7. TROUBLESHOOTING

If you encounter any issues with your dining set, refer to the following common problems and solutions.

Problem	Possible Cause	Solution
The table/chair wobbles.	Uneven floor or loose fasteners.	Adjust the screw feet on the bottom of the legs until stable. Check and tighten all assembly screws.
Parts do not align during assembly.	Screws overtightened prematurely or incorrect orientation of parts.	Loosen all screws slightly, realign parts, then tighten gradually. Ensure parts are oriented as shown in the assembly diagram.
Scratches on surfaces.	Rough handling or abrasive cleaning.	Use soft cloths for cleaning. Avoid dragging objects across surfaces. Consider using furniture polish or repair kits for minor scratches.
