SETUP GUIDE

Follow these steps to set up your Imou Security Camera:

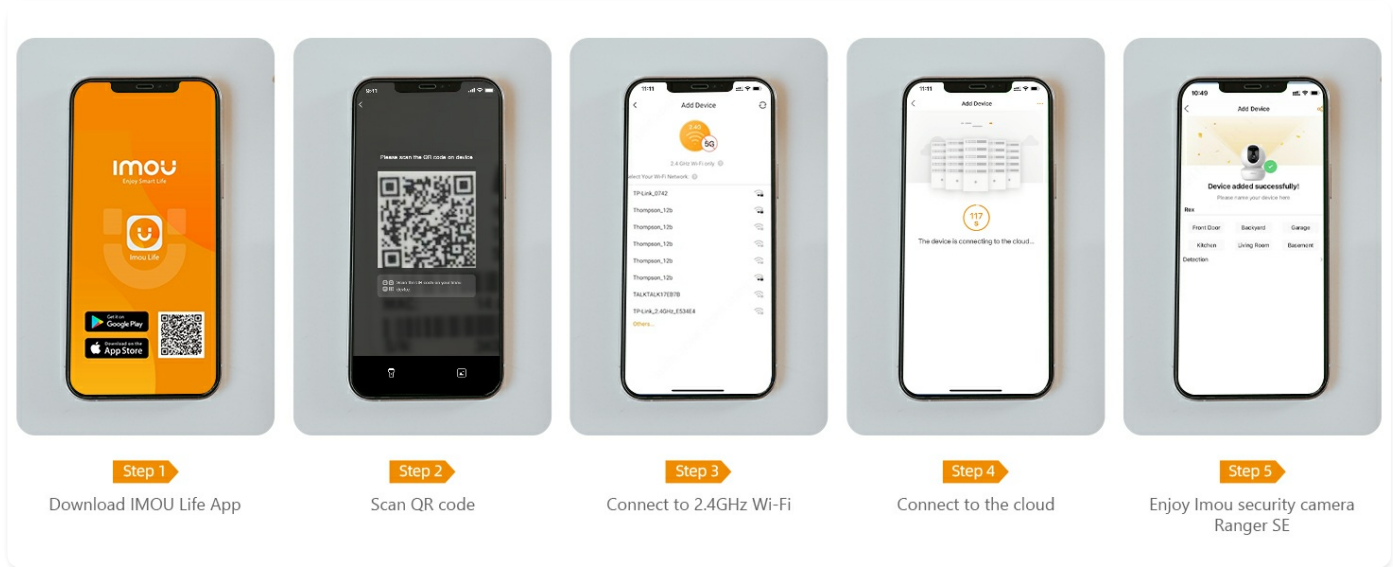

Image: A visual guide showing five steps for camera setup: downloading the Imou Life App, scanning a QR code, connecting to 2.4GHz Wi-Fi, connecting to the cloud, and enjoying the security camera.

1. Step 1: Download Imou Life App

Search for "Imou Life" on the App Store (iOS) or Google Play Store (Android) and download the application. Create an account if you don't already have one.

2. Step 2: Power On and Scan QR Code

Plug in your Imou camera using the provided power adapter and cable. Once the indicator light flashes, open the Imou Life App and tap the "+" icon to add a new device. Scan the QR code located on the camera or its packaging.

3. Step 3: Connect to 2.4GHz Wi-Fi

Follow the in-app instructions to connect your camera to your home Wi-Fi network. **Important: The camera only supports 2.4GHz Wi-Fi networks. 5GHz Wi-Fi is not compatible.** Ensure your smartphone is connected to a 2.4GHz network during setup.

4. Step 4: Connect to the Cloud

After successful Wi-Fi connection, the camera will automatically attempt to connect to the Imou Cloud service. This enables remote viewing and cloud storage options.

5. Step 5: Enjoy Your Security Camera

Once connected, you can access your camera's live feed, adjust settings, and receive alerts through the Imou Life App.

OPERATING INSTRUCTIONS

Clear Picture Day and Night

The 1080P sensor and advanced IR algorithms provide clear video and images in various lighting conditions. The night vision mode activates automatically in low light, ensuring continuous monitoring.

Image: A cat jumping from a chair, with an orange box indicating smart tracking, and motion blur showing the cat's movement across the frame.

Sound Detection & 2-Way Audio

Receive instant alerts for unusual sounds like a baby crying. The built-in speaker and microphone allow for real-time two-way communication.

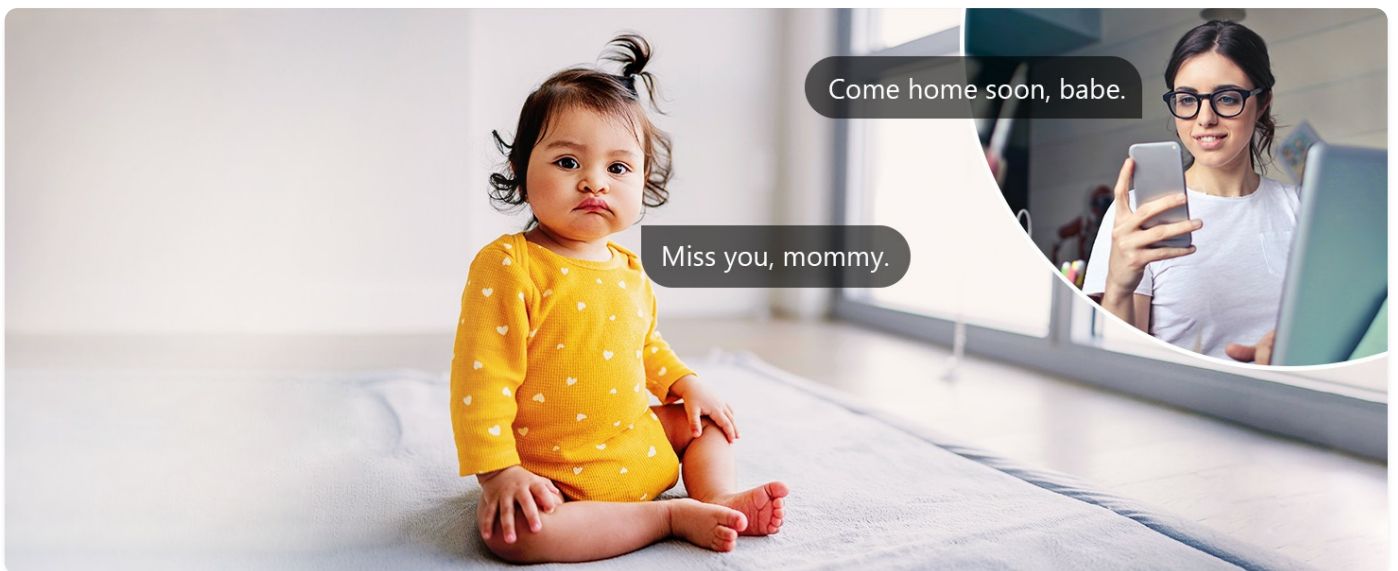

Image: A baby sitting on the floor with a speech bubble saying "Miss you, mommy.", and a woman on a phone with a speech bubble saying "Come home soon, babe.", illustrating two-way audio communication.

Image: A smartphone displaying an Imou Life app notification for "Sound Detection" in a "Study room", with a cat in the background having knocked over a potted plant, demonstrating sound detection alerts.

Privacy Mode

Activate Privacy Mode via the Imou Life App to physically rotate the camera lens inward, ensuring complete privacy when needed. You can also schedule privacy mode activation.

Flexible Storage Solutions

Your video recordings can be stored securely using multiple options:

- **Micro SD Card:** Supports up to 256GB for local storage.
- **NVR (Network Video Recorder):** Compatible with NVR systems for continuous recording.
- **Imou Cloud Service:** Offers secure cloud storage with a 30-day free trial for new devices.

MAINTENANCE

To ensure optimal performance and longevity of your Imou camera:

- Keep the camera lens clean using a soft, dry cloth. Avoid abrasive cleaners.
- Ensure the camera is placed in a stable location, away from direct sunlight, heat sources, and excessive moisture.
- Regularly check for firmware updates through the Imou Life App to benefit from new features and security enhancements.
- If using a Micro SD card, periodically check its health and consider formatting it through the app to maintain recording efficiency.

TROUBLESHOOTING

Common issues and their solutions:

Issue	Possible Cause / Solution
Camera won't connect to Wi-Fi.	Ensure your Wi-Fi network is 2.4GHz. The camera is not compatible with 5GHz networks. Check Wi-Fi password and signal strength. Try moving the camera closer to the router.
Video feed times out or disconnects frequently.	This can occur due to network instability or app settings. Ensure a stable 2.4GHz Wi-Fi connection. Check if the Imou Life app is running in the background and has necessary permissions. Some devices may have power-saving features that close the app or video stream.
No sound or distorted audio.	Check microphone and speaker settings in the Imou Life App. Ensure there are no obstructions blocking the microphone or speaker on the camera.
Motion detection alerts are too frequent or not working.	Adjust the motion detection sensitivity settings in the Imou Life App. Define specific detection zones to reduce unwanted alerts. Ensure the camera's view is clear of moving objects like curtains or tree branches if placed near a window.
Night vision is unclear.	Ensure the camera lens is clean. Check for any reflective surfaces close to the camera that might interfere with the infrared light.
