2. SETUP INSTRUCTIONS

2.1. Cushion Inflation

The Ever-Soft Air Cushion comes with a convenient hand pump for inflation. Locate the inflation valve on the cushion. Insert the pump nozzle into the valve and inflate the cushion to your desired firmness. The independent, interconnected air cells will redistribute air to provide a gentler and more supportive seat. Do not overinflate.

HAND PUMP INCLUDED

Included for quick inflation of the air cushion for transport and standard wheelchairs.

3. OPERATING INSTRUCTIONS

The Dynarex Ever-Soft Air Cushion is versatile and can be used in various settings to increase seated comfort and prevent pressure wounds. Place the inflated cushion on the desired seating surface, such as a wheelchair, car seat, or other chairs within the home. Ensure the non-skid bottom of the cover is facing down to maintain stability. Adjust the air fill amount as needed for customized comfort and support.

AIR CUSHION DESIGN

The Dynarex Ever-Soft Air Cushion is designed with independent, interconnected air cells.
