7. TROUBLESHOOTING

Issue: Screw does not fit or tighten properly.

Solution: Ensure you are using the correct screw for the designated hole as indicated in the assembly instructions. If a hole appears to be defective, try a different screw from the spare parts. Do not force

screws, as this can strip the threading or damage the material. If the issue persists, contact customer support.

Issue: Desk feels unstable or wobbly.

Solution: Check that all screws are fully tightened. Ensure the desk is placed on a flat, level surface. If necessary, adjust the leveling feet (if present) on the bottom of the desk legs to compensate for uneven floors.
