Do not block air inlets or outlets. Keep children and pets away from the unit during operation.

SETUP & INSTALLATION

Your portable air conditioner comes with a snap-assembly window kit designed for windows 18" to 50" wide. The convenient drain-free design means condensed water will evaporate outside through the air exhaust hose, eliminating the need for manual drainage.

- Window Slider Kit (with extender pieces for larger windows)

Installation Steps:

2. Attach the exhaust adapters to both ends of the flexible condenser air hose.
3. Connect one end of the hose to the exhaust port on the back of the air conditioner unit.
4. Insert the other end of the hose into the opening of the assembled window slider kit.
5. Secure the window kit in your window opening, ensuring a tight seal to prevent air leakage.
