- **ECA Series:** ECA12600, ECA13000, ECA13100, ECA13200, ECA13300, ECA13400, ECA14000, ECA14200, ECA14300, ECA14400
- **ESAM Series:** ESAM1000, ESAM1100, ESAM1200, ESAM2000, ESAM2200, ESAM2500, ESAM2502, ESAM2600, ESAM2800, ESAM2803, ESAM2900, ESAM3000, ESAM3100, ESAM3200, ESAM3240, ESAM3300, ESAM3350, ESAM3400, ESAM4000, ESAM4008, ESAM4200, ESAM4300,

This part replaces original part numbers: 7332165700, 7332180500, 7332183200, 7332198800. It is also known by numbers: 7313216621, AS13200153.

3. INSTALLATION GUIDE

Safety Precaution: Before attempting any installation or replacement, ensure your coffee machine is unplugged from the power outlet and has cooled down completely to prevent electric shock or burns.

1. **Preparation:** Clear a clean, well-lit workspace. You may need basic tools such as screwdrivers, pliers, and a container for any residual water.
2. **Access the Old Assembly:** Refer to your specific De'Longhi coffee machine's service manual for instructions on how to safely open the machine's casing and access the existing Panarello valve assembly. This typically involves removing screws and panels.
3. **Disconnect Components:** Carefully disconnect any electrical connectors, water hoses, or steam lines attached to the old Panarello valve assembly. Note their positions for reassembly.
4. **Remove Old Assembly:** Unfasten any mounting screws or clips securing the old assembly to the machine chassis. Gently remove the old valve assembly.
5. **Install New Assembly:** Position the new Panarello Valve Assembly in the same location as the old one. Secure it with the mounting screws or clips.
6. **Reconnect Components:** Reattach all electrical connectors, water hoses, and steam lines to the new assembly. Ensure all connections are secure and properly seated to prevent leaks.
7. **Close Machine Casing:** Carefully reassemble the machine's casing, ensuring all panels and screws are correctly replaced.
8. **Test:** Plug the coffee machine back into the power outlet. Perform a test run of the steam function to check for proper operation and any leaks before regular use.

4. OPERATING THE PANARELLO STEAM WAND

Once installed, the Panarello steam wand functions as per your De'Longhi coffee machine's original operating instructions for frothing milk.

1. **Fill Water Tank:** Ensure the machine's water tank is filled with fresh water.
2. **Prepare Milk:** Fill a frothing pitcher with cold milk (dairy or non-dairy) to just below the spout.
3. **Activate Steam Function:** Turn on your coffee machine and select the steam function. Wait for the machine to reach the appropriate steaming temperature, indicated by the machine's display or indicator light.
4. **Purge Steam Wand:** Before frothing, briefly open the steam valve to release any condensed water from the wand into a separate container. Close the valve.
5. **Froth Milk:** Immerse the tip of the Panarello wand just below the surface of the milk. Open the steam valve fully. Move the pitcher slightly up and down to incorporate air and create foam. Once the desired texture and temperature are reached, close the steam valve.
6. **Clean Wand:** Immediately after frothing, wipe the steam wand with a damp cloth to remove any milk residue. Briefly open the steam valve again to clear any milk from inside the wand.

5. CARE AND MAINTENANCE

Regular cleaning and maintenance will ensure the longevity and optimal performance of your Panarello Valve Assembly.

- **Daily Cleaning:** After each use, wipe the exterior of the steam wand with a clean, damp cloth. Purge the wand by briefly opening the steam valve to clear any milk residue from the nozzle.
- **Weekly Cleaning:** Remove the outer Panarello sleeve (if detachable) and wash it with warm, soapy water. Use a small brush or pipe cleaner to ensure the steam nozzle is clear of blockages. Rinse thoroughly and reattach.
- **Descaling:** Follow your coffee machine's descaling instructions regularly. Limescale buildup can affect steam performance.
- **Inspection:** Periodically inspect the assembly for any signs of wear, cracks, or leaks. Address any issues promptly.

6. TROUBLESHOOTING COMMON ISSUES

If you encounter problems with your Panarello Valve Assembly, refer to the following common issues and solutions:

- **No Steam or Weak Steam:**
 - Ensure the machine has reached steaming temperature.
 - Check if the steam nozzle is blocked by dried milk. Clean thoroughly.
 - Descale the machine if limescale buildup is suspected.
 - Verify water tank is filled.
- **Steam Wand Leaks:**
 - Ensure all connections (hoses, fittings) are tight and properly seated.
 - Inspect O-rings or gaskets for damage and replace if necessary.
- **Poor Milk Frothing:**
 - Ensure the milk is cold and fresh.
 - Verify the steam wand is clean and not blocked.
 - Adjust the position of the wand tip in the milk.

If these steps do not resolve the issue, consult your coffee machine's original user manual or contact a qualified technician.
