WALMANN 4 Bike Stand

WALMANN 4-Bike Floor Bike Stand Instruction Manual

Model: 4 Bike Stand

Product Overview

The WALMANN 4-Bike Floor Bike Stand is designed to organize and store up to four bicycles efficiently. This stand helps declutter spaces like garages, sheds, or outdoor areas, keeping bikes upright and accessible. Its robust construction ensures stability for various bike types.

Image: The WALMANN 4-Bike Floor Bike Stand securely holding four bicycles in a garage environment.

Key features include:

- **Space-Saving Design:** Organizes up to four bikes, reducing clutter.
- **Durable Construction:** Made from high-quality alloy steel with a powder-coated black finish for longevity and rust resistance.
- **Versatile Compatibility:** Accommodates most standard road and mountain bikes with 22-28 inch wheels and a maximum tire width of 2.1 inches.
- **Floor Mount Option:** Can be mounted to the floor for enhanced stability.

Package Contents

Before assembly, ensure all components are present. The package should contain the following items:

Image: All components included in the WALMANN 4-Bike Floor Bike Stand package: U-shaped bike holders, square base tubes, assembly bolts, and floor mounting anchors.

- U-shaped bike holders (8 pieces)
- Square base tubes (4 pieces)
- Assembly bolts and nuts (quantity sufficient for assembly)
- Floor mounting screws/anchors (optional for securing to floor)
- Instruction manual

Specifications

Feature	Detail
Material	Alloy Steel
Color	Black

Product Dimensions (L x W x H)	39.5" x 9" x 10"
Number of Bikes	4
Wheel Compatibility	22-28 inch wheels
Max. Tire Width	2.1 inches
Mounting Type	Floor Mount (optional)
Assembly Required	Yes
Item Weight	11.33 pounds

Setup and Assembly

Assembly of the WALMANN 4-Bike Floor Bike Stand is straightforward. Follow these steps:

1. **Connect Base Tubes:** Slide the square base tubes together to form the main frame of the stand. Ensure they are securely interlocked.
2. **Attach U-shaped Holders:** Position the U-shaped bike holders onto the base tubes. Align the holes on the holders with the holes on the base tubes.
3. **Secure with Bolts:** Insert the provided bolts through the aligned holes and fasten them with nuts. Tighten all connections firmly but do not overtighten.
4. **Optional Floor Mounting:** For maximum stability, especially in high-traffic areas or uneven surfaces, the stand can be mounted to the floor. Use the provided floor mounting screws/anchors. Mark the desired locations on the floor, drill pilot holes if necessary, and secure the stand.

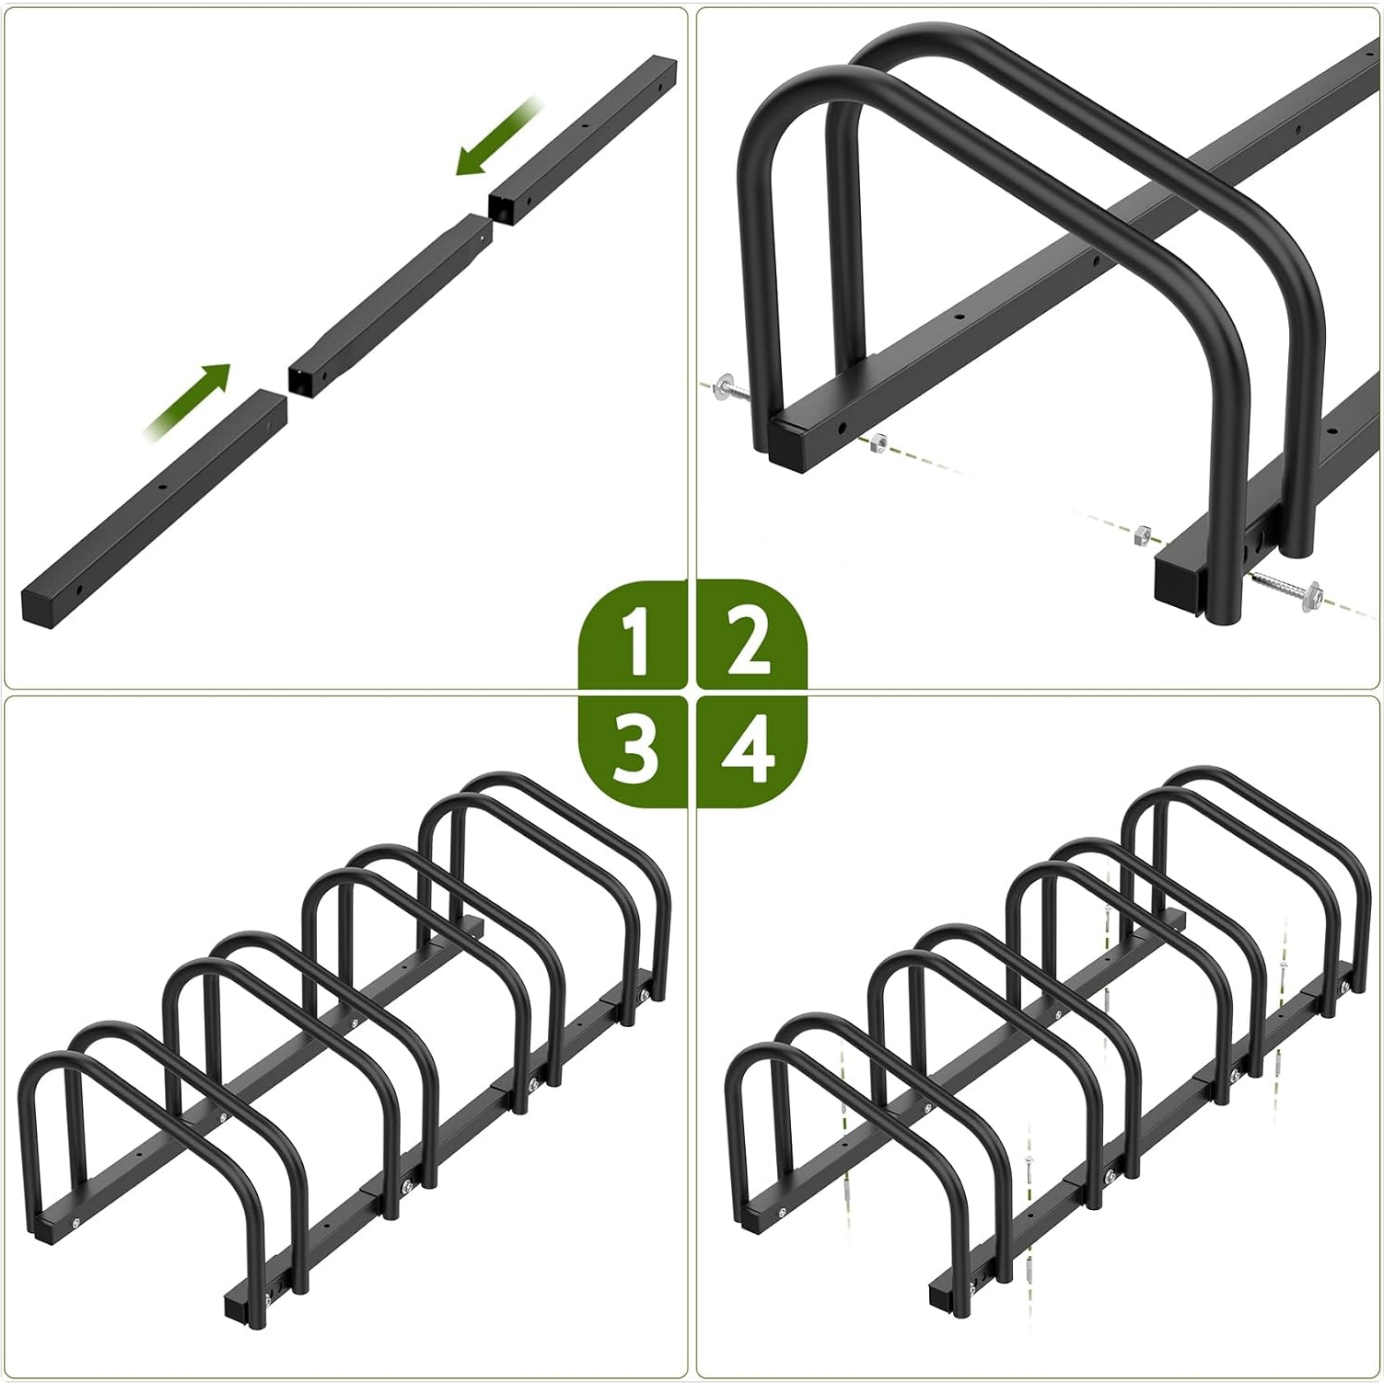

Image: Visual guide demonstrating the four assembly steps: connecting the square base tubes, attaching the U-shaped bike holders, securing them with bolts, and the final assembled stand.

Important: Ensure all bolts are tightened before placing bikes in the stand. If mounting to the floor, verify the floor material

can safely accommodate the anchors.

Operating Instructions

Using the WALMANN 4-Bike Floor Bike Stand is simple:

1. **Position the Stand:** Place the assembled bike stand on a flat, stable surface. If not floor-mounted, ensure it is in a location where it will not easily slide or tip.
2. **Insert Bikes:** Roll the bicycle's wheel into one of the U-shaped slots. The stand is designed to hold bikes by either the front or rear wheel. For optimal space utilization, bikes can be placed facing the same direction or alternating directions.
3. **Check Stability:** After placing each bike, gently push and pull to ensure it is stable and securely held by the stand.

Image: Example of bicycles correctly positioned within the WALMANN 4-Bike Floor Bike Stand, showcasing how wheels fit into the individual slots.

Note on Disc Brakes: When inserting bikes with disc brakes, exercise caution to avoid the disc rotor or caliper contacting

the stand's metal frame, which could cause damage or misalignment. Position the wheel carefully to ensure clearance.

Maintenance

To ensure the longevity and continued performance of your WALMANN 4-Bike Floor Bike Stand, follow these simple maintenance guidelines:

- **Regular Cleaning:** Wipe down the stand periodically with a damp cloth to remove dust, dirt, and grime. Avoid abrasive cleaners that could damage the powder-coated finish.
- **Inspect Connections:** Annually, or more frequently if the stand is moved often, check all bolts and nuts to ensure they remain tight. Retighten if necessary.
- **Rust Prevention:** While the stand features a powder-coated finish for rust resistance, prolonged exposure to harsh outdoor elements can eventually lead to wear. If used outdoors, consider applying a rust-inhibiting spray to any exposed metal surfaces or scratches.
- **Check for Damage:** Periodically inspect the stand for any signs of damage, such as bent components or cracks. If significant damage is found, discontinue use and contact customer support.

Troubleshooting

Here are solutions to common issues you might encounter with your bike stand:

Issue: Stand wobbles or is unstable.
Solution:

- Ensure all assembly bolts are securely tightened.
- Verify the stand is placed on a flat, level surface.
- Consider using the optional floor mounting screws to anchor the stand to the ground for maximum stability.

Issue: Bikes do not fit or are difficult to insert.
Solution:

- Check the tire width of your bicycle. The stand accommodates tires up to 2.1 inches wide.
- Ensure your bike's wheel size is between 22-28 inches.
- For bikes with disc brakes, carefully guide the wheel into the slot to avoid contact with the brake components.

Issue: Stand slides on smooth surfaces.
Solution:

- If not floor-mounted, place rubber pads or a non-slip mat underneath the stand's base.
- Utilize the floor mounting option with the provided anchors for a permanent and secure installation.

Warranty and Customer Support
