PRODUCT OVERVIEW AND FEATURES

The CAMMHD F6 Body Camera is engineered with advanced features to provide reliable and high-quality recording in

demanding environments.

Key Features:

- **4K Video & 170° Wide Angle:** Equipped with a Sony 335 sensor, supporting 4K HD video recording and a 170° super wide-angle lens for comprehensive coverage.
- **Ultra Night Vision:** Built-in 6 infrared lamps enable clear footage recording up to 15m/50ft in dark conditions.
- **Extended Battery Life:** A 3400mAh rechargeable battery provides 12-14 hours of continuous recording (1080P, night vision off).
- **H.265 Video Encoding:** Efficient video compression saves 50% storage space and reduces file transfer time by 30% compared to H.264.
- **IP68 Waterproof & 3M Drop Resistant:** Designed for durability, ensuring functionality in various weather conditions and resistance to drops up to 3 meters.
- **Integrated 64GB Memory:** Comes with a built-in 64GB memory card, eliminating the need for additional purchases.

SETUP

1. Charging the Device

Before initial use, fully charge your CAMMHD F6 Body Camera. Connect the provided USB cable to the camera's charging interface (located on the side, covered by a protective flap) and the other end to the charger. Plug the charger into a power outlet. The charging indicator light will show the charging status. A full charge typically takes up to 4 hours.

2. Attaching Clips

The CAMMHD F6 comes with both a long clip and a short clip for versatile mounting options. To attach a clip, align the

clip's base with the slot on the back of the camera and slide it in until it clicks securely into place. The clips can be rotated 360° for optimal positioning. To remove a clip, press the release tab and slide the clip off.

Video tutorial on how to attach and detach the long and short clips to the F6 Body Camera, demonstrating the 360° rotation feature for flexible mounting.

3. Powering On/Off

To power on the device, press and hold the Power button (usually marked with a power symbol) on the side of the camera until the screen illuminates. To power off, press and hold the Power button again until the device shuts down. Ensure all recordings are saved before powering off.

OPERATING INSTRUCTIONS

1. Video Recording

To start video recording, press the Video key (usually marked with a camera icon). The recording indicator light will illuminate, and a recording timer will appear on the screen. Press the Video key again to stop recording. Videos are saved automatically to the internal 64GB memory.

2. Audio Recording

To initiate audio-only recording, press the Audio key (marked with a microphone icon). The device will begin recording audio. Press the Audio key again to stop. Audio files are saved separately from video files.

3. Taking Photos

To capture a still image, press the Photo key (marked with a camera icon, distinct from the video key). The camera will take a high-resolution photo. Photos can be taken while recording video without interrupting the video stream.

4. Night Vision Mode

The F6 Body Camera features automatic and manual night vision modes. To manually activate or deactivate night vision, press the Night Vision key (marked with a star icon). The camera will switch between color and infrared (black and white) recording based on ambient light conditions or your manual selection.

5. Red and Blue Warning Lights

For signaling or alert purposes, the camera is equipped with red and blue warning lights. Press the dedicated Red and Blue Warning Lights key (marked with a speaker icon) to activate them. Press again to deactivate. Note that activating these lights may temporarily interrupt ongoing recordings on some firmware versions.

6. Reviewing Footage

You can review recorded videos and photos directly on the camera's screen. Navigate through files using the menu buttons. For detailed playback and management, connect the camera to a computer.

7. Data Transfer

To transfer files to a computer, connect the camera using the provided USB cable. The camera will appear as a removable storage device. You can then copy and paste files as needed. The device supports USB2.0 connectivity.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the camera body and lens. Avoid abrasive materials or harsh chemicals.
- **Storage:** Store the camera in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** To prolong battery life, avoid fully discharging the battery frequently. Charge the device regularly, even if not in use, to maintain battery health.
- **Firmware Updates:** Check the official CAMMHD website periodically for any available firmware updates to ensure optimal performance and new features.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Device won't turn off.	Software glitch or temporary freeze.	Locate the reset hole (often a small pinhole next to the charging port) and gently press it with a paperclip for a few seconds to force a restart.
Cannot download recorded video.	Incorrect USB connection mode, driver issues, or corrupted files.	Ensure the camera is connected in data transfer mode. Try a different USB port or cable. If files are corrupted, they may not be recoverable. Ensure the camera is not in recording mode when connecting to PC.
Memory full.	Internal storage is at capacity.	Transfer important files to a computer and then delete unnecessary files from the camera to free up space. The camera supports loop recording, which overwrites older files when memory is full.
Poor night vision quality.	Infrared lamps obstructed or insufficient ambient light for optimal performance.	Ensure the infrared lamps are not covered. Verify that night vision mode is activated. For best results, ensure there is some minimal ambient light if possible.

SPECIFICATIONS

Feature	Detail
Model	F6
Video Capture Resolution	4K (2160 Pixels Effective)
Viewing Angle	170 Degrees
Night Vision Range	15 Meters
Battery Capacity	3400 mAh
Work Time	12-14 Hours (1080P, night vision off)
Video Encoding	H.264/H.265
Flash Memory Installed Size	64 GB
Water Resistance Level	IP68 Waterproof
Drop Resistance	Up to 3 Meters
Connectivity Protocol	USB2.0, Wi-Fi
