## INTRODUCTION

This manual provides detailed instructions for the safe and effective use of your PAWPRO Dog Training Collar Model PP7-A. Please read this manual thoroughly before operating the device to ensure proper functionality and the well-being of your dog.

## IMPORTANT SAFETY INFORMATION

- This training collar is designed for dogs weighing over 4.5 kg (10 lbs) and puppies over 6 months old.
- Do not leave the collar on your dog for more than 12 consecutive hours. Prolonged wear can cause skin irritation.
- Regularly check your dog's neck for any signs of irritation or sores. If irritation occurs, discontinue use and consult a veterinarian.
- The static correction feature should be used responsibly and only when necessary. Start with the lowest level and increase gradually.
- Ensure the contact points are making proper contact with the dog's skin. For long-haired dogs, use the longer contact points provided.
- This device is waterproof (IPX7 certified), but ensure the charging port is securely sealed before exposure to water.
- Keep out of reach of children.

## PACKAGE CONTENTS

The PAWPRO Dog Training Collar package includes the following items:

- Training Collar Receiver

- Remote Transmitter
- Adjustable Collar Strap
- USB Charging Cable
- Test Light Tool
- Short and Long Contact Points (with rubber covers)
- Wrist Lanyard for Remote
- Clicker/Whistle
- User Manual

## SETUP GUIDE

---

### 1. Charging the Devices

Before first use, fully charge both the collar receiver and the remote transmitter. The charging time is approximately 2 hours.

- Connect the USB charging cable to the charging ports on both the receiver and transmitter.
- Plug the other end of the USB cable into a standard USB power adapter (not included).
- The battery indicator on the remote will show charging status. The collar receiver will typically have an indicator light that changes when fully charged.

Image: The remote transmitter and collar receiver connected to a USB charging cable, illustrating the charging process.

## 2. Attaching Contact Points

Select the appropriate contact points based on your dog's coat length. Use shorter points for short-haired dogs and longer points for long-haired dogs to ensure proper skin contact.

- Screw the chosen contact points onto the receiver.
- Ensure the rubber covers are placed over the contact points for comfort and to prevent irritation.

Image: Diagram illustrating the selection of short or long contact points for the collar receiver, depending on the dog's fur length.

## 3. Fitting the Collar

Proper fit is crucial for effectiveness and comfort.

- Place the receiver on the center of your dog's throat, with the contact points touching the skin.
- Adjust the strap so it is snug but not too tight. You should be able to fit one finger comfortably between the collar and your dog's neck.
- Trim any excess strap length if necessary.

#### **4. Pairing the Remote and Collar (if not pre-paired)**

The devices are usually pre-paired. If not, follow these steps:

1. Turn on the remote transmitter.
2. Press and hold the power button on the collar receiver until the indicator light flashes.
3. Within 10 seconds, press any mode button (Beep, Vibration, or Static) on the remote.
4. The collar indicator light will stop flashing and remain solid, indicating successful pairing.

- **Beep Mode:** Produces an audible tone.
- **Vibration Mode:** Delivers a non-harmful vibration.
- **Static Mode:** Provides a static correction (11 adjustable levels).
- **Level Adjustment:** Use the up/down buttons to adjust static correction intensity.
- **Security Lock:** The remote features a security lock to prevent accidental activation.

## Training Modes

The PAWPRO collar offers three training modes: Beep, Vibration, and Static. It is recommended to start with the Beep or Vibration mode and only use Static correction if necessary, beginning at the lowest effective level.

## Multi-Dog Training

The remote transmitter can control up to two collar receivers (additional receivers sold separately).

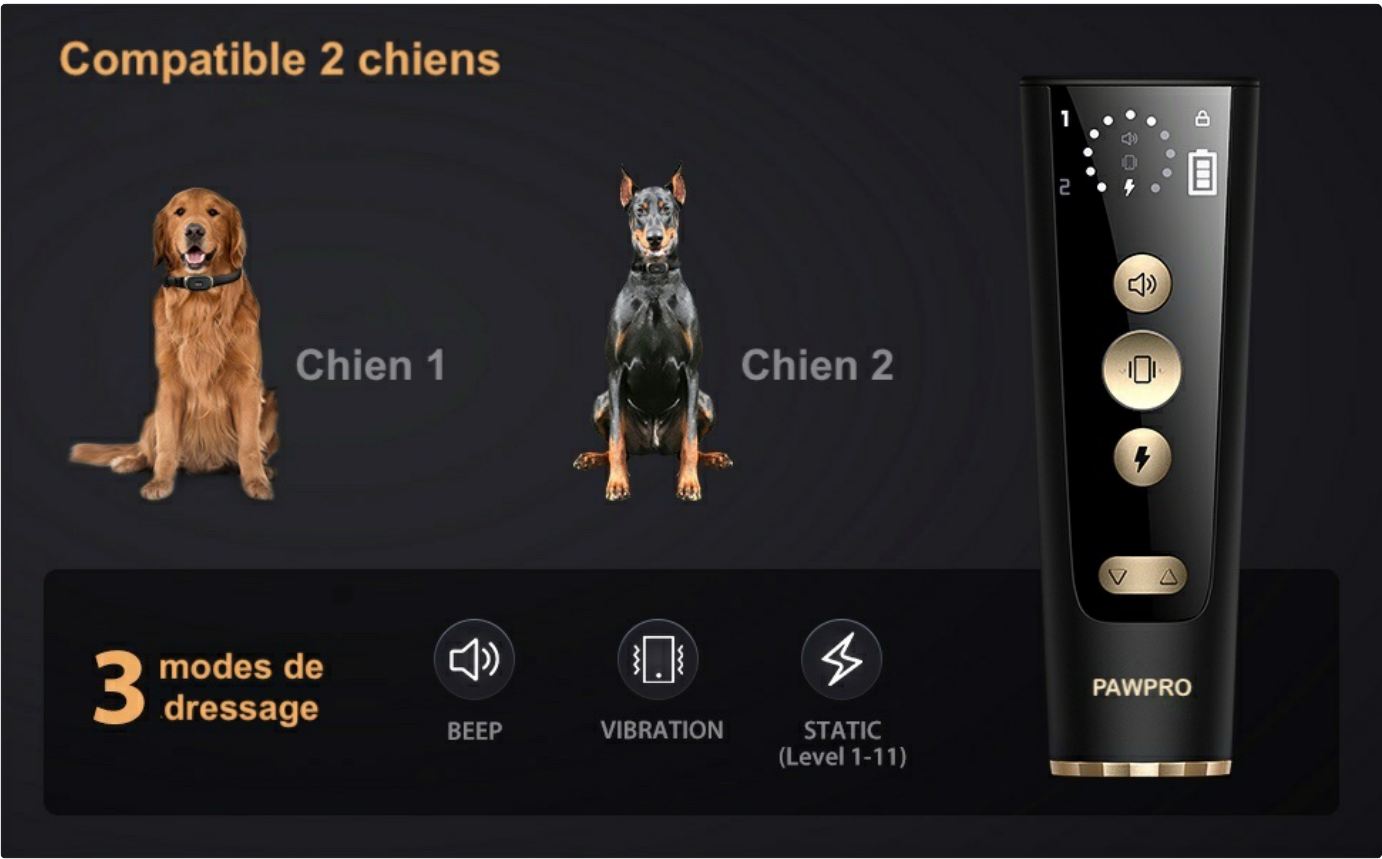

Image: Illustration showing the PAWPRO remote transmitter capable of controlling two separate dog collars for multi-dog training.

## MAINTENANCE

- **Cleaning:** Regularly clean the collar strap and receiver with a damp cloth. Ensure the contact points are free of dirt and debris.
- **Battery Care:** Charge the devices fully when the battery is low. Avoid completely draining the battery for extended periods.
- **Storage:** Store the collar and remote in a dry, cool place when not in use.
- **Contact Points:** Periodically check the contact points for wear and tear. Replace if damaged.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Collar not responding to remote	Low battery on either device; devices not paired; out of range.	Charge both devices; re-pair the remote and collar; ensure you are within the operational range.
Static correction not working	Poor contact with dog's skin; static level too low; contact points are too short for dog's fur.	Adjust collar fit; increase static level gradually; use longer contact points for long-haired dogs. Use the test light tool to verify function.
Collar indicator light not working	Collar is off; low battery.	Turn on the collar; charge the collar.

Problem	Possible Cause	Solution
Dog shows signs of skin irritation	Collar worn too long; collar too tight; allergic reaction to material.	Remove collar immediately; clean dog's neck; consult a veterinarian. Ensure collar is not worn for more than 12 hours.

## SPECIFICATIONS
