Oral-B Model iO G4.1B6.2K

Oral-B iO Series 4 Electric Toothbrush User Manual

Model: Model iO G4.1B6.2K

Introduction Setup Operating Instructions Maintenance Troubleshooting Specifications Warranty & Support

1. Introduction

The Oral-B iO Series 4 Electric Toothbrush represents Oral-B's advanced oral care technology, designed to provide a superior cleaning experience. It offers clinically proven plaque removal, significantly more effective than a manual toothbrush, especially along the gumline. This model incorporates smart features like real-time personalized coaching via an accompanying app, multiple brushing modes, a built-in 2-minute timer, and an intelligent pressure sensor to ensure optimal and safe brushing habits. The iO Series 4 is engineered for a smooth and harmonious cleaning action through micro-vibrations synced with oscillations, delivering a fresh and thorough clean.

2. Setup

2.1 Unboxing and Initial Charge

Upon opening the box, you will find the Oral-B iO Series 4 toothbrush handle, one brush head, a charging base, and a travel case. Before first use, fully charge the toothbrush. Place the handle on the charging base, ensuring it is securely seated. The toothbrush features a Lithium-ion battery designed for long-lasting charge.

Figure 2: Various color options of the Oral-B iO Series 4 toothbrush, showcasing its sleek design.

2.2 Attaching the Brush Head

Align the brush head with the metal shaft on the toothbrush handle and push it down firmly until it clicks into place. Ensure it is securely attached before use.

2.3 Connecting to the Oral-B App

For personalized coaching and brushing reports, download the Oral-B App on your smartphone. Enable Bluetooth on your device and follow the in-app instructions to pair your iO Series 4 toothbrush. The app provides a daily brushing report and allows you to track and improve your brushing habits over time.

3. Operating Instructions

3.1 Brushing Technique

Wet the brush head and apply a small amount of toothpaste. Place the brush head against your teeth at a slight angle towards the gumline. Turn on the toothbrush. Guide the brush head slowly from tooth to tooth, allowing the round head and micro-vibrations to clean each surface. There is no need to scrub vigorously.

Figure 4: Visual comparison demonstrating the superior plaque removal capabilities of the Oral-B iO electric toothbrush compared to a manual brush.

3.2 2-Minute Timer and Quadrant Pacer

The toothbrush features a built-in 2-minute timer, ensuring you brush for the dentist-recommended duration. It also includes a quadrant timer that divides the 2 minutes into four 30-second intervals, prompting you to move to a different quadrant of your mouth for an even clean.

Figure 5: An overview of the smart features of the Oral-B iO Series 4, including its multiple cleaning modes, integrated timer, and app-based reports.

3.3 Pressure Sensor

The iO Pressure Sensor is designed to protect your gums and teeth. It indicates optimal cleaning pressure and warns of over-pressure:

- **White Light:** Not applying enough pressure.
- **Green Light:** Applying optimal pressure.
- **Red Light:** Applying too much pressure. Reduce force to avoid damage.

Figure 6: The pressure sensor light on the Oral-B iO Series 4 toothbrush glows green when optimal brushing pressure is applied.

3.4 Cleaning Modes

The Oral-B iO Series 4 offers four distinct cleaning modes to suit your needs:

- **Daily Clean:** For everyday comprehensive cleaning.
- **Whiten:** Designed to polish and whiten teeth.
- **Sensitive:** Gentle yet effective cleaning for sensitive areas.
- **Super Sensitive:** Extra gentle cleaning for extremely sensitive gums and teeth.

You can switch between modes using the dedicated mode button on the handle. The Oral-B App allows you to customize the order of these modes and even disable some if desired.

---

4. Maintenance

4.1 Brush Head Replacement

It is recommended to replace your brush head every 3 months, or sooner if the bristles become worn. The iO Series 4 features a brush head replacement reminder system. A yellow light will illuminate within the cleaning mode button, and the handle will vibrate to alert you when it's time for a new brush head. If using the Oral-B App, you will also receive notifications there.

4.2 Cleaning the Toothbrush

After each use, rinse the brush head thoroughly under running water. You can also wipe down the handle with a damp cloth. The handle is water-resistant, but avoid submerging the charging base in water.

---

5. Troubleshooting

- **Toothbrush not turning on:** Ensure the toothbrush is fully charged. Place it on the charging base for several hours.
- **Pressure sensor always red/white:** Adjust your brushing pressure. A green light indicates optimal pressure. If it consistently shows red, you might be pressing too hard. If it's always white, you might not be applying enough force.
- **App not connecting:** Ensure Bluetooth is enabled on your smartphone and the toothbrush is within range. Try restarting both the app and the toothbrush.
- **Short battery life:** Ensure the toothbrush is properly seated on the charger. A full charge should provide up to 14 days of use. If issues persist, contact customer support.
