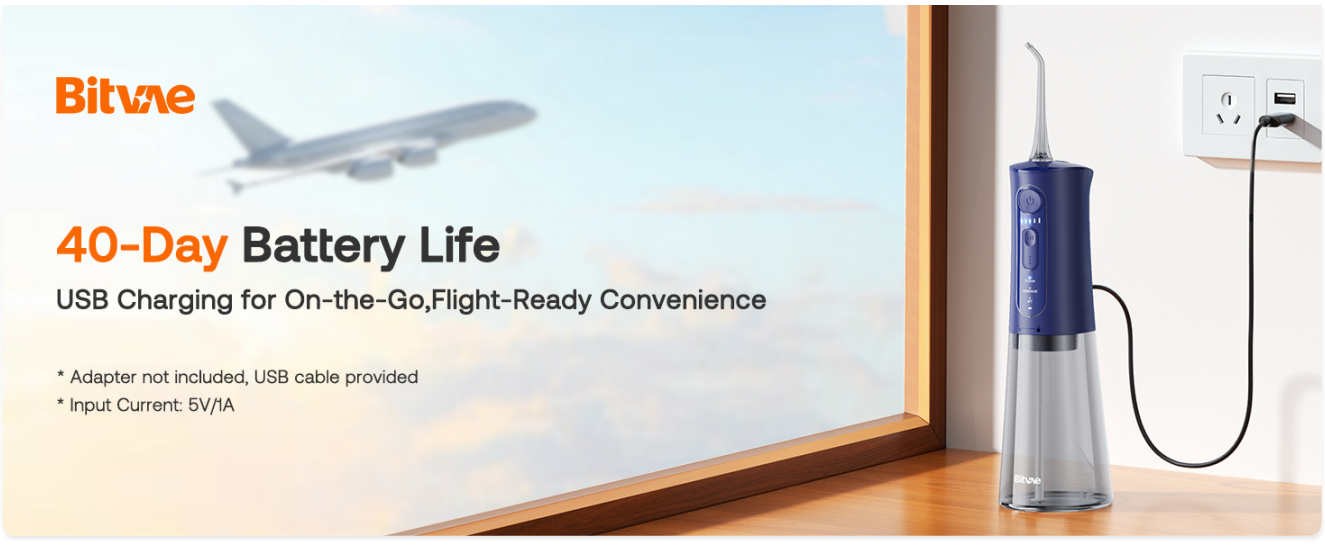

Image: The water flosser tip demonstrating its 360° rotation capability, ensuring no area is left unreached during cleaning, including tooth gaps, tongue, braces, and back molars.

Maintenance

- **Clean Nozzle:** After each use, remove the nozzle and rinse it under running water.
- **Clean Reservoir:** Empty any remaining water from the reservoir. The wide-mouth design allows for easy and regular cleaning to prevent water contamination. Rinse the reservoir thoroughly and allow it to air dry.
- **Store:** Store the device in a dry place. Ensure the charging port cover is closed.

Image: A visual comparison highlighting the Bitvae C5's wide-mouth reservoir design, which makes it easy to clean and keeps water fresh, unlike narrow-necked reservoirs that are difficult to clean and can lead to contamination.

Troubleshooting

Problem	Possible Cause	Solution
Device not turning on.	Low battery or charging issue.	Ensure the device is fully charged. Check the USB cable and charging port for damage.

Problem	Possible Cause	Solution
Weak water pressure.	Low battery, clogged nozzle, or incorrect mode/intensity setting.	Charge the device. Clean the nozzle. Adjust to a higher intensity setting.
Water leaking from reservoir.	Reservoir not properly sealed or damaged.	Ensure the reservoir is securely attached and sealed. Inspect for cracks or damage.
Gum sensitivity or bleeding.	Too high intensity setting or improper technique.	Reduce the intensity setting. Use the "Gentle Startup" feature. Ensure the nozzle is aimed at the gumline at a 90-degree angle. Consult a dentist if bleeding persists.

Specifications

Model Number: C5

Brand: Bitvae

Color: Midnight Blue (as per current variant)

Water Reservoir Capacity: 261 ML (9 oz)

Cleaning Modes: 3 (Clean, Massage, Jet)

Intensity Settings: 5

Water Pressure: Up to 130 psi (for deep cleaning)

Battery Life: Up to 40 days (on a full charge)

Power Source: Battery Powered (1 A battery included)

Waterproof Rating: IPX7

Special Features: Large Capacity Water Reservoir, 3 Modes, 40-Day Battery Life, Multiple Tips, IPX7 Waterproof, Gentle Startup, 360° Tip Rotation.

Product Benefits: Gum Health, Prevents Bad Breath, Prevents Cavities, Removes Plaque.

Package Dimensions: 8.74 x 3.74 x 2.68 inches

Item Weight: 13.44 ounces

Manufacturer: Bitvae
