WeatherTech FloorLiner HP Custom Fit Floor Mats User Manual

Brand: WeatherTech | Model: 44601-1-2IM

Introduction

The WeatherTech FloorLiner HP is an advanced floor protection system designed to precisely fit the floor contours of your vehicle. These custom-fit floor mats offer superior coverage for the front and second rows, protecting your vehicle's carpet from dirt, spills, and wear. Made from a durable, rubber-like Thermoplastic Elastomer (TPE) compound, they are engineered for extreme weather conditions and are 100% recyclable.

This manual provides essential information for the proper setup, operation, maintenance, and troubleshooting of your WeatherTech FloorLiner HP mats.

Setup and Installation

Your WeatherTech FloorLiner HP mats are laser-measured for a custom fit to your specific vehicle model. Ensure you have the correct mats for your 2014-2019 Kia Soul model (Model: 44601-1-2IM).

1. **Preparation:** Remove any existing floor mats from your vehicle before installing the WeatherTech FloorLiner HP. Ensure the vehicle's carpeted floor is clean and dry.
2. **Placement:** Carefully position each FloorLiner HP mat into its corresponding footwell (driver's side, passenger's side, and second row). The mats are designed to cover the front, back, and sides of your vehicle's floor for maximum protection.
3. **Securement:** The FloorLiner HP features specially designed retention systems that work with your vehicle's existing factory floor mat hardware. Align the mat's retention holes with the vehicle's retention posts and press firmly to secure the mat in place. Additionally, anti-skid nibs and ridges on the underside of the mat provide increased surface friction with your vehicle's carpet, preventing shifting and sliding.

Operating and Protection Features

The WeatherTech FloorLiner HP is engineered to provide robust protection for your vehicle's interior. Its advanced design ensures that fluids, dirt, and debris are contained and channeled away from your footwear and into a lower reservoir, preventing them from reaching your vehicle's carpet.

- **High-Walled Design:** The raised outer edge of the mats partially covers the front, back, and sides of your vehicle's floor, creating a barrier against spills and messes.
- **Durable Material:** Constructed from a Thermoplastic Elastomer (TPE) compound, the mats are flexible yet durable, designed to withstand extreme weather conditions without cracking, curling, or breaking down. This material is also

100% recyclable, latex-free, and PVC-free.

- **Spill Containment:** The unique surface design effectively traps liquids and debris, keeping your vehicle's interior clean and preserving its resale value by preventing wear and tear on the original carpeting.

Maintenance

Maintaining your WeatherTech FloorLiner HP mats is simple and helps prolong their lifespan and effectiveness. Regular cleaning will keep your vehicle's interior looking pristine.

1. **Removal:** Carefully remove the mats from your vehicle.
2. **Cleaning:** For general cleaning, simply hose off the mats with water. For tougher dirt or stains, use a mild soap and water solution, or a dedicated floor mat cleaner. Avoid harsh chemicals or abrasive brushes that could damage the material.
3. **Drying:** Allow the mats to air dry completely before reinstalling them in your vehicle to prevent moisture buildup underneath.

Troubleshooting

- **Mat Does Not Fit Properly:**

  Ensure you have the correct WeatherTech FloorLiner HP model for your specific vehicle year, make, and model (Kia Soul 2014-2019, Model: 44601-1-2IM). Double-check that all existing floor mats have been removed before installation. If issues persist, contact WeatherTech customer support.

- **Mat is Shifting:**

  Verify that the mat's retention holes are securely engaged with your vehicle's factory retention posts. Ensure the anti-skid nibs on the underside of the mat are making proper contact with the carpet. Press down firmly on the mat to ensure full engagement.

- **Mat Appears Warped or Curled:**

  While designed to resist warping and curling, extreme temperature changes during shipping or storage can sometimes cause temporary deformation. Place the mat in a warm environment or in direct sunlight for a short period to allow the material to relax and regain its original shape. Ensure it is laid flat during this process.

Specifications

Feature	Detail
Product Name	FloorLiner HP Custom Fit Floor Mats
Brand	WeatherTech
Model Number	44601-1-2IM
ASIN	B0B1VVHTYS
UPC	787765318044
