LifePlus FP401M-W

LifePlus Mini Wooden Space Tabletop Electric Fireplace Heater

Model: FP401M-W

INTRODUCTION

Thank you for choosing the LifePlus Mini Wooden Space Tabletop Electric Fireplace Heater. This compact and stylish heater is designed to provide warmth and a realistic flame effect, enhancing the ambiance of any small space. Please read this manual thoroughly before use to ensure safe and efficient operation.

Key features include a realistic 3D flame effect, two heating modes (1500W for powerful heating and a lower setting for gentle warmth), and a compact wooden design that complements various room decors. It is ideal for bedrooms, offices, living rooms, and other small areas.

IMPORTANT SAFETY INFORMATION

Your safety is paramount. Please adhere to the following safety guidelines:

- Always plug the heater directly into a wall outlet. Do not use with extension cords or power strips.
- Ensure the heater is placed on a firm, level surface.
- Keep combustible materials such as furniture, pillows, bedding, papers, clothes, and curtains at least 3 feet (0.9 m) from the front of the heater and away from the sides and rear.
- Do not operate any heater with a damaged cord or plug, or after the heater malfunctions or has been dropped or damaged in any manner.
- Do not insert or allow foreign objects to enter any ventilation or exhaust opening as this may cause an electric shock or fire, or damage the heater.
- Close supervision is necessary when any heater is used by or near children or individuals with reduced physical, sensory, or mental capabilities.

Overheating Protection

The heater is equipped with an automatic overheating safety protection system. If the heater overheats, it will automatically shut off to prevent potential fire incidents. If this occurs, unplug the unit, allow it to cool down, and then restart. Ensure there are no obstructions blocking the air intake or exhaust vents.

Image: Visual representation of the overheating protection feature, showing the heater automatically turning off when temperature rises too high.

Cool-Touch Exterior

The cabinet of the fireplace heater is designed to remain cool to the touch, minimizing the risk of scalding for children and pets during operation.

SETUP

This tabletop electric fireplace heater requires no complex installation. Simply place it on a stable, flat surface in your desired location, ensuring adequate clearance from walls and other objects for proper ventilation. Plug the power cord into a standard electrical outlet.

OPERATING INSTRUCTIONS

The LifePlus Electric Fireplace Heater features two simple switches located on the rear of the unit for easy control:

1. **Power Switch (Top Switch):** This switch controls the main power to the unit and activates the realistic flame effect. Flip this switch to the 'On' position to turn on the fireplace and enjoy the visual flame without heat.
2. **Heater Switch (Bottom Switch):** This switch activates the heating function. Once the Power Switch is in the 'On' position, you can flip the Heater Switch to the 'On' position to enable the heat output. The heater offers two power settings: 1500W for maximum heat and 750W for a lower, gentler warmth.

MAINTENANCE

To ensure the longevity and optimal performance of your fireplace heater, follow these simple maintenance steps:

- Always unplug the heater from the power outlet before cleaning.
- Use a soft, damp cloth to wipe the exterior surfaces. Do not use abrasive cleaners or solvents.
- Periodically check the air intake and exhaust vents for dust or debris and clean them gently with a soft brush or vacuum cleaner attachment.
- Store the heater in a cool, dry place when not in use.

TROUBLESHOOTING

If you encounter any issues with your LifePlus Electric Fireplace Heater, please refer to the following common troubleshooting tips:

- **Heater not turning on:** Ensure the power cord is securely plugged into a working electrical outlet. Check that both the Power Switch and Heater Switch (if heat is desired) are in the 'On' position.
- **No heat output:** Verify that the Heater Switch is turned on. If the unit recently overheated, the safety protection may have activated; unplug and allow it to cool before restarting.
- **Flame effect not working:** Ensure the Power Switch is in the 'On' position.
- **Unusual noises or odors:** Immediately turn off and unplug the heater. Contact customer support for assistance.

If the problem persists after trying these steps, please contact LifePlus customer service.

SPECIFICATIONS

- **Brand:** LifePlus
- **Model Number:** FP401M-W
- **Color:** Coffee
- **Form Factor:** Tabletop
- **Product Dimensions:** 6.5"D x 13.5"W x 9.8"H
- **Item Weight:** 11.66 pounds
- **Fuel Type:** Electric
- **Heating Coverage:** Up to 300 square feet
- **Number of Speeds:** 2 (Heating Modes)
