LAMTTO 4K Dash Cam WiFi GPS

LAMTTO 4K Dash Cam User Manual

Model: 4K Dash Cam WiFi GPS
Brand: LAMTTO

Product Overview

The LAMTTO 4K Dash Cam is designed to provide high-quality video recording for your vehicle, ensuring a safer and more comfortable driving experience. It boasts advanced features such as 4K Ultra HD resolution, voice control, built-in WiFi and GPS, and comprehensive parking monitoring capabilities. Its compact design ensures it does not obstruct your view while driving.

The LAMTTO 4K Dash Cam and its accompanying mobile application interface.

Setup & Installation

What's in the Box:

- 1 × 2" WIFI Front Dash Cam
- 1 × 10.84ft Car Charger
- 1 × 0.66ft Micro USB Cable
- 1 × 360° Suction Mount for Camera

- 1 × User Manual

Installation Steps:

1. **Prepare the Micro SD Card:** Before turning on the camera, insert a branded U3 high-speed Micro SD Card (not included, max support 128GB). It is recommended to format the memory card in the dash cam's menu for optimal performance.
2. **Attach the Suction Mount:** Securely attach the 360° suction mount to the dash cam.
3. **Mount the Dash Cam:** Affix the suction mount to your car's windshield, ensuring it does not obstruct your driving view. Adjust the camera angle for optimal recording.
4. **Connect Power:** Plug the 10.84ft car charger into your car's cigarette lighter socket and connect it to the dash cam. The camera will automatically turn on and begin recording.
5. **Cable Management:** Use the provided tool and wire clips to neatly route the power cable along the windshield trim, keeping it out of the way and maintaining a clean appearance.

The compact design of the dash cam allows for discreet placement on the windshield.

Product dimensions for easy installation planning.

Operating Instructions

Key Features:

- **4K Ultra HD Resolution:** Records in stunning 4K (3840*2160P@30FPS) for clear and detailed footage, capturing license plates and road signs effectively.

- **Voice Control:** Operate the dash cam using simple voice commands (e.g., "turn on WiFi", "take a photo") for hands-free convenience and safer driving.
- **Built-in WiFi & GPS:** Connect to the dedicated mobile app (Android/iOS) via 2.4G WiFi for live streaming, video download, settings adjustment, and easy sharing to social media. Built-in GPS records driving route and speed.
- **Super Night Vision & WDR:** Equipped with F1.55 large aperture and 7-layer glass lens, combined with WDR technology, ensures clear imaging in low-light conditions and tunnels.
- **170° Wide Angle Lens:** Covers multiple lanes, reducing blind spots and providing a broader view of the road.
- **G-Sensor:** Automatically detects sudden shocks or collisions and locks the current video footage to prevent it from being overwritten, serving as crucial evidence.
- **24-Hour Parking Monitor:** With a built-in lithium battery, the dash cam can monitor the surrounding environment when parked, recording about 30 seconds of video upon detecting external force. (Requires dedicated hardware kit for 7*24 monitoring).
- **Loop Recording:** Automatically overwrites the oldest files when the memory card is full, ensuring continuous recording.

Seamless connectivity with your smartphone via WiFi for real-time viewing and data transfer.

Experience superior 4K video quality for clear and detailed recordings.

Hands-free operation with smart voice control commands.

Advanced safety features including G-sensor, Parking Monitor, and Loop Recording.

Maintenance

To ensure the longevity and optimal performance of your LAMTTO 4K Dash Cam, please follow these maintenance guidelines:

- **Clean the Lens:** Regularly clean the camera lens with a soft, dry cloth to ensure clear video recording. Avoid

abrasive materials that could scratch the lens.

- **Avoid Direct Sunlight:** Do not leave the dash cam in direct sunlight for prolonged periods, especially in high temperatures, as this may affect its performance and lifespan. The operating temperature range is -4°F to 149°F.
- **SD Card Care:** Periodically format your Micro SD card (at least once a month) to prevent data corruption and ensure smooth recording. Always use a U3 high-speed Micro SD card (Class 10 or above recommended).
- **Use Original Accessories:** Always use the original car charger and accessories provided in the package to avoid compatibility issues and ensure sufficient power supply.

Troubleshooting

If you encounter any issues with your LAMTTO 4K Dash Cam, please refer to the common problems and solutions below:

- **Dash Cam Overheating:** Some users have reported the dash cam getting warm during operation. This is normal under continuous use, especially in hot environments. Ensure proper ventilation and avoid direct sunlight exposure. If it becomes excessively hot or malfunctions, discontinue use and contact support.
- **SD Card Not Recognized or Recording Issues:** This is often due to an incompatible or corrupted SD card. Ensure you are using a U3 high-speed Micro SD card (Class 10 or above). Format the card within the dash cam's menu. If issues persist, try a different compatible SD card.
- **WiFi Connectivity Issues:** Ensure the dash cam's WiFi is enabled. On your smartphone, connect directly to the dash cam's WiFi network. If you experience internet disconnection on your phone while connected to the dash cam's WiFi, this is expected as the phone prioritizes the dash cam's local network.
- **Video Quality Not as Expected:** Verify that the recording resolution is set to 4K in the camera settings. Ensure the lens is clean and free from smudges or dirt. Performance may vary slightly based on lighting conditions.
- **Voice Control Not Responding:** Ensure you are speaking clearly and within range of the microphone. Check the user manual for the exact voice commands.

Specifications

Feature	Detail
Product Dimensions	2.76 x 5.51 x 4.33 inches
Item Weight	10.8 ounces
Model Number	4K Dash Cam WiFi GPS
Video Capture Resolution	2160p (4K)
