## NETVUE Birdfy

# NETVUE Birdfy Smart Bird Feeder with Camera (Model Birdfy) Instruction Manual

Model: Birdfy

## INTRODUCTION

---

The NETVUE Birdfy Smart Bird Feeder with Camera allows you to observe birds in your backyard directly from your smartphone. This device features a 1080P camera with motion detection, 2.4GHz Wi-Fi connectivity, and AI bird identification capabilities. It is designed for outdoor use with a weatherproof rating and a large capacity seed container.

## SETUP

### Package Contents

- Birdfy Feeder with Camera
- Mounting accessories (for pole, tree, or wall)
- Charging cable
- Cleaning brushes

### Initial Charging

Before first use, fully charge the feeder's internal battery. The feeder is equipped with two Lithium Ion batteries. A full charge can last up to 6 months, depending on usage and environmental factors. A solar panel can be purchased separately for continuous charging.

## App Installation and Wi-Fi Connection

1. Download the Birdfy app from your device's app store.
2. Create an account and follow the in-app instructions to add your Birdfy feeder.
3. Ensure your Wi-Fi network is 2.4GHz. The feeder does not support 5GHz Wi-Fi. A strong 2.4GHz signal is crucial for optimal performance.

## Mounting the Feeder

The Birdfy feeder can be mounted on a pole, tree, or wall using the included accessories. Choose a location that provides a clear view for the camera, is easily accessible for refilling and cleaning, and is safe for birds.

## Filling the Feeder

The feeder has a 1.5L (50oz) capacity. To fill, lift the snap-lock roof and pour birdseed into the container. Ensure the roof is securely closed after filling to protect the seed from weather and pests.

## OPERATING

### Live Stream and Video Capture

The Birdfy camera provides a 1080P high-definition live stream. When motion is detected, the camera automatically captures video and sends real-time alerts to your smartphone. You can view these captures and the live feed through the Birdfy app.

# Capture and Notify You of Every Bird

## New Visitor Alert!

You've got new visitors at your feeder.  
Check it out!

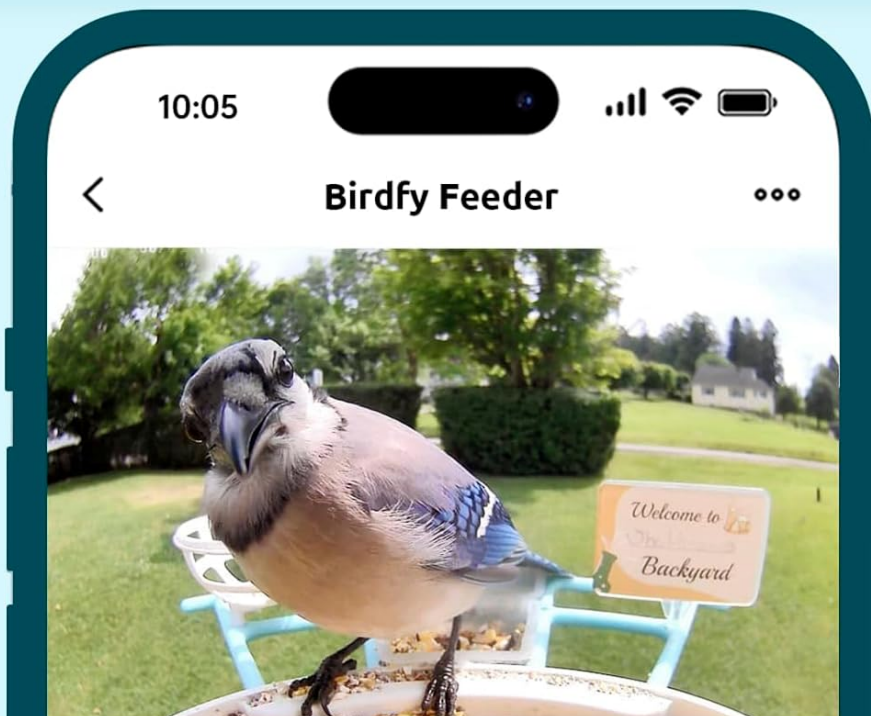

Image: A smartphone displaying a 'New Visitor Alert!' notification from the Birdfy app, with a blue jay visible on the feeder in the live camera view.

### Motion Detection and Night Vision

The integrated motion sensor detects activity at the feeder, triggering recordings and alerts. The camera also features color night vision, allowing for clear observation of birds and other wildlife even in low-light conditions.

# Seize Day and Night Surprises

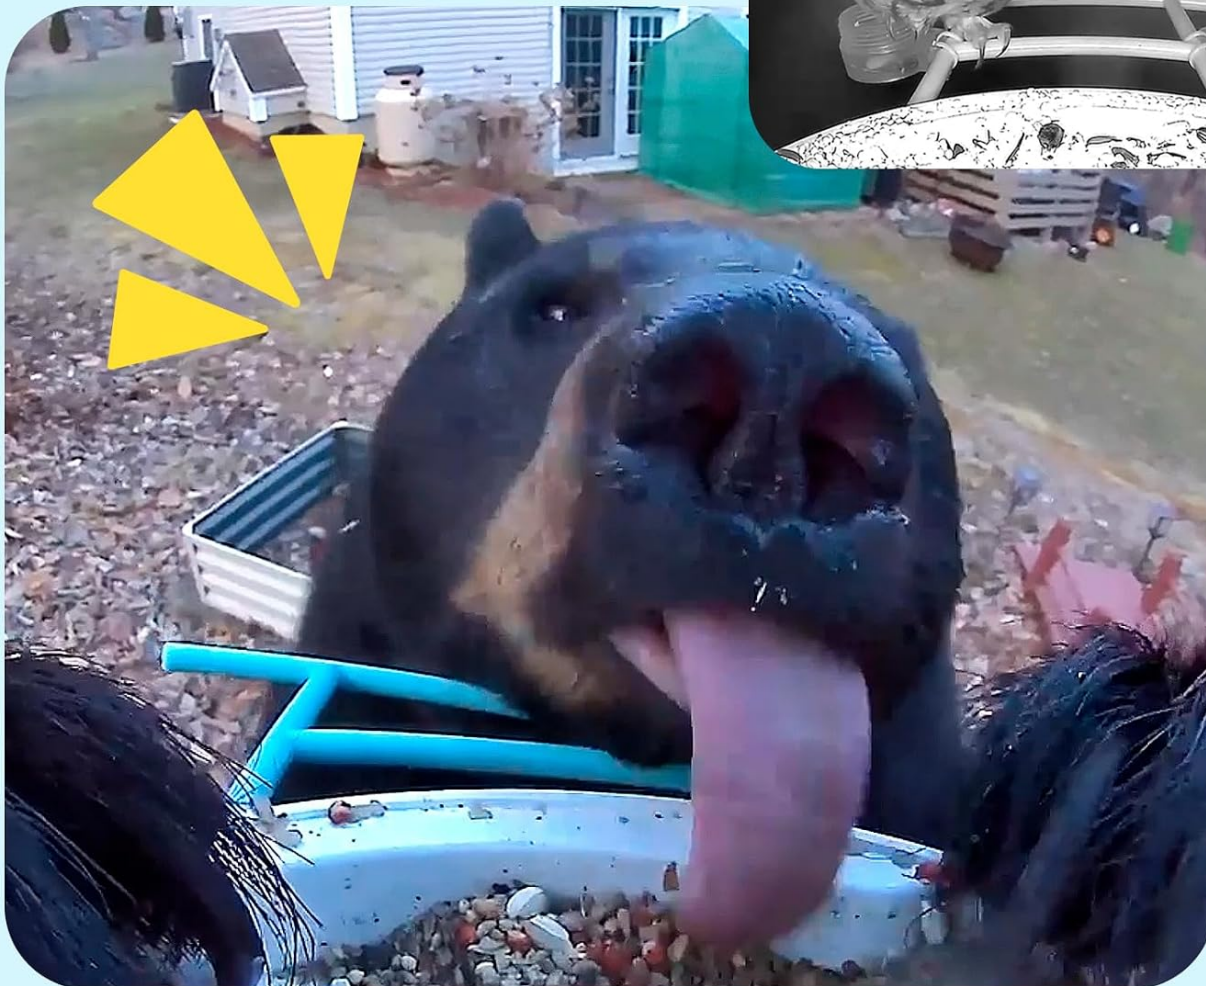

Image: A composite image showing a bear with its tongue out at the feeder during the day, and an owl's face captured by the camera at night, illustrating the feeder's ability to capture activity day and night.

## AI Bird Identification

The Birdfy app utilizes advanced AI to identify over 6,000 bird species that visit your feeder. This feature provides information about the identified birds and can track your backyard visitors. A 7-day free trial is typically available, with subscription options thereafter.

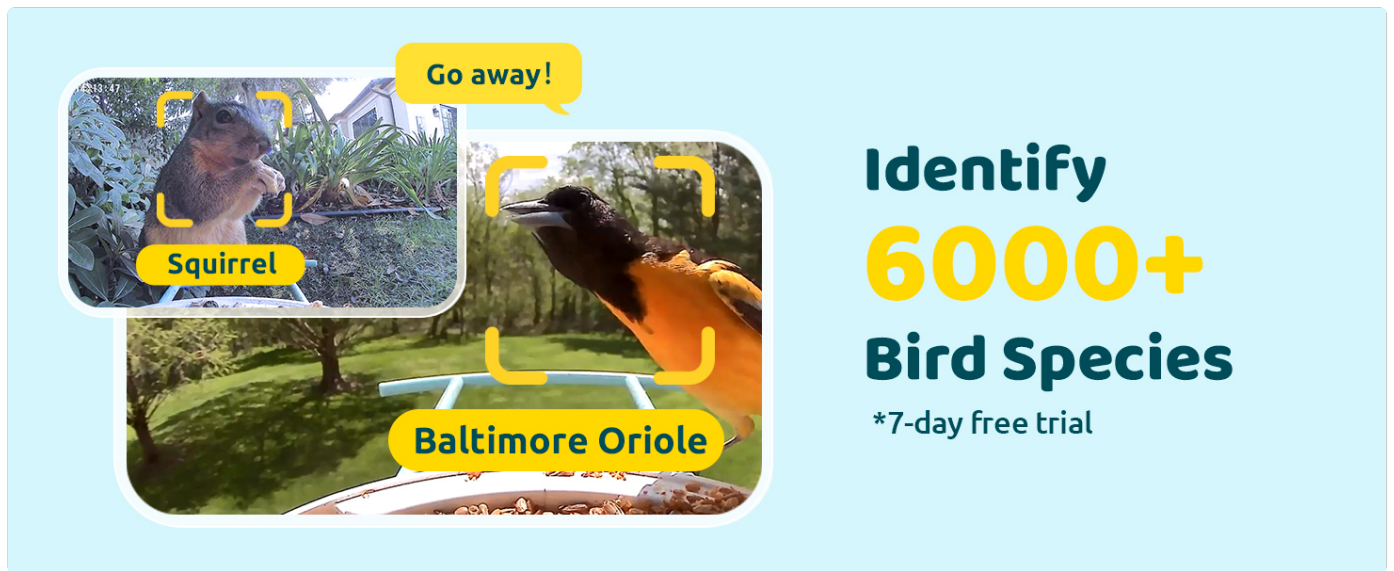

Image: A graphic illustrating the AI identification feature, showing a squirrel and a Baltimore Oriole detected and labeled by the system.

### App Features: Highlights and Recaps

The Birdfy app offers features like 'Birdfy Highlight' for daily best moments and 'Birdfy Recap' for monthly summaries of visitor activity, including identified species and visit counts.

Image: A screenshot of the Birdfy app interface displaying the 'Birdfy Recap' feature, summarizing monthly bird visits and identified species.

## Sharing Access

The Birdfy app allows you to share camera access with up to 20 other users, enabling friends and family to enjoy birdwatching from your feeder.

## MAINTENANCE

### Cleaning the Feeder

Regular cleaning is essential for bird health. The feeder is designed for easy cleaning. Remove the snap-lock roof and use the provided brushes to clean the seed container and camera area. Ensure drainage holes are clear to prevent moisture buildup.

# Easy to clean

Image: A three-panel image illustrating the cleaning process for the Birdfy feeder, showing how to detach the base, brush the interior, and clean around the camera.

## Refilling Birdseed

Monitor the seed level regularly. Refill the 1.5L capacity container as needed to ensure a continuous food supply for visiting birds.

## Battery Management

The feeder's battery life can extend up to 6 months. Monitor the battery level via the app and recharge as necessary. Consider a separate solar panel for reduced charging frequency.

## TROUBLESHOOTING

- **Wi-Fi Connectivity Issues:** Ensure your router is broadcasting a 2.4GHz signal. The feeder does not support 5GHz networks. Verify the feeder is within range of your Wi-Fi signal.
- **No Bird Detections:** Check the camera's field of view and ensure it's not obstructed. Verify motion detection

settings in the app.

- **Feeder Not Holding Charge:** Ensure the charging cable is properly connected. If using a solar panel, confirm it is clean and receiving adequate sunlight.
- **General Performance:** If issues persist, try restarting the feeder and your Wi-Fi router. Consult the Birdfy app's help section or the manufacturer's support resources for further assistance.

Important Information

Avoid using food that may harm birds. Secure the feeder to prevent access by larger animals. Place the feeder in a safe location to avoid potential hazards.

SPECIFICATIONS

| Feature            | Detail                                             |
