

KYEKIO Garden Lights Solar Powered Waterproof

KYEKIO 12-Pack Solar Torch Lights Instruction Manual

Model: Garden Lights Solar Powered Waterproof

1. PRODUCT OVERVIEW

The KYEKIO Solar Torch Lights are designed for outdoor garden decoration, featuring a flickering flame effect. These lights are solar-powered, waterproof, and automatically turn on at dusk and off at dawn. They are constructed from durable Acrylonitrile Butadiene Styrene and Plastic, with a polished finish.

This package includes 12 individual solar torch lights, ideal for illuminating pathways, gardens, patios, and for decorative purposes during events like Halloween or Christmas.

2. SAFETY INFORMATION

- Ensure the solar panel is exposed to direct sunlight for optimal charging. Avoid shaded areas.
- Do not install near strong light sources, as this may interfere with the automatic light sensor.
- Handle components with care during assembly to prevent damage.
- Keep out of reach of small children.
- While waterproof, avoid submerging the lights in water.

3. WHAT'S IN THE BOX

Each KYEKIO Solar Torch Light package contains the following components:

- 12 x Solar Torch Light Heads (with integrated solar panel and LED)
- 12 x Extension Poles
- 12 x Ground Spikes
- User Manual (this document)

4. SETUP AND INSTALLATION

Follow these steps for tool-free installation of your solar torch lights:

1. **Absorb Sunlight:** Before initial use, ensure the solar panel on top of the light head is exposed to direct sunlight for at least 6-8 hours to fully charge the internal battery.
2. **Rotate Light Top:** Gently twist and remove the top section of the light head to access the internal switch.
3. **Turn On Switch:** Locate the power switch inside the light head and slide it to the "ON" position.
4. **Screw Light Top:** Reattach the top section of the light head by twisting it back into place, ensuring it is secure.
5. **Connect All Parts:** Connect the extension pole to the bottom of the light head, then attach the ground spike to the other end of the extension pole. Ensure all connections are firm.
6. **Insert Into Soft Areas:** Choose a location in your garden or pathway that receives ample direct sunlight. Gently insert the assembled torch light into soft ground. Avoid forcing it into hard soil to prevent damage.

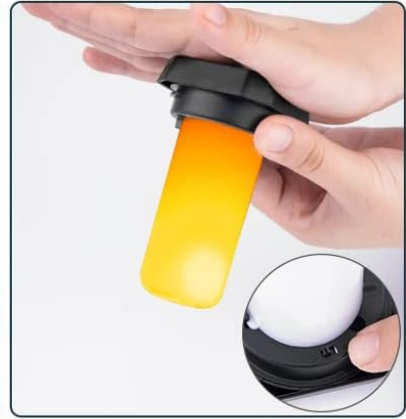

INSTALLATION WITHOUT TOOLS

1 Absorb Sunlight

2 Rotate Light Top

3 Turn On Switch

4 Screw Light Top

5 Connect All Parts

6 Insert Into Soft Areas

5. OPERATING INSTRUCTIONS

The KYEKIO Solar Torch Lights are designed for automatic operation:

- **Automatic On/Off:** Once the internal switch is set to "ON" during installation, the lights will

automatically charge during the day when exposed to sunlight. They will then automatically illuminate at dusk and turn off at dawn.

- **Flickering Flame Effect:** The LEDs inside the torch lights are designed to simulate a realistic flickering flame, providing an ambient and decorative glow.
- **Charging:** For optimal performance, ensure the solar panel receives at least 6-8 hours of direct sunlight daily. Cloudy days or shaded locations will reduce charging efficiency and may result in shorter illumination times.

6. MAINTENANCE

- **Cleaning:** Periodically wipe the solar panel with a soft, damp cloth to remove dust, dirt, or debris. A clean solar panel ensures maximum charging efficiency.
- **Battery:** The lights contain a rechargeable battery. Over time, battery performance may decrease. If the lights' illumination time significantly shortens, consider replacing the battery if accessible and specified by the manufacturer.
- **Seasonal Care:** While the lights are waterproof (IP65 rated), extreme weather conditions (heavy snow, prolonged freezing temperatures) may affect performance. Consider storing them indoors during harsh winter months to prolong their lifespan.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Light does not turn on at night.	1. Switch is in "OFF" position. 2. Insufficient sunlight for charging. 3. Solar panel is dirty. 4. Installed near another strong light source. 5. Battery is depleted or faulty.	1. Ensure the switch is set to "ON". 2. Relocate the light to an area with direct sunlight for 6-8 hours. 3. Clean the solar panel. 4. Move the light away from streetlights or other bright lights. 5. Allow several days of full charge. If problem persists, battery may need replacement.
Light illuminates for a short period only.	1. Insufficient charging due to cloudy weather or shade. 2. Battery capacity has decreased over time.	1. Ensure optimal sunlight exposure. 2. Battery may need replacement.
Light flickers inconsistently or is dim.	1. Partial charge. 2. Solar panel obstruction.	1. Allow for a full day of charging in direct sunlight. 2. Clean the solar panel and ensure no obstructions.

8. SPECIFICATIONS

- **Brand:** KYEKIO
- **Model Number:** Garden Lights Solar Powered Waterproof
- **Power Source:** Solar Powered
- **Light Source Type:** LED
- **Number of Light Sources:** 12 (per pack)
- **Material:** Acrylonitrile Butadiene Styrene, Plastic
- **Finish Type:** Polished
- **Color:** Orange (light effect), Black (housing)
- **Water Resistance Level:** Waterproof (IP65)
- **Indoor/Outdoor Usage:** Outdoor (also listed as Indoor, Outdoor)
- **Mounting Type:** Floor Mount (with ground spike)
- **Batteries Included:** Yes
- **Voltage:** 12 Volts (DC)
- **Item Weight:** 3.3 pounds (for the pack)
- **Package Dimensions:** 9.13 x 8.82 x 6.65 inches
