HOMIDEC 10-Tier Shoe Rack Instruction Manual

Model: haonan053002

INTRODUCTION

This instruction manual provides detailed guidance for the assembly, operation, and maintenance of your HOMIDEC 10-Tier Shoe Rack. Please read this manual thoroughly before assembly and use to ensure proper installation and safe operation. This modular storage solution is designed to help organize shoes, toys, handbags, and other items efficiently in various spaces.

SAFETY INFORMATION

- Keep all small parts and packaging materials away from children to prevent choking hazards.
- Ensure all connectors are securely fastened during assembly to maintain stability.
- Do not overload individual compartments or the entire unit. Refer to specifications for weight limits.
- Use the provided anti-toppling fittings to secure the unit to a wall, especially if placed in areas accessible to children or pets, to prevent accidental tipping.
- Avoid placing the unit in direct sunlight or near heat sources to prevent material degradation.
- Do not stand or climb on the unit.

PACKAGE CONTENTS

Before beginning assembly, verify that all components listed below are present and undamaged. If any parts are missing or damaged, please contact customer support.

Package Contents

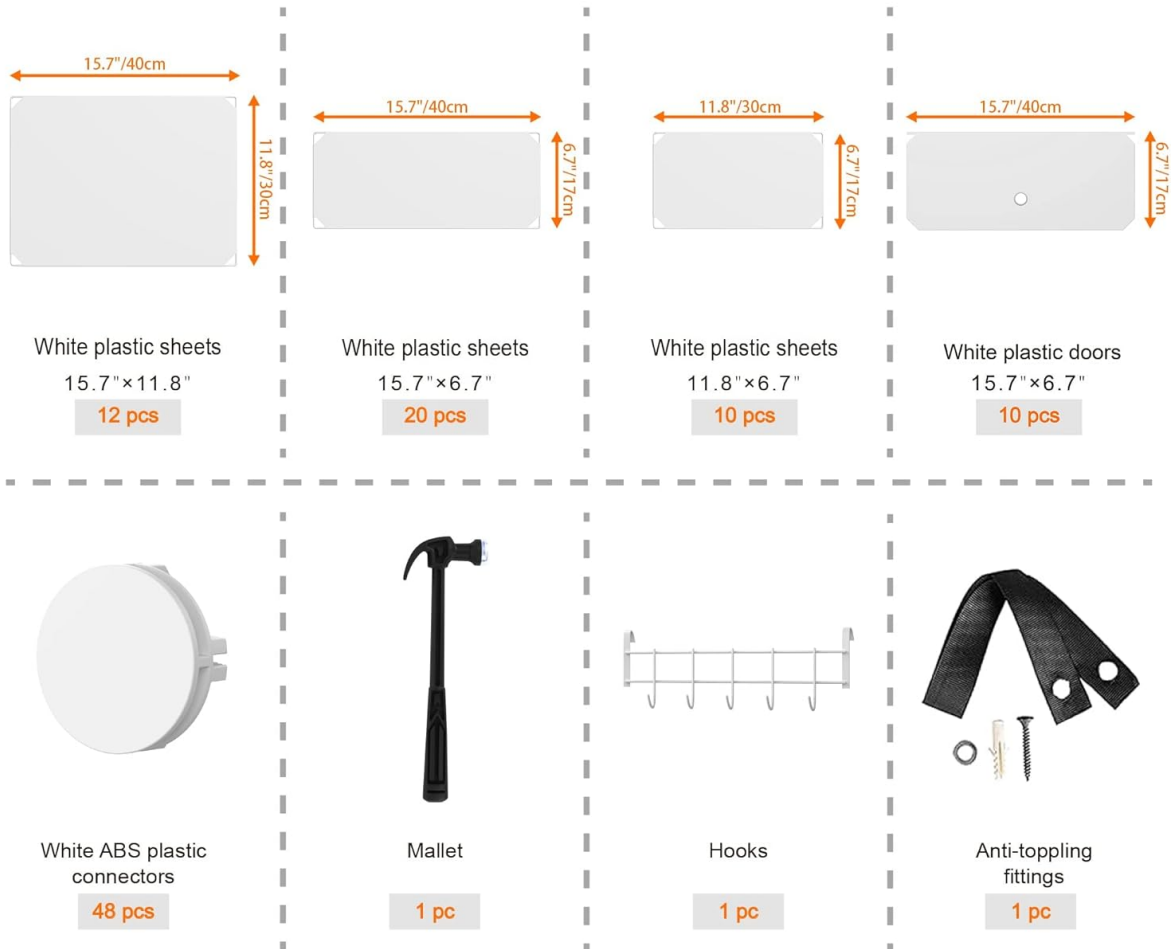

Image: Package Contents. This image displays the various parts included: white plastic sheets of different sizes, white plastic doors, white ABS plastic connectors, a mallet, hooks, and anti-toppling fittings.

Component List

Component	Description	Quantity
White plastic sheets (15.7" x 11.8")	Large rectangular panels for shelves/sides	12 pcs
White plastic sheets (15.7" x 6.7")	Medium rectangular panels for back/sides	20 pcs
White plastic sheets (11.8" x 6.7")	Small rectangular panels for back/sides	10 pcs
White plastic doors (15.7" x 6.7")	Transparent door panels	10 pcs
White ABS plastic connectors	Multi-angle connectors for panels	48 pcs
Mallet	Tool for securing connections	1 pc
Hooks	Accessory hooks	1 pc
Anti-toppling fittings	Wall anchor for stability	1 pc

SETUP AND ASSEMBLY INSTRUCTIONS

Assembly is required for this product. Follow these steps carefully for a stable and functional shoe rack. A mallet is provided to ensure secure connections.

Step 1: Plan Your Configuration

The 10-tier unit can be assembled as a single tall rack or divided into multiple smaller units (e.g., two 5-tier racks). Decide on your desired configuration before starting.

Image: Configuration Options and Dimensions. This image illustrates the dimensions of the 10-tier vertical configuration (175cm H x 40cm W x 30cm D) and a 2x5 horizontal configuration (84.5cm H x 80cm W x 30cm D), showing inner and outer sizes of the cubes.

Step 2: Assemble the Base

1. Take four ABS plastic connectors and four large plastic sheets (15.7" x 11.8").
2. Connect the sheets to form the bottom square of the first cube using the connectors. Ensure the slots on the connectors face outwards.
3. Use the mallet to gently tap the edges of the panels into the connectors until they are fully seated and secure. A satisfying click indicates a proper connection.

Step 3: Build Upwards

1. Attach four medium plastic sheets (15.7" x 6.7") vertically to the top of the base cube using new

connectors. These will form the sides and back of the first tier.

2. Place another large plastic sheet (15.7" x 11.8") on top of these vertical panels to create the next shelf. Secure with connectors and the mallet.
3. Repeat this process, adding vertical panels and then a shelf, for each subsequent tier until you reach the desired height (10 tiers for the full unit).
4. For the back of each cube, use the small plastic sheets (11.8" x 6.7") to connect to the rear connectors, providing stability and dust protection.

Step 4: Attach Doors

1. Once the main structure is complete, attach the transparent plastic doors (15.7" x 6.7") to the front of each cube. The doors have small hinges that fit into specific slots on the connectors.
2. Ensure the doors open and close smoothly.

Image: Key Features. This image highlights the transparent doors, ease of opening, dustproof and waterproof properties, and suitability for various shoe types.

Step 5: Install Anti-Toppling Fittings

For enhanced safety, especially with the tall 10-tier configuration, use the provided anti-toppling fittings to secure the unit to a wall. Follow the instructions included with the fittings for proper installation.

Image: Assembled Unit in Use. This image shows the fully assembled 10-tier shoe rack placed in an entryway, demonstrating its vertical storage capacity.

OPERATING INSTRUCTIONS

- **Storage:** Open the transparent doors to place shoes, small bags, folded clothes, or other items into each compartment. The spacious cubes can accommodate various shoe types, including boots when laid flat.
- **Access:** The transparent doors allow for quick identification of contents. Simply pull the small handle to open and push to close.
- **Customization:** The modular design allows you to reconfigure the unit into different shapes or sizes as needed, such as two 5-tier racks or a wider, shorter unit.
- **Hooks:** Utilize the included hooks on the side of the unit for hanging items like keys, small bags, or umbrellas.

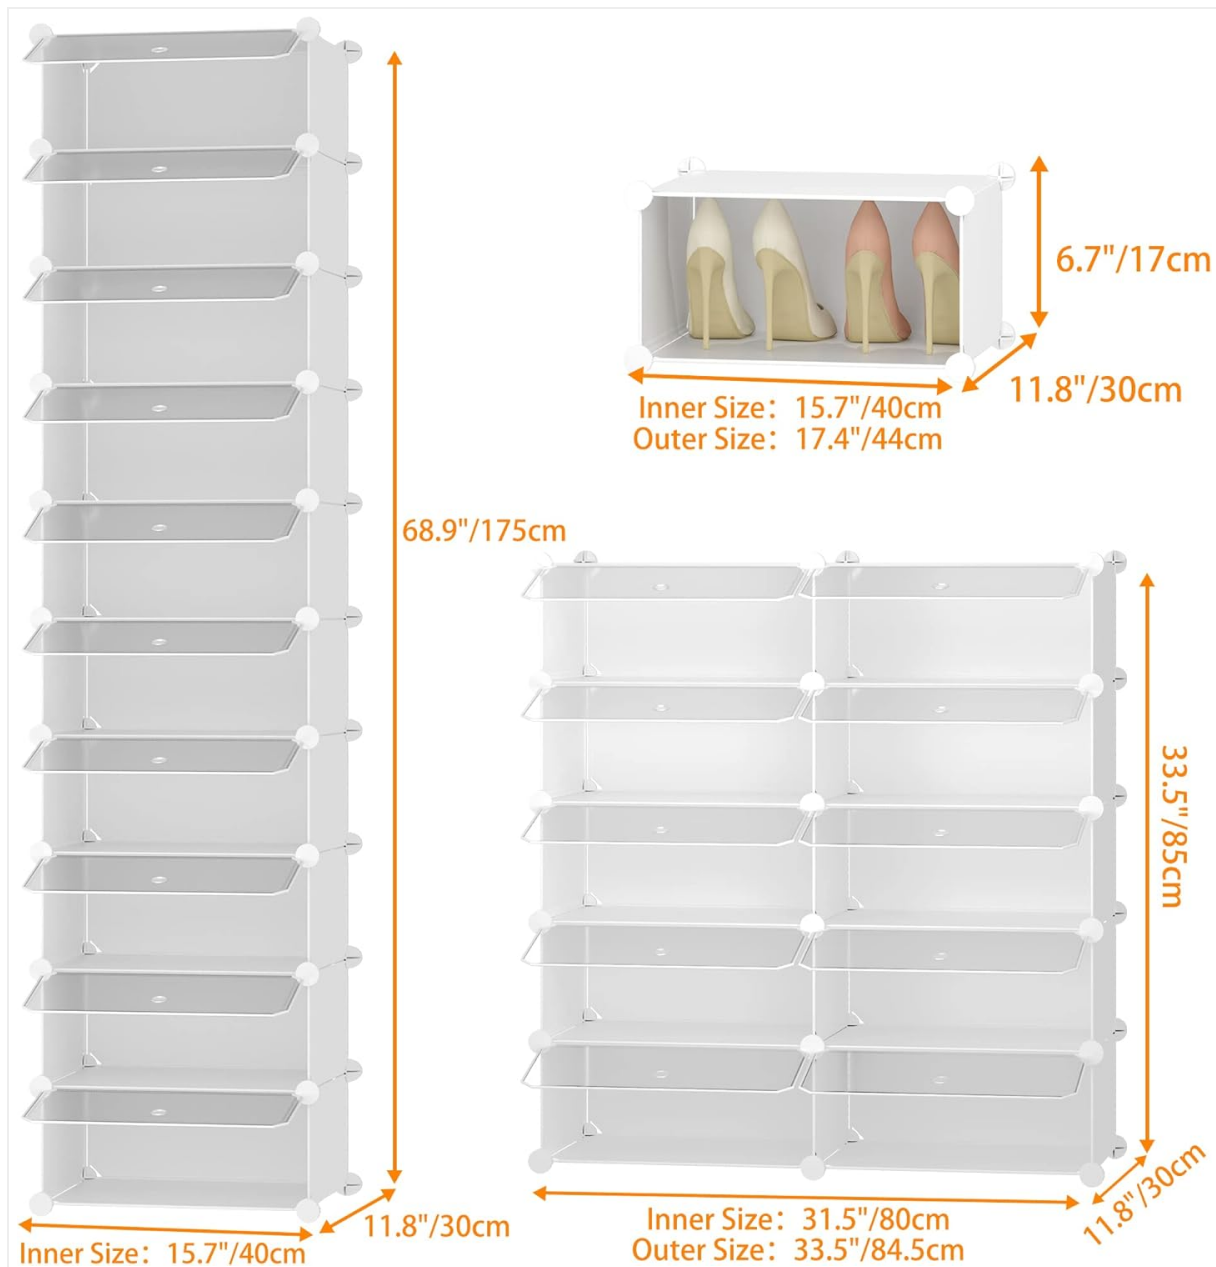

Image: Multifunctionality. This image demonstrates the versatility of the storage unit, showing it used for shoes, clothes, towels, hats, dolls, and bags.

MAINTENANCE

- **Cleaning:** The plastic panels are waterproof and washable. Wipe down the surfaces with a damp cloth and mild detergent as needed. Avoid abrasive cleaners or harsh chemicals.
- **Dust Protection:** The transparent doors and enclosed design help protect contents from dust. Regularly wipe the doors and panels to maintain clarity and cleanliness.
- **Inspection:** Periodically check all connections to ensure they remain secure. If any connections feel loose, gently tap them with the mallet to re-secure.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Unit feels unstable or wobbly.	Connections are not fully secured.	Use the provided mallet to firmly tap all panel edges into the connectors until they are fully seated. Ensure the unit is on a flat, level surface. Install anti-toppling fittings.
Doors do not close properly.	Door hinges not correctly aligned or panels are misaligned.	Check that the door hinges are properly inserted into the connector slots. Ensure the surrounding panels are securely connected and form a square.
Difficulty inserting panels into connectors.	Incorrect orientation of panels or connectors.	Ensure the panel edges are aligned with the connector slots. Apply firm, even pressure, and use the mallet if necessary. Do not force.
Missing parts.	Packaging error.	Review the "Package Contents" section. Contact customer support with your purchase details for assistance.

SPECIFICATIONS

- **Model:** haonan053002
- **Brand:** HOMIDEC
- **Type:** 10-Tier Shoe Rack / Modular Storage Organizer
- **Overall Dimensions (Assembled 10-tier unit):** Approximately 175 cm (H) x 40 cm (W) x 30 cm (D) / 68.9" (H) x 15.7" (W) x 11.8" (D)
- **Single Cube Inner Dimensions:** Approximately 40 cm (W) x 30 cm (D) x 17 cm (H) / 15.7" (W) x 11.8" (D) x 6.7" (H)
- **Material:** PP Plastic Panels, Metal Frame, ABS Connectors
- **Color:** Transparent (panels) / White (connectors)
- **Assembly Required:** Yes (Buyer Assembly)
- **Installation Type:** Freestanding (Wall anchor fittings included for stability)
- **Item Weight:** Approximately 7.17 kg (15.8 lbs)
- **Features:** Dustproof, Waterproof, Washable, Customizable, Transparent Doors

WARRANTY AND SUPPORT

For warranty information, product support, or to inquire about replacement parts, please refer to your purchase documentation or contact the retailer where the product was purchased. Keep your proof of purchase for any warranty claims.
