Installation Guide

Installing the iulock Smart Door Knob is a straightforward process, typically requiring only a screwdriver. Follow these steps for a successful setup:

1. **Prepare the Door:** Ensure your door meets the thickness requirements of 1-3/8" to 2-1/2". The adjustable latch supports backsets of 2-3/8" or 2-3/4".
2. **Install the Latch:** Insert the latch into the door edge and secure it with screws. Ensure it operates smoothly.
3. **Install the Outside Knob:** Feed the power cable from the outside knob through the door hole. Make sure the 'THIS SIDE UP' marking on the spindle is facing upwards. Attach the rosette rubber seal to protect your door.
4. **Install the Inside Knob:** Connect the power cable from the outside knob to the inside knob's battery compartment. Insert 4 AAA batteries (not included). Align the inside knob with the spindle and secure it.
5. **Install the Cover:** Place the interior cover over the inside knob and secure it.

Programming and Operating

The IU-30 Smart Door Knob offers various programming options for personalized access and control. Refer to the user manual for detailed instructions on each function.

Key Features:

- **Master Passcode:** Set a primary code for full control over the lock's settings.
- **User Passcodes:** Assign up to 50 unique 1-15 digit codes for family members or authorized personnel.
- **Passage Mode:** Activate this mode when you don't want the door to lock automatically, allowing free entry and exit.
- **Silent Mode:** Disable the keypad's sound feedback for quiet operation.
- **Auto-Lock:** Program the lock to automatically re-lock after a set period of time for added security.
- **Anti-Peeping User Code Protection:** Enter random digits before or after your actual code to prevent others from guessing it.

Doors

Maintenance

To ensure the longevity and optimal performance of your iulock Smart Door Knob, regular maintenance is recommended:

- **Battery Replacement:** The lock requires 4 AAA batteries. A low battery alarm will indicate when replacement is needed. For backup, a USB-C port is available.
- **Cleaning:** Wipe the keypad and knob surfaces with a soft, damp cloth. Avoid abrasive cleaners or solvents that could damage the finish or electronic components.
- **Rubber Grip:** The detachable silicone grip can be removed for cleaning or replacement if needed.

Troubleshooting

If you encounter any issues with your iulock Smart Door Knob, consider the following common solutions:

- **Keypad Unresponsive:** Check battery levels. If batteries are low, replace them or use the USB-C backup.
- **Code Not Working:** Ensure you are entering the correct master or user code. Verify that the lock is not in silent mode if you expect audible feedback.
- **Auto-Lock Malfunction:** Check the auto-lock settings in your programming. Ensure it is enabled and the delay time is set correctly.
- **Factory Reset:** If persistent issues occur, refer to your user manual for instructions on how to perform a factory reset. This will clear all user codes and restore default settings.
- **Physical Obstruction:** Ensure there are no physical obstructions preventing the latch from extending or retracting fully.
