Sodastream 60L Quick Connect CO2 Cylinder Instruction Manual

MODEL: 8719128118734

Brand: Sodastream

Introduction

This instruction manual provides essential information for the safe and effective use of your Sodastream 60L Quick Connect CO2 Cylinder. This cylinder is designed to provide carbon dioxide for compatible Sodastream sparkling water makers, allowing you to create fresh, sparkling beverages at home. The Quick Connect system ensures easy and secure installation.

Each 60L cylinder is capable of carbonating up to 60 liters of water, depending on the level of carbonation desired. This product is manufactured in France and features a distinctive pink color for easy identification as a Quick Connect cylinder.

Safety Information

Please read and understand all safety warnings before using the CO2 cylinder. Failure to follow these instructions may result in property damage or personal injury.

- **Storage:** Store the CO2 cylinder in a cool, dry place, away from direct sunlight and heat sources. Do not expose to temperatures exceeding 50°C (120°F).
- **Handling:** Handle the cylinder with care. Do not drop, puncture, or incinerate the cylinder.
- **Ventilation:** Ensure adequate ventilation when using or storing the cylinder. CO2 is heavier than air and can displace oxygen in confined spaces.
- **Compatibility:** Use only with compatible Sodastream Quick Connect sparkling water makers. Do not attempt to modify the cylinder or use it with non-compatible devices.
- **Children:** Keep out of reach of children.
- **Disposal/Exchange:** Do not dispose of the cylinder in household waste. Return empty cylinders to an authorized Sodastream retailer for exchange or proper disposal.

Setup: Installing the CO2 Cylinder

The Sodastream Quick Connect system simplifies cylinder installation. Follow these steps to install your new CO2 cylinder:

1. Ensure your Sodastream sparkling water maker is placed on a flat, stable surface.
2. If your machine has a back cover, remove it by gently pulling it away from the main unit.
3. Locate the cylinder compartment. The Quick Connect cylinder is designed to slide into place without screwing.
4. Insert the pink Quick Connect CO2 cylinder into the compartment, ensuring the bottom of the cylinder rests securely in the base.
5. Push the pink lever down until it clicks into place, securing the cylinder.
6. Replace the back cover of your sparkling water maker, if applicable.

Operating: Carbonating Water

Once the CO2 cylinder is installed, you can begin carbonating your water. Refer to your specific SodaStream sparkling water maker's manual for detailed operating instructions, as procedures may vary slightly by model. Generally, the process involves:

1. Fill a compatible SodaStream bottle with cold water up to the fill line.
2. Secure the bottle into your sparkling water maker.
3. Press the carbonation button in short bursts until you achieve your desired level of fizziness.
4. Remove the bottle and enjoy your freshly carbonated water.

Maintenance

To ensure the longevity and optimal performance of your SodaStream CO2 cylinder:

- Keep the cylinder clean and free from dust or debris. Wipe with a damp cloth if necessary.
- Do not attempt to refill the cylinder yourself. Only use genuine Sodastream CO2 refills.
- When the cylinder is empty, exchange it for a full one at an authorized Sodastream retailer.

Troubleshooting

If you experience issues with carbonation, consider the following:

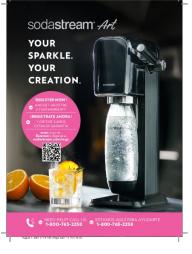

- **No Carbonation:** Check if the CO2 cylinder is properly installed and secured in the Quick Connect mechanism. Ensure the pink lever is fully engaged.
- **Weak Carbonation:** The cylinder may be running low on CO2. Replace it with a new or exchanged cylinder. Also, ensure the water in your bottle is cold, as cold water absorbs CO2 more effectively.
- **Leaking Gas:** If you hear or feel gas escaping, immediately remove the cylinder and re-install it, ensuring a tight connection. If the leak persists, the cylinder may be faulty; do not use it and contact Sodastream customer support.

Specifications

- **Model Name:** Sodastream 60L Quick Connect CO2 Cylinder
- **Item Model Number:** 8719128118734
- **Capacity:** 60 Liters (of sparkling water produced)
- **Item Volume:** 60 Liters
- **Color:** Pink
- **Material:** Metal (cylinder), Plastic (cap/connector)
- **Item Weight:** 2.64 pounds
- **Product Dimensions:** 1.1 x 9.7 x 6.5 inches
- **Manufacturer:** Sodastream

Warranty and Support

For information regarding the product warranty, please refer to the documentation provided with your Sodastream sparkling water maker or visit the official Sodastream website. For customer support, inquiries, or to locate an authorized exchange point for your CO2 cylinders, please contact Sodastream directly through their official channels.
