Driver Installation

The MK422 keyboard is designed for immediate use. For most operating systems (Windows, Linux, Mac), the keyboard will be recognized automatically upon connection, and no specific driver installation is required. For advanced customization, please refer to the official Mars Gaming website for any available software.

Operating Instructions

Keyboard Layout

The MK422 keyboard features an AZERTY French layout, optimized for French language input and common European keyboard standards.

RGB Lighting Control

The MK422 is equipped with a Rainbow RGB LED lighting system offering 12 special effects for customization. Use the designated function keys (often Fn + specific keys like F-keys or arrow keys) to cycle through the lighting modes, adjust brightness, or change effect speed. Refer to the keyboard's keycap legends for specific combinations.

Multimedia Keys and Game Mode

Conveniently access multimedia functions and shortcuts located in the top row of keys. These typically include volume control, media playback, and other quick access features. Additionally, activate the game mode to prevent accidental interruptions during gameplay, such as disabling the Windows key.

Mechanical Switches

The MK422 keyboard is equipped with mechanical switches featuring anti-dust technology, ensuring complete accuracy and reliability while protecting against dust and dirt. Different switch types offer distinct tactile and auditory feedback:

- **Brown Dustproof Switch:** Offers an optimized keystroke with just the right pressure, combining precision and a tactile feel. It's a balanced option between red and blue switches.
- **Blue Dust Switch:** Features the characteristic
