SETUP

Follow these steps to set up your VYSER Projector:

1. **Placement:** Place the projector on a stable, flat surface. Ensure there is adequate ventilation around the device.
2. **Power Connection:** Connect the power cable to the projector's power input and then to a power outlet.
3. **Source Connection:** Connect your desired input source (e.g., laptop, game console, TV stick) using the appropriate cable (HDMI, VGA, AV, USB).
4. **Power On:** Press the power button on the projector or the remote control to turn on the device.
5. **Focus Adjustment:** Use the focus wheel on the projector to sharpen the image.
6. **Keystone Correction:** Adjust the keystone correction to ensure a rectangular image. The projector supports $\pm 50^\circ$ auto and 4-point keystone correction.

Screen Size & Keystone Correction

The projector supports a screen size of up to 300 inches diagonally. You can adjust the projection screen size from 75% to 100% using the remote control's zoom function.

For optimal image geometry, utilize the keystone correction features:

- **Auto Keystone Correction:** The projector offers $\pm 50^\circ$ auto keystone correction for quick setup.
- **4-Point Keystone Correction:** For more precise adjustments, use the 4-point keystone correction to fine-tune each corner of the image. This is particularly useful when the projector is placed at an angle.

MAINTENANCE

To ensure the longevity and optimal performance of your VYSER Projector, follow these maintenance guidelines:

- **Lens Cleaning:** Gently wipe the projector lens with a soft, lint-free cloth. Avoid using abrasive cleaners that could scratch the lens.
- **Ventilation:** Ensure the projector's ventilation openings are clear of dust and obstructions to prevent overheating. Regularly clean the vents with a soft brush or compressed air.
- **Storage:** When not in use, store the projector in a cool, dry place away from direct sunlight and extreme

temperatures. Use the provided carrying bag for protection during storage or transport.

- **Lamp Life:** The projector lamp has a life expectancy of 100,000 hours. No regular lamp replacement is typically needed under normal usage.

TROUBLESHOOTING

Here are solutions to common issues you might encounter:

- **No Sound:** If the projector has no sound when playing videos (e.g., from Amazon Fire Stick, Netflix, Blu-ray movies), it might be due to Dolby sound incompatibility. Turn off Dolby sound on your device or apps (e.g., Settings > Display & Sounds > Audio > Dolby Digital Output > Dolby Digital (OFF)).
- **Content Cannot Be Mirrored/Cast (Hulu, Netflix, etc.):** Streaming services like Hulu and Netflix often restrict screen mirroring due to copyright. To watch content from these services, use a dedicated streaming device (not included) such as a Fire TV stick, Roku stick, or Chromecast connected to the projector's HDMI port.
- **Blurry Image:** Adjust the focus wheel on the projector. If parts of the image are still blurry, use the 4-point keystone correction to fine-tune the corners.
- **Overheating:** Ensure the projector has proper ventilation and its vents are not blocked. Clean any dust from the vents.
