4. USAGE INSTRUCTIONS

4.1. Preparation (Setup)

Before applying the cream, ensure your skin is clean and dry. It is recommended to cleanse your face thoroughly to remove any impurities, makeup, or excess oil. Pat your skin dry gently with a clean towel.

4.2. Application (Operating)

Apply a moderate amount of ALSKVARD Derma Blemish Moisturizing Cream to the desired areas of your skin. This includes marks, spots, and discolored areas. The cream has a pink/tan color and a fairly thick consistency, but it spreads easily and absorbs without feeling sticky or leaving a chalky residue.

- Take a small amount of cream using clean fingertips or a spatula.

- Gently massage the cream into your skin until fully absorbed.
- Reapply as needed, typically once or twice daily, or as directed by a skincare professional.

The cream can be applied to your entire face for general moisturization and soothing, or specifically to areas of concern such as blemishes or dark spots.

5. CARE AND MAINTENANCE

To ensure the longevity and effectiveness of your ALSKVARD Derma Blemish Moisturizing Cream:

- **Storage:** Store the cream in a cool, dry place, away from direct sunlight and extreme temperatures.
- **Hygiene:** Always use clean hands or a clean spatula when dispensing the product to prevent contamination.
- **Seal:** Ensure the lid is tightly closed after each use to maintain product freshness and prevent drying out.
- **Shelf Life:** Refer to the product packaging for the expiration date or period-after-opening (PAO) symbol.

6. TROUBLESHOOTING

If you encounter any issues while using the product, consider the following:

- **No Immediate Results for Dark Spots/Scarring:** While the cream is designed to help with dark spots, visible results may take time and consistent use. Skincare improvements are often gradual. Continue regular application as directed.
- **Strong Scent:** Some users may find the scent (e.g., eucalyptus or tea tree oil notes) strong. If you have chemical sensitivities, perform a patch test on a small, inconspicuous area of skin before full application. Discontinue use if irritation occurs.
- **Unusual Texture:** The cream may have a slightly "curdled" appearance or thick texture. This is normal for the product and does not affect its efficacy. It should still spread smoothly upon application.
- **Irritation or Redness:** Although formulated for sensitive skin, individual reactions can vary. If you experience persistent irritation, redness, or discomfort, discontinue use and consult a dermatologist.
