FOHERE 400W Centrifugal Juicer Instruction Manual

Model: B0B58FNRC8

1. INTRODUCTION

Thank you for choosing the FOHERE 400W Centrifugal Juicer. This appliance is designed to extract fresh juice from various fruits and vegetables efficiently. Its powerful 400W motor and precision stainless steel filter ensure high juice yield and nutrient retention. This manual provides essential information for safe operation, assembly, use, and maintenance of your juicer. Please read it thoroughly before first use and keep it for future reference.

Image 1.1: The FOHERE 400W Centrifugal Juicer, shown with fresh fruits and a glass of extracted juice.

2. SAFETY INSTRUCTIONS

To ensure safe operation and prevent damage to the appliance or injury, please observe the following safety precautions:

- Always ensure the juicer is correctly assembled and the safety locking arm is securely in place before operation. The appliance will not operate if not properly installed.
- Do not insert fingers or other objects into the feed chute while the juicer is operating. Use the food pusher provided.
- Unplug the juicer from the power outlet before cleaning, disassembling, or assembling parts.
- Do not immerse the motor base in water or any other liquid.
- Keep the appliance out of reach of children.
- Avoid overloading the juicer. Do not stuff too much fruit or vegetables at once.
- The motor is equipped with overheating protection. If the motor overheats, the juicer will automatically shut off. Allow it to cool down before resuming operation.
- Do not operate the juicer if the power cord or plug is damaged, or if the appliance malfunctions or has been dropped or damaged in any way.

- Ensure the appliance is placed on a stable, flat, and dry surface during use.

3. PRODUCT COMPONENTS

Familiarize yourself with the parts of your FOHERE Centrifugal Juicer:

1. Food Pusher
2. Transparent Lid with Feed Chute
3. Stainless Steel Filter Basket (with 12-row sawtooth blade)
4. Filter Holder / Juicer Cover
5. Motor Base with Control Dial
6. Safety Locking Arm
7. Pulp Collector (1.6L capacity)
8. Juice Jug
9. Cleaning Brush

Image 3.1: Exploded view showing the various components of the FOHERE Centrifugal Juicer.

4. SETUP INSTRUCTIONS

Before first use, wash all removable parts (food pusher, lid, filter basket, filter holder, pulp collector, juice jug) in warm soapy water, rinse thoroughly, and dry.

1. **Step 1: Place the Filter Holder.** Fit the filter holder onto the motor base.

Image 4.1: Securely place the filter holder onto the motor base.

2. **Step 2: Insert the Filter Basket.** Place the stainless steel filter basket firmly inside the filter holder. Ensure it is seated correctly.

Image 4.2: Insert the stainless steel filter basket into the filter holder.

3. **Step 3: Attach the Lid.** Position the transparent lid onto the filter holder, aligning the feed chute with the filter basket.

Image 4.3: Place the transparent lid on top of the assembled parts.

4. **Step 4: Secure the Safety Locking Arm.** Raise the safety locking arm and locate it into the two grooves on the lid. Ensure it clicks into place, indicating the juicer is securely locked. The juicer will not operate unless this arm is locked.

Image 4.4: Engage the safety locking arm to secure the lid.

5. **Step 5: Position Pulp Collector and Juice Jug.** Place the pulp collector under the pulp spout and the juice jug under the juice spout.

Image 4.5: Position the juice jug and pulp collector correctly.

5. OPERATING INSTRUCTIONS

Prepare your fruits and vegetables by washing them thoroughly. For larger items, cut them into pieces that fit the 65mm feed chute. Remove any hard seeds, pits, or thick peels (e.g., pineapple, melon, citrus).

- 1. Plug In:** Connect the power cord to a suitable electrical outlet.
- 2. Select Speed:** Turn the control dial to the desired speed setting:
 - **"1" (Low Speed):** Ideal for soft fruits and vegetables such as oranges, strawberries, kiwi, grapes, and tomatoes. (Approx. 12000-15000 RPM)
 - **"2" (High Speed):** Suitable for harder fruits and vegetables like apples, carrots, celery, beets, and ginger. (Approx. 15000-18000 RPM)
 - **"P" (Pulse):** Provides maximum speed instantly for quick bursts, useful for clearing blockages or cleaning residual food. Release the dial to return to the "0" (Off) position.

Image 5.1: The control dial for selecting speed settings.

3. **Start Juicing:** With the motor running, gradually feed the prepared fruits and vegetables into the feed chute using the food pusher. Apply gentle, even pressure. Do not force ingredients down.
4. **Finish Juicing:** Once all ingredients are juiced, turn the control dial to "0" (Off) and unplug the appliance.

Important: Do not operate the juicer continuously for more than 1 minute on hard ingredients or 2 minutes on soft ingredients. Allow a 2-minute rest period between cycles to prevent motor overheating.

6. CLEANING AND MAINTENANCE

Regular cleaning ensures optimal performance and extends the life of your juicer. Clean the appliance immediately after each use.

1. **Unplug:** Always unplug the juicer from the power outlet before cleaning.
2. **Disassemble:** Unlock the safety arm, remove the lid, filter basket, filter holder, pulp collector, and juice jug.
3. **Rinse and Wash:** Rinse all removable parts under running water. Use the included cleaning brush to thoroughly clean the stainless steel filter basket, as pulp can easily get trapped in the mesh. All removable parts are dishwasher safe (top rack recommended).

Image 6.1: Cleaning the filter basket with the brush and showing dishwasher-safe components.

4. **Clean Motor Base:** Wipe the motor base with a damp cloth. Never immerse the motor base in water.
5. **Dry and Store:** Ensure all parts are completely dry before reassembling or storing the juicer. Store in a cool, dry place.

7. TROUBLESHOOTING

If you encounter issues with your FOHERE Centrifugal Juicer, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Juicer does not turn on.	Not plugged in. Safety locking arm not engaged. Motor overheated.	Ensure power cord is securely plugged into an outlet. Check that the safety locking arm is fully engaged in the lid grooves. Unplug and allow the motor to cool down for at least 15-20 minutes.
Low juice yield or excessive pulp in juice.	Incorrect speed setting for ingredients. Filter basket is clogged. Ingredients fed too quickly.	Use speed "1" for soft produce, "2" for hard produce. Clean the filter basket thoroughly. Feed ingredients slowly and apply gentle pressure.
Juicer stops during operation.	Motor overheating protection activated. Overloading the juicer.	Unplug and allow to cool. Reduce juicing time per cycle. Reduce the amount of produce fed at one time.
Excessive vibration or noise.	Filter basket not properly seated. Uneven load of ingredients.	Disassemble and reassemble the filter basket, ensuring it is firmly in place. Feed ingredients evenly.

8. SPECIFICATIONS

Feature	Specification
Brand	FOHERE
Model	B0B58FNRC8
Power	400W
Voltage	220V
Speed Settings	3 (1, 2, P)
Feed Chute Diameter	65mm
Pulp Collector Capacity	1.6 Liters
Product Dimensions	31 x 30 x 19 cm
Item Weight	2.65 kg
Material	Stainless Steel, BPA-free components
Special Features	Upgraded 400W motor, extra-wide 65mm mouth, dishwasher safe removable components, 3-speed levels and pulse function.

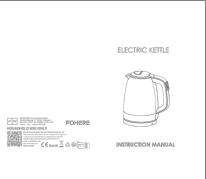

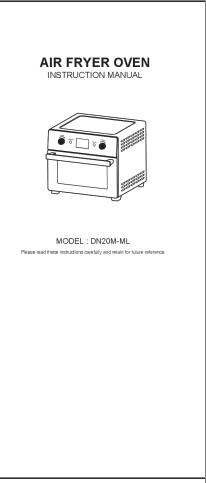

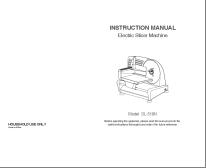

9. WARRANTY AND SUPPORT

FOHERE products are designed for quality and reliability. For specific warranty information, please refer to the warranty card included with your purchase or contact FOHERE customer support.

If you have any questions, require technical assistance, or need to report an issue, please contact our customer support team through the retailer where you purchased the product or visit the official FOHERE website for contact details.
