OPERATING INSTRUCTIONS

Adjusting Mattress Height

To adjust the mattress support height, carefully remove the mattress. Locate the bolts securing the

mattress support to the crib frame. Unscrew these bolts, reposition the mattress support to one of the three available height settings, and re-secure the bolts tightly. Always ensure all four corners of the mattress support are at the same height and securely fastened before placing the mattress back into the crib.

Converting the Crib

Refer to the specific conversion instructions provided in your assembly guide for detailed steps on transforming the crib into a toddler bed, daybed, or full-size bed. Each conversion requires specific hardware and/or additional components (sold separately) as outlined in the guide.

MAINTENANCE

Proper care and maintenance will extend the life of your crib.

- **Cleaning:** Wipe clean with a soft, damp cloth. Avoid abrasive cleaners or strong chemicals that could damage the finish.
- **Inspections:** Regularly inspect all screws, bolts, and other hardware to ensure they are tight and secure. Tighten as needed.
- **Storage:** If disassembling for storage, keep all hardware in a sealed bag and store it with the crib components to prevent loss. Store in a dry, temperature-controlled environment.

TROUBLESHOOTING

If you encounter any issues with your crib, please refer to the following common solutions:

- **Crib feels wobbly:** Check all bolts and screws to ensure they are fully tightened. Over time, hardware can loosen.
