## TROUBLESHOOTING

If you encounter issues with your chair, refer to the following common problems and solutions:

- **Chair Squeaks:**

Check all bolted connections and tighten them. A small amount of silicone lubricant can be applied to moving parts if the squeaking persists, avoiding contact with fabric.

- **Chair Feels Unstable:**

Ensure all screws are securely tightened, especially those connecting the backrest, seat, and base. Verify that the gas lift is fully inserted into the base.

- **Gas Lift Not Adjusting:**

Ensure the lever is fully engaged. If the issue persists, the gas lift cylinder may need replacement. Contact customer support.

- **Casters Not Rolling Smoothly:**

Remove any hair, dust, or debris wrapped around the caster wheels. Clean the wheel axles if necessary.
