COMPATIBILITY

This genuine OEM replacement soft velvet brushroll (Part Number 400FFJH380) is specifically designed for

Shark Rocket DuoClean Ultra-Light Corded vacuum models. To ensure proper fit and function, verify your vacuum's model number against the list below before purchasing or installing.

Compatible Models:

- HV380
- HV380W
- HV380C
- HV381
- HV381C
- HV384Q

INSTALLATION INSTRUCTIONS

Follow these steps to replace the soft velvet brushroll in your Shark Rocket DuoClean vacuum. Always prioritize safety by ensuring the vacuum is unplugged before handling any internal components.

1. **Power Off:** Ensure your Shark vacuum is unplugged from the power outlet to prevent accidental activation.
2. **Access Brushroll:** Refer to your vacuum's original user manual for specific instructions on how to access and remove the existing brushroll from the floor nozzle. This typically involves opening a latch or removing screws on the bottom of the nozzle.
3. **Remove Old Brushroll:** Carefully lift out the old brushroll. Observe its orientation to ensure correct placement of the new one.
4. **Insert New Brushroll:** Place the new Shark Genuine OEM Soft Velvet Brushroll (400FFJH380) into the brushroll housing. Ensure it is seated correctly and the ends align with the drive mechanism.
5. **Secure Cover:** Close and secure the brushroll cover or re-attach any screws removed in step 2.
6. **Test:** Plug in your vacuum and test its operation to confirm the new brushroll spins freely and functions correctly.

Always consult your specific Shark vacuum model's manual for detailed, model-specific instructions.

MAINTENANCE

Regular maintenance of your brushroll ensures optimal cleaning performance and extends the life of your vacuum.

- **Check for Debris:** Periodically inspect the brushroll for tangled hair, threads, or other debris. Use scissors to carefully cut away any obstructions.
- **Clean Brushroll:** If the brushroll appears dirty, gently wipe it with a damp cloth. Avoid using harsh chemicals or excessive water.
- **Inspect for Wear:** Over time, brushrolls can show signs of wear. If the velvet bristles are significantly worn down or damaged, replacement is recommended to maintain cleaning effectiveness.

TROUBLESHOOTING

If you encounter issues with your brushroll, consider the following common troubleshooting steps:

- **Brushroll Not Spinning:** Ensure the brushroll is correctly installed and free from obstructions. Check that the vacuum is properly assembled and powered on.

- **Reduced Cleaning Performance:** Inspect the brushroll for excessive wear or debris. Clean or replace the brushroll as needed. Also, check other vacuum components like filters and hoses for blockages.
- **Unusual Noise:** If the brushroll makes unusual noises, immediately turn off and unplug the vacuum. Inspect for foreign objects or damage to the brushroll or its housing.
