VIKICON KR017

VIKICON Beard Straightening Heat Brush User Manual

MODEL: KR017

INTRODUCTION

Thank you for choosing the VIKICON Beard Straightening Heat Brush, Model KR017. This 2-in-1 cordless tool is designed to efficiently straighten and style both your beard and hair, offering convenience and portability. Please read this manual thoroughly before use to ensure safe and optimal performance of your device.

SAFETY INFORMATION

To prevent injury or damage to the device, always adhere to the following safety guidelines:

- Ensure the beard or hair is completely dry before using the straightener. Applying heat to wet hair can cause damage.
- Do not place the appliance on any heat-sensitive surface while in operation or immediately after use.
- Keep the device out of reach of children.
- Do not immerse the device in water or any other liquid.
- Do not use the device if the power cord or plug is damaged.

- Unplug the device when not in use and before cleaning.
- Avoid contact with skin, especially around the face and neck, when the device is hot. The anti-scald design helps, but caution is still advised.

PRODUCT FEATURES

The VIKICON KR017 is equipped with several features designed for effective and safe styling:

- **2-in-1 Design:** Functions as both a beard and hair straightener.
- **Cordless Operation:** Powered by a 4000mAh battery for maximum portability and convenience.
- **Anti-Scalding Design:** Comb teeth are designed with an anti-scald coating to prevent direct contact of hot surfaces with skin and distribute heat evenly.
- **Multiple Heat Settings:** Three temperature settings (160°C/320°F, 180°C/356°F, 200°C/392°F) to suit various beard and hair textures.
- **Automatic Shut-off:** The device automatically turns off after 30 minutes of inactivity for safety.
- **Portable & Compact:** Mini size ideal for travel and on-the-go grooming.
- **Protective Cover:** Includes a cover for safe storage and transport.
- **Double Side Titanium Plates:** For efficient and consistent heat distribution.

PACKAGE CONTENTS

Upon opening your VIKICON KR017 package, you should find the following items:

- VIKICON Beard Straightening Heat Brush (Model KR017)
- Protective Cover
- USB Type-C Charging Cable (adapter not included)
- User Manual (this document)

SETUP AND CHARGING

Initial Charging

Before first use, fully charge your VIKICON Beard Straightener. This initial charge may take approximately 3 hours. For optimal charging, use a 5V/2A adapter (not included) with the provided USB Type-C cable.

1. Connect the USB Type-C cable to the charging port at the bottom of the device.
2. Plug the other end of the USB cable into a 5V/2A USB power adapter.
3. The battery level indicator lights will illuminate during charging. Once fully charged, the lights will indicate a full battery.

Figure 3: Device Controls and Charging Port.

CORDLESS DESIGN

1 full charge of 2 hours
provides 60 mins of
brushing with no
performance loss

Figure 4: Cordless Design and Battery Performance.

A full charge typically provides up to 30 minutes of continuous straightening power. Note that the device cannot be used while it is charging.

OPERATING INSTRUCTIONS

Preparing for Use

- Ensure your beard or hair is completely dry before styling.
- Comb through your beard or hair to remove any tangles.

Powering On and Setting Temperature

1. Press and hold the On/Off button (refer to Figure 3) for a few seconds to turn on the device. The working indicator light will illuminate.
2. Press the On/Off button repeatedly to cycle through the temperature settings:
 - 160°C / 320°F (Lowest setting, suitable for fine or short hair/beard)

- 180°C / 356°F (Medium setting, suitable for normal hair/beard)
- 200°C / 392°F (Highest setting, suitable for thick or coarse hair/beard)

3. Allow 2-3 minutes for the device to reach the selected temperature. The indicator light for the selected temperature will stop flashing when ready.

Styling Your Beard/Hair

1. Take a small section of your beard or hair.
2. Slowly brush through the section from root to tip, ensuring the comb teeth glide smoothly.
3. Repeat as necessary until desired straightness or style is achieved.
4. For best results, brush downwards and outwards to straighten, or inwards to add volume.

Figure 5: Before and After Beard Straightening.

Powering Off

Press and hold the On/Off button for a few seconds to turn off the device. The device will also automatically shut off after 30 minutes of inactivity.

MAINTENANCE AND CARE

Proper maintenance ensures the longevity and performance of your VIKICON Beard Straightener:

- **Cleaning:** Ensure the device is turned off and completely cool before cleaning. Use a soft, damp cloth to wipe down the comb teeth and body. Do not use abrasive cleaners or immerse the device in water.
- **Storage:** Store the device in a cool, dry place, away from direct sunlight and moisture. Always place the protective cover over the comb teeth when storing or traveling.
- **Battery Care:** To maintain battery health, avoid completely draining the battery frequently. Recharge the device when the battery indicator shows low power.

TROUBLESHOOTING

If you encounter issues with your VIKICON Beard Straightener, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Device does not turn on.	Low battery or no charge.	Charge the device fully using a 5V/2A adapter.
Device not heating up or not hot enough.	Low battery; incorrect temperature setting; device not fully heated.	Ensure device is fully charged. Select a higher temperature setting. Allow 2-3 minutes for the device to reach the set temperature.
Battery life is shorter than expected.	Frequent use on highest setting; aging battery.	Battery life is approximately 30 minutes of continuous use. Ensure full charge before each use.
Device turns off unexpectedly.	Automatic shut-off activated; low battery.	The device has a 30-minute auto-shutoff feature. Recharge the device if battery is low.

If the problem persists after trying these solutions, please contact VIKICON customer support for further assistance.
