SETUP AND TRANSFORMATION

Your Hot Shot figure converts from robot to racecar mode in 21 steps. Please follow the visual instructions provided on the product packaging or refer to online guides for detailed step-by-step visuals. The general process involves:

1. **Initial Positioning:** Ensure the figure is in its default robot mode.
2. **Limb Manipulation:** Carefully fold and rotate the arms and legs according to the transformation sequence.
3. **Panel Alignment:** Align and secure the various body panels to form the vehicle's exterior. Pay attention to tabs and slots for a secure fit.
4. **Accessory Integration:** The double-barreled blaster can be attached in both modes.
5. **Visor Feature:** The figure's visor can be flipped down over the face in robot mode.

To transform back to robot mode, reverse the steps carefully. Avoid excessive force to prevent damage to the joints or plastic components.

OPERATING THE FIGURE

Robot Mode Features:

- **Articulation:** The figure boasts multiple points of articulation, allowing for a wide range of dynamic poses.
- **Double-Barreled Blaster:** The included blaster accessory can be securely held in the figure's hand.
- **Evo-Fusion Battle Feature:** For an enhanced battle mode, flip up the wheel axle to convert it into a shoulder-mounted bazooka accessory.

Racecar Mode Features:

- **Rolling Wheels:** The racecar mode features functional wheels, enabling smooth movement across surfaces.

- **Accessory Attachment:** The double-barreled blaster can also be attached to the figure in its racecar mode for integrated display.

MAINTENANCE

- **Cleaning:** To maintain the figure's appearance, gently wipe it with a soft, dry cloth. Avoid using harsh chemicals, abrasive cleaners, or excessive moisture, which can damage the paint or plastic.
- **Storage:** Store the figure in a cool, dry place away from direct sunlight and extreme temperatures. Prolonged exposure to heat or UV light can cause discoloration or material degradation.
- **Joint Care:** If any joints feel stiff, gently manipulate them to loosen. Do not force movement, as this may cause breakage.

TROUBLESHOOTING

- **Difficulty Transforming:** If you encounter difficulty during transformation, re-examine the instructions or packaging. Ensure all parts are correctly aligned and that you are not attempting to force a connection. Some transformations require precise alignment.
- **Loose or Detached Parts:** Occasionally, smaller parts or panels may become loose or detach during play or transformation. Many of these are designed to be reattached easily. Refer to the product's design for reassembly.
- **Cosmetic Imperfections:** Minor paint application inconsistencies or plastic molding marks can occur during manufacturing. For significant cosmetic defects, please contact the manufacturer's customer support.
