

Geox U Spherica Ec11

Geox U Spherica Ec11 Tissu OxfordHomme Instruction Manual

Model: U Spherica Ec11 | Brand: Geox

INTRODUCTION

This manual provides essential information for the proper use, care, and maintenance of your Geox U Spherica Ec11 Tissu OxfordHomme shoes. Please read these instructions carefully to ensure optimal performance and longevity of your footwear.

The Geox U Spherica Ec11 is designed for comfort and breathability, featuring innovative technology to keep your feet dry and comfortable throughout the day. This model combines a classic Oxford style with modern materials for everyday wear.

SETUP AND INITIAL USE

Upon receiving your Geox U Spherica Ec11 shoes, it is recommended to follow these steps for initial setup and comfortable wear:

- **Initial Fitting:** Try on both shoes to ensure a comfortable fit. Walk around to assess the feel and ensure there are no pressure points.
- **Lacing:** Adjust the laces to achieve a secure yet comfortable fit. Avoid overtightening, which can restrict circulation, or leaving them too loose, which can cause rubbing.
- **Break-in Period:** Like most new footwear, these shoes may require a short break-in period. Wear them for shorter durations initially, gradually increasing wear time as they conform to your feet.

OPERATING (WEARING) GUIDELINES

The Geox U Spherica Ec11 is designed for daily comfort and breathability. To maximize your experience:

- **Daily Wear:** These shoes are suitable for various daily activities, offering comfort and support.
- **Breathability:** The patented Geox technology ensures excellent breathability, helping to regulate foot temperature and reduce moisture build-up.
- **Surface Suitability:** While durable, avoid prolonged exposure to extremely rough or abrasive surfaces to preserve the sole and upper material.

MAINTENANCE AND CARE

Proper maintenance will extend the life and appearance of your Geox U Spherica Ec11 shoes. The exterior material is synthetic.

- **Cleaning the Upper:**

- For light dirt, wipe the synthetic upper with a soft, damp cloth.
- For more stubborn marks, use a mild soap solution diluted in water. Apply with a soft cloth, then wipe clean with a fresh damp cloth.
- Do not use harsh chemicals, abrasive cleaners, or brushes that could damage the material.
- **Drying:** Allow shoes to air dry naturally at room temperature, away from direct heat sources (e.g., radiators, direct sunlight), which can cause material degradation.
- **Sole Care:** Regularly check the sole for embedded debris and clean as necessary. The rubber sole is durable but can be damaged by sharp objects.
- **Storage:** When not in use, store shoes in a cool, dry place. Using shoe trees can help maintain their shape.
- **Odor Prevention:** Allow shoes to air out after each wear. If needed, use shoe deodorizers or sprinkle baking soda inside and let it sit overnight.

TROUBLESHOOTING

Here are some common issues and their potential solutions:

Issue	Possible Cause	Solution
Discomfort or Rubbing	New shoes, incorrect lacing, wrong size.	Allow for break-in period. Adjust lacing. Ensure correct size. Wear appropriate socks.
Foot Odor	Moisture build-up, lack of airing.	Utilize the shoe's breathability by airing them out after each wear. Use shoe deodorizers. Ensure socks are breathable.
Squeaking Sound	Moisture between sole layers, new sole material.	Ensure shoes are completely dry. A small amount of baby powder under the insole can sometimes help.
Excessive Wear on Sole	Abrasive surfaces, gait issues.	Avoid dragging feet. Limit wear on very rough surfaces. Consider professional assessment for gait if wear is uneven.
