User Manual

Winner Retro Manual Mechanical Skeleton Watch

PRODUCT OVERVIEW

This manual provides essential information for the operation and maintenance of your Winner Retro Manual Mechanical Skeleton Watch. This timepiece features a high-quality mechanical skeleton movement, Roman numeral dial with diamond accents, and a leather strap, offering a classic and sophisticated design.

SAFETY INFORMATION

- Keep the watch away from strong magnetic fields to prevent interference with the mechanical movement and ensure accurate timekeeping.
- Avoid exposing the watch to extreme temperatures or sudden temperature changes.
- While the watch is designed for daily wear, it is not intended for swimming or diving. Avoid direct contact with water beyond splashes.
- Handle the watch with care to prevent impacts or drops, which can damage the delicate internal components.

SETUP AND INITIAL OPERATION

Setting the Time

1. Locate the crown on the right side of the watch case.
2. Gently pull the crown outwards to the time-setting position. You may feel a slight click.
3. Rotate the crown clockwise or counter-clockwise to adjust the hour and minute hands to the correct time.
4. Once the time is set, push the crown back into its original position to secure the setting.

Manual Winding

This is a manual mechanical watch and requires daily winding to operate. It does not use a battery.

1. Ensure the crown is pushed fully in (not in the time-setting position).
2. Turn the crown clockwise approximately 15-20 times until you feel resistance. Do not overwind, as this can damage the movement.
3. It is recommended to wind the watch at the same time each day to maintain consistent power reserve.

OPERATING THE WATCH

Once properly wound, your mechanical watch will begin to operate. The transparent skeleton dial allows you to observe the intricate gears and springs in motion.

Luminous Features

The watch hands may feature luminous material for visibility in low-light conditions. Exposure to light will charge the luminous elements.

MAINTENANCE

- **Cleaning:** Wipe the watch case and crystal with a soft, dry cloth. For the leather strap, use a damp cloth and mild soap if necessary, then dry thoroughly.
- **Storage:** When not in use for extended periods, store the watch in a cool, dry place, away from direct sunlight and extreme temperatures.
- **Servicing:** Mechanical watches benefit from periodic professional servicing (typically every 3-5 years) to ensure optimal performance and longevity.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch stops or runs inaccurately	Insufficient winding; exposure to magnetic fields; impact damage.	Ensure daily manual winding (15-20 turns). Keep away from magnets. If issues persist after winding, professional inspection may be required.
Condensation under crystal	Exposure to sudden temperature changes or moisture.	Avoid extreme temperature fluctuations. If condensation persists, seek professional service to prevent internal damage.
Crown is stiff or difficult to turn	Dirt accumulation; internal mechanism issue.	Do not force the crown. Consult a professional watch repairer.

SPECIFICATIONS

Model Number: GMT1089-2K
Brand: FORSINING (also associated with T-WINNER)
Movement: Manual Mechanical

Case Material: Stainless Steel (implied by description)

Band Material: Leather (implied by description)

Clasp Type: Buckle

Product Dimensions: 9.44 x 0.78 x 0.51 inches

Item Weight: 2.08 ounces
