

Yehua M9 Plus (SAS-1418359)

Yehua M9 Plus Wireless Display Dongle User Manual

Model: M9 Plus (SAS-1418359)

1. INTRODUCTION

Thank you for choosing the Yehua M9 Plus Wireless Display Dongle. This device allows you to mirror content from your smartphone, tablet, or laptop to a larger screen, such as a TV or projector, wirelessly. It supports multiple protocols including Miracast, AirPlay, and DLNA, providing a versatile solution for your multimedia needs.

Please read this manual carefully before using the product to ensure proper operation and to maximize its performance.

2. PRODUCT FEATURES

- **Latest Miracast Dongle:** Utilizes the most recent Miracast technology for stable and efficient screen mirroring.
- **Multi-Protocol Support:** Seamlessly supports AirPlay, Miracast, and DLNA protocols for broad compatibility.
- **Full HD 1080P Output:** Delivers real 1080P resolution for crisp and clear visuals on your display.
- **H.265 Decoding Support:** Efficiently decodes H.265 video for smoother playback and reduced bandwidth usage.
- **OTA Firmware Upgrades:** Supports Over-The-Air (OTA) wireless firmware updates to ensure your device is always up-to-date with the latest features and improvements.
- **Wide Compatibility:** Compatible with devices running iOS 7 or higher and Android 4.2 or higher.

3. PACKAGE CONTENTS

Please check the package to ensure all items are present:

- 1 x Yehua M9 Plus Display Dongle
- 1 x USB Power Cable with Wi-Fi Module

Image: Yehua M9 Plus Wireless Display Dongle. This image shows the main unit of the M9 Plus dongle, a compact black device with an HDMI connector on one end and a small white label indicating 'Powered by Yehua'.

Image: USB Power Cable with Wi-Fi Module. This image displays the black USB power cable, which includes a small rectangular module for Wi-Fi reception, terminating in a micro-USB connector for the dongle and a standard USB-A connector for power.

4. SETUP GUIDE

1. **Connect to TV/Projector:** Insert the HDMI connector of the M9 Plus dongle into an available HDMI port on your TV or projector.
2. **Connect Power:** Connect the micro-USB end of the provided USB power cable to the M9 Plus dongle. Connect the standard USB-A end of the cable to a USB power adapter (5V/1A recommended, not included) or a USB port on your TV that provides sufficient power.
3. **Select HDMI Input:** Use your TV remote to select the corresponding HDMI input source to which the M9 Plus dongle is connected.
4. **Initial Screen:** Once powered on, the M9 Plus dongle will display an initial setup screen on your TV, showing Wi-Fi information and instructions for connection.

5. OPERATING INSTRUCTIONS

5.1 Connecting Your Device

The M9 Plus dongle supports Miracast (for Android/Windows), AirPlay (for iOS/macOS), and DLNA. The dongle automatically switches between modes based on the connected device.

For Android Devices (Miracast)

1. Ensure your Android device supports Miracast (often called 'Wireless Display', 'Screen Mirroring', 'Smart View', 'Cast', etc.).
2. On your Android device, go to Settings > Connected devices > Connection preferences > Cast (or similar path depending on your device).
3. Scan for available devices and select the M9 Plus dongle from the list.

4. Your Android device screen should now be mirrored to your TV.

For iOS Devices (AirPlay)

1. Connect your iOS device (iPhone/iPad) to the M9 Plus dongle's Wi-Fi network. The Wi-Fi name (SSID) and password will be displayed on the TV screen.
2. Once connected, swipe down from the top-right corner (or up from the bottom for older models) to open Control Center.
3. Tap 'Screen Mirroring' (or 'AirPlay Mirroring').
4. Select the M9 Plus dongle from the list.
5. Your iOS device screen should now be mirrored to your TV.

For DLNA (Media Streaming)

DLNA allows you to stream media files (photos, videos, music) from your device to the M9 Plus dongle without mirroring the entire screen. Many media player apps on Android and iOS support DLNA.

1. Connect your device to the M9 Plus dongle's Wi-Fi network.
2. Open a DLNA-compatible media app on your device.
3. Look for a 'Cast' or 'DLNA' icon within the app (often a TV screen with a Wi-Fi symbol).
4. Select the M9 Plus dongle as the playback device.
5. Select the media you wish to stream.

6. MAINTENANCE

- Keep the device in a dry environment and away from direct sunlight or extreme temperatures.
- Do not expose the device to water or other liquids.
- Clean the device with a soft, dry cloth. Do not use abrasive cleaners or solvents.
- Avoid dropping or subjecting the device to strong impacts.
- Ensure proper ventilation around the dongle when in use to prevent overheating.

7. TROUBLESHOOTING

- **No display on TV:** Ensure the dongle is properly connected to the HDMI port and receiving power. Verify the TV input source is correctly selected. Try a different HDMI port or power source.
- **Unstable connection/lag:** Ensure the dongle is within good Wi-Fi range of your device. Reduce interference from other wireless devices. Check for firmware updates via OTA.
- **Cannot find the dongle on my device:** Ensure the dongle is powered on and displaying its setup screen. Restart both the dongle (by unplugging and re-plugging power) and your source device.
- **No audio:** Check your TV's audio settings. Ensure your source device's volume is up. Some apps may require specific audio settings for casting.

- **Firmware update failed:** Ensure a stable internet connection during the update process. Do not power off the device during an update. If an update fails, try again or contact support.

8. SPECIFICATIONS

Feature	Description
Brand Name	Yehua
Model	M9 Plus
Manufacturer Reference	SAS-1418359
Compatible OS	Android 4.2+, iOS 7+
Output Resolution	1080P Full HD
