5. INSTALLATION INSTRUCTIONS

The cabinet is designed for wall mounting. Proper installation is crucial for stability and safety.

1. **Choose a Location:** Select a suitable wall location, ensuring it can support the weight of the cabinet and its contents. Consider the cabinet's dimensions (7.09"D x 15.35"W x 22.83"H) when planning placement.
2. **Mark Mounting Points:** Hold the cabinet against the wall at the desired height and use a pencil to mark the locations for the mounting screws. Use a level to ensure the marks are straight.
3. **Drill Pilot Holes:** Drill pilot holes at the marked locations. If mounting into drywall, use appropriate wall anchors. If mounting into studs, drill smaller pilot holes suitable for the mounting screws.
4. **Secure the Cabinet:** Align the cabinet's mounting points with the drilled holes and securely fasten the cabinet to the wall using the provided screws and anchors. Ensure the cabinet is stable and does not wobble.
5. **Attach Open Shelf:** Once the main cabinet is securely mounted, attach the open shelf assembly to the bottom of the cabinet using the designated hardware.

7. MAINTENANCE

To ensure the longevity and appearance of your RUSTOWN medicine cabinet, follow these maintenance guidelines:

- **Cleaning:** Wipe the cabinet surfaces with a soft, damp cloth. Avoid using harsh chemicals, abrasive cleaners, or excessive moisture, as these can damage the wood grain finish.
- **Dusting:** Regularly dust the cabinet with a dry, soft cloth to prevent buildup.
- **Hardware Check:** Periodically inspect all screws, hinges, and mounting hardware. Tighten any loose fasteners to maintain stability.
- **Avoid Overloading:** Do not exceed the recommended weight limit of 15 pounds for the cabinet to prevent structural damage or detachment from the wall.

8. TROUBLESHOOTING

If you encounter any issues with your RUSTOWN medicine cabinet, consider the following common solutions:

- **Wobbly Cabinet:** Ensure all wall mounting screws are securely tightened. If mounted into drywall,

verify that the wall anchors are properly installed and holding firm.

- **Doors Not Aligning:** Check the hinge attachments. Loosen and readjust the hinges slightly to achieve proper door alignment, then re-tighten.
- **Loose Parts:** Inspect all assembly points and tighten any loose screws or connections.
- **Difficulty Adjusting Shelf:** Ensure the shelf pins are fully inserted into the desired slots and that the shelf is not obstructed.
