6. MAINTENANCE

- **Regular Cleaning:** Gently wipe the camera lens and body with a soft, dry cloth to remove dust and smudges. Avoid using harsh chemicals.
- **Firmware Updates:** Periodically check the Wansview Cloud app for available firmware updates to ensure optimal performance and security.
- **Power Cycle:** If the camera experiences connectivity issues, try unplugging it from the power source for 10-15 seconds and then plugging it back in.
- **SD Card Management:** Regularly review and back up important recordings from your SD card. Consider formatting the SD card periodically to maintain performance.

7. TROUBLESHOOTING

- **Camera Offline:** Ensure the camera is powered on and connected to a stable 2.4GHz Wi-Fi network. Check your router's internet connection.
- **Poor Image Quality:** Verify your Wi-Fi signal strength. Ensure the lens is clean and free from obstructions. Adjust the video resolution settings in the app if necessary.
- **Motion Alerts Not Received:** Check motion detection settings in the app to ensure it's enabled and sensitivity is adjusted correctly. Verify app notification permissions on your smartphone.
- **Two-Way Audio Issues:** Ensure the microphone and speaker volumes are not muted in the app. Check your device's audio settings.
- **Pairing Failure:** Confirm your Wi-Fi is 2.4GHz. Ensure the camera is close to the router during setup.

Try resetting the camera to factory settings (refer to installation guide for reset button location) and re-pairing.
