

Ulefone Ulefone Armor X6 Pro

Ulefone Armor X6 Pro Rugged Smartphone User Manual

Model: Ulefone Armor X6 Pro

INTRODUCTION

The Ulefone Armor X6 Pro is a rugged smartphone designed for durability and performance in challenging environments. It features an Android 12 operating system, a powerful processor, and enhanced protection against water, dust, and drops. This manual provides essential information for setting up, operating, maintaining, and troubleshooting your device.

Front and back view of the Ulefone Armor X6 Pro rugged smartphone, showcasing its robust design and orange accents.

SETUP

1. SIM Card and SD Card Installation

The Armor X6 Pro supports dual SIM cards and a microSD card for expandable storage. To install, locate the SIM card tray on the side of the device. Use the provided SIM ejector tool to open the tray. Carefully place your Nano-SIM cards and/or microSD card into the designated slots, ensuring correct orientation. Close the tray securely.

2. Initial Power On and Charging

Press and hold the Power button located on the right side of the phone until the Ulefone logo appears. For first-time use or if the battery is low, connect the device to the charger using the provided USB cable and power adapter. The phone supports 4000mAh battery capacity for extended use.

Moderate Grip, Proper Vision

5.0-inch High Definition Screen

Armor X6 Pro has 5.0" HD display to bring vivid and high color saturation, providing good hand grip feeling and convenient single hand operation. It adopts high rigidity glass with outstanding optical performance, making the screen scratch-proof, shatter-proof and presenting you stunning images.

Always Stand by Your Side

4000mAh Reliable Battery

Armor X6 Pro adopts robust 4000mAh Li-polymer battery with aerospace-grade cells, which is stable and enduring to use. Thanks to the power-efficient MediaTek MT6761 processor, the phone is rated to offer up to 430 hours* of standby time and up to 13 hours* of talk time. Just for one single charge, you can rely it for no matter calling, listening or playing a whole day.

OPERATING INSTRUCTIONS

1. Android 12 Operating System

The Armor X6 Pro runs on Android 12, offering an intuitive user interface and enhanced privacy features. Navigate through the system using gestures or the traditional navigation bar (configurable in settings). Access the app drawer by swiping up from the bottom of the home screen.

Capture Precious Moments 13MP Rear Camera

Housed with a 13MP rear camera on the back, you are having the treasure and beauty of the world at hand. The dual flash insist to present high quality images even in miserably low light. And it also comes with a front-facing 5MP camera for face unlock and beautiful, natural selfie.

Explore under the Water Underwater Camera

If the underwater camera mode is initiated, you are able to snap wonderful memories while swimming or other activities under the water. And it is easy to operate, you can finish all operations by a single hand.

Screenshots of the Ulefone Armor X6 Pro showcasing the Android 12 operating system interface.

2. Camera Features

The device is equipped with a 13MP rear camera and a 5MP front camera. The rear camera includes a dual flash for improved low-light photography. An **Underwater Camera Mode** is available, allowing you to capture photos and videos while submerged. To activate, use the custom key or select the mode from the camera application.

New Upgrade of Vision Interaction

Latest Android 12 OS

Visual representation of the Ulefone Armor X6 Pro's 13MP rear camera and 5MP front camera, along with an example of its underwater photography capability.

3. Custom Key and Gloves Mode

A customizable button is located on the left side of the phone. This **Custom Key** can be programmed for various functions with a single press, double press, or long press. Functions include Push-to-Talk (PTT), flashlight, screenshot, underwater camera, and launching specific applications. The **Gloves Mode** allows for touchscreen operation while wearing gloves, enhancing usability in cold or industrial environments.

4. Face Unlock

For convenient and secure unlocking, the Armor X6 Pro features Face Unlock using the 5MP front camera. To set up, navigate to Security settings and follow the on-screen instructions to register your face. This method provides quick access to your device.

5. Connectivity

The phone supports Dual 4G global networks, Wi-Fi, Bluetooth, NFC, and GPS. Ensure your SIM card is properly inserted for cellular connectivity. Wi-Fi and Bluetooth can be managed through the Quick Settings panel or the main Settings application. NFC allows for contactless payments and data transfer.

MAINTENANCE

1. Ruggedness and Protection

The Ulefone Armor X6 Pro is IP68/IP69K rated, meaning it is highly resistant to water, dust, and extreme temperatures. It can withstand immersion in 1.5m of water for 30 minutes and 1m of concrete for 24 hours. It is also MIL-STD-810G certified for drop resistance up to 1.5m. While highly durable, avoid intentional abuse and ensure all ports are securely sealed before exposure to liquids or dust.

The Ulefone Armor X6 Pro being subjected to water immersion, concrete immersion, and drop tests, highlighting its IP68/IP69K and MIL-STD-810G certifications.

2. Battery Care

The 4000mAh battery provides substantial usage time. To prolong battery life, avoid extreme temperatures, use the original charger, and avoid fully discharging the battery frequently. For optimal performance, charge the device

before the battery level drops too low.

3. Cleaning

To clean the device, wipe it with a soft, damp cloth. Avoid using harsh chemicals or abrasive materials, which could damage the screen or casing. Ensure all ports are dry before charging.

TROUBLESHOOTING

- **Device is slow or unresponsive:**

Close unnecessary background applications. Clear cache from apps. Restart the device. If issues persist, consider a factory reset (back up data first).

- **Network connectivity issues (4G/Wi-Fi):**

Ensure SIM card is correctly inserted and activated. Toggle Airplane Mode on and off. Restart the phone. Check Wi-Fi router and signal strength. Verify APN settings for cellular data.

- **Battery drains quickly:**

Reduce screen brightness. Disable unused features like GPS, Bluetooth, Wi-Fi when not needed. Limit background app refresh. Check battery usage in settings to identify power-hungry apps.

- **Camera not working:**

Ensure camera lens is clean. Restart the camera app or the phone. Check app permissions for the camera.
