

VIANIS V82013

VIANIS Triple Head Dusk to Dawn Outdoor Post Light

Model: V82013

Brand: VIANIS

IMPORTANT SAFETY INFORMATION

Please read and understand all instructions before beginning installation and use. Failure to follow these instructions may result in electric shock, fire, or other hazards that can cause property damage or personal injury.

- Always disconnect power at the main circuit breaker before installation, maintenance, or bulb replacement.
- Consult a qualified electrician if you are unsure about the installation process.
- Ensure all electrical connections are secure and comply with local codes and ordinances.
- Do not install near flammable materials.
- Handle glass components with care to prevent breakage and injury.

SETUP INSTRUCTIONS

Package Contents

Verify that all components are present before beginning installation. The package includes the lamp post assembly, three light fixtures with tempered ripple glass, a dusk-to-dawn sensor, and mounting hardware.

Detail Information

Figure 1: Product Components and Dimensions

Pre-installation

- This lamp post is designed for hard-wired electrical connections and is not solar-powered. Ensure a suitable 120V AC power source is available at the installation site.
- Prepare the ground masonry work in advance. The post base is designed to replace previous post bases with an existing bolt spacing of 7.68 inches apart.
- An additional template card is provided for quick positioning during installation.

Assembly and Installation

1. Carefully unpack all components and inspect for any damage.
2. Assemble the lamp post sections according to the provided diagrams, ensuring all connections are tight.

3. Mount the assembled lamp post securely to the prepared ground masonry using the provided mounting hardware. Ensure the post is level and stable.
4. Connect the electrical wiring from your power source to the lamp post's internal wiring. Follow all local electrical codes. This product is suitable for wet locations.
5. Attach the three light fixtures to the top of the post.
6. Install three E26 base bulbs (max 100W each, not included) into the sockets.
7. Restore power at the circuit breaker and test the light functionality.

OPERATING INSTRUCTIONS

Dusk to Dawn Functionality

The VIANIS V82013 lamp post features a built-in high-sensitivity photocell sensor for automatic operation:

- The light will automatically turn **OFF** during the daytime when the ambient brightness exceeds 100 lux.
- The light will automatically turn **ON** at night when the ambient brightness falls below 20 lux.

This automatic feature provides convenience and energy efficiency, eliminating the need for manual operation.

Bulb Replacement

The lamp post is designed for easy bulb replacement:

- The light fixtures have a bottom opening design.
- To replace a bulb, simply unscrew the old bulb and screw in a new E26 base bulb (max 100W). No tools are required for this process, which typically takes less than one minute per bulb.

MAINTENANCE

Cleaning

- To clean the lamp post and glass, ensure power is disconnected at the circuit breaker.
- Wipe surfaces with a soft, damp cloth. Avoid abrasive cleaners or solvents that could damage the finish or glass.
- The tempered ripple glass is durable, but care should still be taken during cleaning.

Weather Resistance

The VIANIS V82013 is constructed from aluminum with a black finish, designed to be waterproof, anti-rust, and weather-resistant. It can withstand various outdoor conditions including rain, sun, snow, and wind.
