## 3. INSTALLATION GUIDE

---

Before beginning installation, ensure you have all necessary parts and tools. It is recommended to turn off the main water supply before starting.

### 3.1. Preparation

- Clear the area under your sink.
- Ensure sufficient space for the pull-down hose and its counterweight to move freely without obstruction.
- Gather basic tools: adjustable wrench, Phillips screwdriver, and a bucket for any residual water.

### 3.2. Faucet Assembly and Mounting

1. Insert the faucet body into the mounting hole on your sink or countertop.
2. From underneath the sink, secure the faucet using the provided mounting hardware (washer and mounting nut). Tighten firmly but do not overtighten.
3. Connect the hot and cold water supply lines to your existing water supply valves. Ensure connections are tight to prevent leaks.
4. Attach the pull-down hose to the quick-connect fitting on the faucet's underside.
5. Install the counterweight onto the pull-down hose at the recommended height (typically 6-8 inches from the bottom of the loop). This ensures the sprayer retracts smoothly.

- **Stream Mode:** Ideal for filling pots and general washing.
- **Spray Mode:** Provides a powerful, wide spray for rinsing dishes and cleaning the sink. Press the button on the sprayer head to switch between stream and spray.
