## 6. MAINTENANCE

To ensure the longevity and optimal performance of your ErGear Electric Standing Desk, follow these simple maintenance guidelines:

- **Regular Checks:** Periodically check all screws and fasteners to ensure they remain tight. Re-tighten if necessary.
- **Cable Management:** Utilize the integrated cable access holes and storage hooks to keep cables organized and prevent tangling, especially during height adjustments.
- **Motor Care:** The uprated motor is designed for long-term operation (tested 50,033 times). No special maintenance is required for the motor itself, but avoid overloading the desk beyond its 176 lbs capacity.

## 7. TROUBLESHOOTING

If you encounter any issues with your ErGear Electric Standing Desk, please refer to the following common troubleshooting tips:

- **Desk Not Moving:** Check if the power cable is securely plugged into both the desk and the wall outlet. Ensure there are no obstructions preventing the desk from moving freely.
- **Uneven Movement/Wobbling:** Verify that the desk is assembled correctly and all fasteners are tightened. Ensure the desk is placed on a flat, stable surface.
- **Control Panel Not Responding:** Unplug the desk from the power outlet for 30 seconds, then plug it back in. This can reset the control system.
- **Unusual Noises:** A slight humming sound during operation is normal. If you hear loud grinding or unusual noises, discontinue use and contact customer support. One user reported a loud coil whining noise from the power adapter; if this occurs, contact support for a replacement.
