## SereneLife SLCATL360

# SereneLife 5.8 Gal Portable Camping Toilet SLCATL360 User Manual

Model: SLCATL360 | Brand: SereneLife

## INTRODUCTION

The SereneLife 5.8 Gallon Portable Camping Toilet (Model SLCATL360) provides a convenient and hygienic solution for personal sanitation in outdoor and remote settings. Designed for adults, this portable toilet offers comfort and ease of use, making it ideal for camping, RV trips, hiking, boating, and emergency situations. Its robust construction and thoughtful features ensure a reliable experience away from traditional facilities.

Key features include an adult-sized seat with a 330 lbs weight capacity, a double-sealed drain valve to prevent odors and leaks, and a detachable waste tank for easy emptying. The unit also comes with a carry bag and a hand sprayer for enhanced hygiene and portability.

## WHAT'S IN THE BOX

Verify that all components are present upon unboxing:

- Portable Toilet Unit
- Oxford Carrying Bag
- Toilet Hand Sprayer

## SETUP

- Separate the Tanks:** Ensure the top (freshwater) tank and bottom (waste) tank are separated. Locate the side latches and release them to detach the upper section.
- Fill the Freshwater Tank:** Unscrew the cap on the freshwater tank (upper section). Carefully pour clean water into the tank. If using, add appropriate toilet chemicals as per their instructions. Securely replace the cap.
- Attach Hand Sprayer (Optional):** If included, connect the hand sprayer hose to the designated port on the freshwater tank.
- Reassemble the Toilet:** Align the freshwater tank with the waste tank and secure the side latches until they click into place. Ensure a tight seal to prevent leaks.

# LARGE CAPACITY AND DETACHABLE DESIGN

Corrosion-Resistant

Easy to Clean

Durable Construction

## OPERATING INSTRUCTIONS

- Before Use:** Ensure the slide valve (located on the front of the waste tank) is in the closed position to create a seal.
- Flushing:** After use, pull the bellows-type pump handle (usually on the side of the freshwater tank) upwards and then press it down several times to flush water into the bowl. This action rinses the bowl and pushes waste into the holding tank.
- Open Slide Valve:** To allow waste to drop into the lower tank, pull the slide valve handle outwards.
- Close Slide Valve:** After flushing, push the slide valve handle back inwards to seal the waste tank and prevent odors.
- Monitor Waste Level:** The waste level indicator (often a small window on the front of the waste tank) will change

color (e.g., from green to red) as the tank fills, indicating when it's time to empty.

## CONVENIENT AND ERGONOMIC DESIGN

### MAINTENANCE

#### 1. Emptying the Waste Tank:

- Ensure the slide valve is closed.
- Release the side latches and separate the upper freshwater tank from the lower waste tank.
- Carry the waste tank to an approved disposal site (e.g., RV dump station, standard toilet).
- Rotate the pour spout outwards, unscrew the cap, and carefully empty the contents. The rotating spout helps ensure splash-free disposal.

- Rinse the waste tank thoroughly with water. You may add a small amount of cleaning solution or deodorizer.
- Securely replace the cap and return the pour spout to its stored position.

- Cleaning the Bowl:** Use the included hand sprayer (if applicable) or a soft brush with mild soap and water to clean the toilet bowl after each use. Avoid abrasive cleaners that could damage the plastic.
- General Cleaning:** Wipe down the exterior of the toilet with a damp cloth and mild detergent regularly.
- Storage:** When not in use for extended periods, ensure both tanks are completely empty and clean. Store the toilet in a cool, dry place, preferably in its Oxford carrying bag.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
<b>Odors or Leaks</b>	Slide valve not fully closed; worn or damaged seals.	Ensure slide valve is completely closed. Inspect and clean seals; replace if damaged.
<b>Ineffective Flushing</b>	Low water level in freshwater tank; pump mechanism issue.	Refill freshwater tank. Ensure pump is fully extended and depressed during flushing.
<b>Waste Level Indicator Not Working</b>	Sensor obstruction or malfunction.	Ensure the waste tank is clean and free of debris that might obstruct the sensor.
<b>Difficulty Separating Tanks</b>	Latches not fully released; debris in connection points.	Ensure both side latches are completely disengaged. Check for and remove any obstructions.

## SPECIFICATIONS

- Model Number:** SLCATL360
- Brand:** SereneLife
- Color:** White
- Product Dimensions:** 16.5"D x 14.6"W x 17.1"H
- Material:** High Density Polyethylene (HDPE)
- Item Weight:** 14.55 Pounds
- Installation Type:** Floor Mounted
- Shape:** Rectangular
- Seat Material Type:** Polypropylene
- UPC:** 842893153506
- Item Package Quantity:** 1
- Included Components:** Oxford Carrying Bag, Portable Toilet, Toilet Hand Sprayer
- Batteries Required:** No
- Manufacturer:** Sound Around

## SAFETY INFORMATION

- Always place the portable toilet on a flat, stable surface to prevent tipping.
- Do not overfill the freshwater or waste tanks.
- Use only recommended toilet chemicals and cleaning agents. Avoid harsh chemicals that may damage the unit or seals.
- Ensure the slide valve is closed when transporting the toilet to prevent spills and odors.
- Dispose of waste at approved facilities only.
- Keep out of reach of children when not in use.
