Assembly Instructions

Follow these steps to assemble your Bellemave Queen Canopy Bed Frame. It is recommended that two people assemble the bed frame for ease and safety, though one person can complete the assembly.

Step 1: Unpack and Identify Components

Step 4: Attach Canopy Posts

Securely attach the four vertical canopy posts to the corners of the bed frame. Then, connect the horizontal canopy bars to complete the canopy structure. Once all parts are in place, fully tighten all bolts and screws using the provided tool.

Usage and Operation

Mattress Placement

This Bellemave bed frame is designed to be used without a box spring. Simply place your Queen-sized mattress directly onto the assembled metal slats. The sturdy metal frame provides ample support.

Canopy Decoration

The canopy structure allows for various decorative options. You can drape bed curtains, lace fabric, or string lights to

personalize your sleeping space. Ensure any decorations are securely attached and do not interfere with the structural integrity or safety of the bed.

Care and Maintenance

- **Cleaning:** Wipe the metal frame with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the finish.
- **Inspection:** Periodically check all bolts and connections to ensure they remain tight. Re-tighten if necessary to maintain stability and prevent noise.
- **Moving:** When moving the bed frame, lift it rather than dragging it to prevent damage to the frame and your flooring.

Troubleshooting

Problem	Possible Cause	Solution
Bed frame shakes or is unstable	Loose bolts or connections. Uneven floor surface.	Ensure all bolts are fully tightened. Check if the bed is on a level surface; use shims if necessary.
Squeaking or noise from the frame	Loose connections. Slats not properly seated. Anti-noise plugs dislodged.	Re-tighten all bolts. Verify that all metal slats are correctly positioned and the anti-noise plastic plugs are securely in place.
Difficulty assembling parts	Parts misaligned. Incorrect orientation.	Refer to the assembly diagrams and ensure parts are oriented correctly. Do not force components; gently adjust alignment.
