FRANKE All-In Universal Kitchen Sink Accessory System

Model: AIUS200 | Brand: Franke

INTRODUCTION

The Franke All-In Universal Kitchen Sink Accessory System, model AIUS200, is a modular solution designed to optimize kitchen workflow and organization. This system transforms your sink area into a versatile workstation, facilitating various food preparation tasks with ease and efficiency. It aims to save time and counter space by integrating essential accessories directly into the sink environment.

PRODUCT COMPONENTS

The AIUS200 system includes the following components:

- Telescopic Bridge
- Small Colander
- Prep Bowl with Bamboo Lid
- Bamboo Chopping Board
- Foldable Silicone Mat

SETUP AND INSTALLATION

The Franke All-In system is designed for universal fit and easy integration into most kitchen sinks up to 21 ¼ inches wide. No complex installation is required.

1. **Telescopic Bridge Placement:** Extend the telescopic bridge to fit securely across the width of your sink. Ensure both ends rest firmly on the sink rims. This bridge serves as the primary support for other accessories.
2. **Accessory Integration:** Place the small colander, prep bowl, or bamboo chopping board onto the stainless steel rails of the telescopic bridge. The accessories are designed to sit securely within the bridge, allowing for hands-free use over the sink.
3. **Countertop Use:** The bamboo chopping board and foldable silicone mat can also be used independently on the countertop as needed.

OPERATING INSTRUCTIONS

Utilize the various components of the All-In system to streamline your kitchen tasks:

- **Telescopic Bridge:** Use as a stable base for the colander, prep bowl, or chopping board, allowing them to be positioned directly over the sink for convenient food preparation and waste management.
- **Small Colander:** Ideal for rinsing fruits, vegetables, or draining pasta. Place it on the telescopic bridge for efficient washing directly over the sink. The perforated design ensures proper drainage.
- **Prep Bowl with Bamboo Lid:** Use the prep bowl for collecting food scraps, holding prepped ingredients, or marinating. The bamboo lid can cover contents or serve as a small cutting surface.
- **Bamboo Chopping Board:** Provides a durable and hygienic surface for cutting and chopping. It can be placed on the telescopic bridge for cutting directly over the sink or used on the countertop. The integrated silicone feet provide stability.
- **Foldable Silicone Mat:** This versatile mat can be used as a dish drying rack, allowing water to drain directly into the sink. It also functions as a heat-resistant trivet for hot pots and pans (up to 340°F / 170°C) or as an additional workspace. Its foldable design allows for compact storage.

MAINTENANCE AND CARE

Proper care ensures the longevity and hygiene of your Franke All-In system components.

- **Polypropylene Components (Colander, Prep Bowl):** These items are dishwasher safe. For manual cleaning, wash with warm soapy water and a soft sponge. Rinse thoroughly and dry.
- **Stainless Steel Components (Telescopic Bridge):** Clean with warm soapy water and a soft cloth. Avoid abrasive cleaners or scouring pads that can scratch the surface. Dry immediately to prevent water spots.
- **Bamboo Components (Chopping Board, Lid):** Hand wash only. Do not soak bamboo in water or place in a dishwasher, as this can cause warping or cracking. Wash with mild soap and warm water, rinse quickly, and dry immediately with a cloth. Periodically apply food-grade mineral oil to maintain the wood's condition and prevent drying.
- **Foldable Silicone Mat:** This mat is dishwasher safe. For manual cleaning, wash with warm soapy water. It is resistant to high temperatures, making it easy to sanitize.

TROUBLESHOOTING

If you encounter any issues with your Franke All-In Universal Kitchen Sink Accessory System, consider the following general troubleshooting steps:

- **Accessory Instability:** Ensure the telescopic bridge is fully extended and securely seated on both sink rims. Verify that accessories are correctly placed on the bridge's rails.
- **Water Drainage Issues (Colander/Mat):** Check for any blockages in the colander's perforations or ensure the silicone mat is positioned correctly to allow water to flow into the sink.

- **Stains or Odors:** Follow the recommended cleaning instructions for each material. For persistent odors in polypropylene, a baking soda paste can be used.
- **Damage:** Inspect components for any signs of damage. Discontinue use of any broken or severely damaged parts.
