DEWINNER Vertical Slow Masticating Cold Press Juicer

DEWINNER Vertical Slow Masticating Cold Press Juicer Instruction Manual

Model: Vertical Slow Masticating Cold Press Juicer

INTRODUCTION

Thank you for choosing the DEWINNER Vertical Slow Masticating Cold Press Juicer. This appliance is designed to efficiently extract juice from various fruits and vegetables, preserving essential nutrients through its low-speed chewing technology. Its user-friendly design and easy-to-clean components make it a convenient addition to any kitchen. Please read this manual thoroughly before operation to ensure safe and optimal performance.

PRODUCT COMPONENTS

Familiarize yourself with the main parts of your DEWINNER juicer:

Image: The DEWINNER juicer main unit in red and black, surrounded by its detachable parts including different filter screens, a rotary press auger, juice collection cups, and a cleaning brush. Fresh fruits are also displayed, indicating the juicer's purpose.

- Main Motor Base
- Juice Cup / Bowl
- Filter Screen Assembly (various types for different uses)
- Spiral Shaft (Auger)
- Feed Cover / Hopper
- Pulp Outlet
- Juice Outlet with Leakage-Proof Valve
- Cleaning Brush

SETUP AND ASSEMBLY

Proper assembly is crucial for the juicer's function and safety. Follow these steps for quick installation:

1. Install the juice cup (bowl) onto the main motor base, ensuring it is securely locked into place.
2. Place the desired filter screen assembly into the juice cup. Ensure it fits snugly and is properly aligned.
3. Align the spiral shaft (auger) with the center of the filter screen assembly and gently push it down until it clicks into position.
4. Finally, install the feed cover (hopper) onto the juice cup, rotating it until it locks securely. The juicer will not operate if the cover is not correctly locked.

OPERATION

The DEWINNER juicer operates at a low speed of 45-55 RPM, which helps to gently squeeze ingredients, maximizing juice extraction efficiency up to 95% and preserving beneficial nutrients. It features a simple two-speed operation.

Juicing Process:

1. Prepare your fruits and vegetables by washing them thoroughly. Cut larger items into smaller pieces that fit easily into the feed chute.
2. Place appropriate collection containers under the juice and pulp outlets.
3. Turn on the juicer using the power switch.
4. Slowly feed the prepared ingredients into the feed chute. Use the food pusher if necessary, but do not force ingredients.
5. Observe the juice flowing from the juice outlet and the pulp from the pulp outlet. The juice leakage-proof valve ensures a clean juicing experience.

Image: A close-up of the juicer's juice outlet, showing a hand opening the valve to dispense fresh orange juice into a glass. The image highlights the high juice yield and the leakage-proof design.

Versatility:

This juicer is highly versatile and can process a wide range of ingredients, including celery, ginger, wheatgrass, nuts, cabbage, beetroot, and most fruits. With the included cold press cup, you can also prepare ice cream, smoothies, and

baby food.

Image: A display of different culinary creations possible with the juicer, such as various fruit and vegetable juices, ice cream, milkshakes, and baby food, showcasing its multi-functional capabilities.

Reverse Function:

The juicer is equipped with a reverse function. If ingredients become jammed or the machine stops during juicing, switch to the "Reverse" setting to clear the blockage. This helps prevent damage to the motor and ensures continuous operation.

MAINTENANCE AND CLEANING

Regular cleaning ensures the longevity and hygienic operation of your juicer. The design allows for easy disassembly to facilitate thorough cleaning.

1. Before cleaning, ensure the juicer is turned off and unplugged from the power outlet.
2. Disassemble all removable parts: feed cover, spiral shaft, filter screen assembly, and juice cup.
3. Rinse all disassembled parts under running water. Use the provided cleaning brush to remove any pulp residue from the filter screen and other intricate areas.
4. The juicer components are not dishwasher safe. Hand wash them with mild soap and water.
5. Wipe the main motor base with a damp cloth. Never immerse the motor base in water.
6. Allow all parts to dry completely before reassembling or storing the juicer.

TROUBLESHOOTING

If you encounter issues with your juicer, refer to the common problems and solutions below:

Problem	Possible Cause	Solution
Juicer stops or jams during operation.	Overloading with ingredients, hard ingredients, or pulp buildup.	Turn off the juicer, use the reverse function to clear the blockage. If persistent, disassemble and clean. Cut ingredients into smaller pieces.
Low juice yield or wet pulp.	Incorrect assembly of filter or auger, or feeding ingredients too quickly.	Ensure all parts are correctly assembled and locked. Feed ingredients slowly and allow the juicer to process them fully.
Machine does not turn on.	Not properly assembled, not plugged in, or power issue.	Check if the power cord is securely plugged in. Ensure all components are correctly assembled and locked, especially the feed cover.

PRODUCT SPECIFICATIONS

Feature	Detail
Brand	DEWINNER
Color	Red
Special Feature	BPA Free, Powerful Motor
Product Dimensions	12.6"D x 11.8"W x 12.9"H
Finish Type	Plastic
Recommended Uses	Fruits, Vegetables, Nuts
Capacity	0.6 Liters
Maximum Power	500 Watts
Power Source	Corded Electric
Voltage	120 Volts
Number of Speeds	2

Feature	Detail
Item Weight	9.48 pounds
