

Cosmic Byte CB-GK-31 Artemis

Cosmic Byte CB-GK-31 Artemis 68Key Per Key RGB Wired Mechanical Keyboard

Model: CB-GK-31 Artemis | Brand: Cosmic Byte

PRODUCT OVERVIEW

The Cosmic Byte CB-GK-31 Artemis is a compact 68-key wired mechanical keyboard designed for enhanced gaming and typing experiences. It features per-key RGB lighting, allowing for extensive customization, and is equipped with durable Outemu Red mechanical switches that are hot-swappable for personalized tactile feedback. This keyboard offers a high polling rate and full anti-ghosting for precise and responsive input, making it suitable for demanding applications and gaming.

backlighting.

SETUP GUIDE

Follow these steps to set up your Cosmic Byte CB-GK-31 Artemis mechanical keyboard:

- 1. Unpack the Keyboard:** Carefully remove the keyboard and its accessories from the packaging. Ensure all components, including the USB cable, are present.
- 2. Connect the USB Cable:** The CB-GK-31 Artemis features a detachable USB cable. Connect the USB-C end of the cable to the port on the keyboard and the USB-A end to an available USB port on your computer (PC or Laptop).
- 3. System Recognition:** Your operating system (Windows 10, Mac OS X) should automatically detect and install the necessary drivers for the keyboard. This process may take a few moments.
- 4. Install Software (Optional but Recommended):** For full customization of RGB lighting and macro settings, download and install the dedicated software from the official Cosmic Byte website. The software is compatible with Windows operating systems.

OPERATING INSTRUCTIONS

The Cosmic Byte CB-GK-31 Artemis keyboard offers various functionalities for an optimized user experience:

RGB Lighting Customization

The keyboard features Spectra Per Key RGB lighting with over 10 LED lighting modes. You can adjust brightness and speed directly on the keyboard or through the software.

- On-board Controls:** Use the dedicated function keys (Fn + specific keys) to cycle through lighting modes, adjust brightness, and change animation speed. Refer to the keyboard's keycap legends for specific combinations.
- Software Customization:** The software allows for granular control, enabling you to assign any color from 16.8 million options to individual keys, create custom lighting profiles, and synchronize effects.

Swappable Mechanical Switches

The CB-GK-31 Artemis comes with Outemu Red mechanical switches, which are hot-swappable. This allows you to easily change switches without soldering, enabling customization of typing feel and sound. Only Outemu switches are compatible.

- 1. Keycap Removal:** Use a keycap puller (not included) to gently remove the desired keycap.
- 2. Switch Removal:** Use the included switch puller to carefully grip the top and bottom clips of the switch and pull it straight up.
- 3. New Switch Installation:** Align the pins of the new Outemu switch with the holes on the PCB. Gently push the switch down until it clicks into place. Ensure the switch is seated firmly and straight.
- 4. Keycap Reinstallation:** Place the keycap back onto the new switch.

OUTEMU SWAPPABLE SWITCHES

Only compatible with Outemu Switches

Advanced Features

- **1000Hz Polling Rate:** The keyboard operates at a 1000Hz polling rate, ensuring rapid response times with minimal input lag.
- **All Key Anti-Ghosting:** This feature allows multiple keys to be pressed simultaneously without conflicts, ensuring every keystroke is registered accurately, which is crucial for gaming.
- **Software Support for Windows:** Utilize the dedicated software for Windows to create macros, remap keys, and fine-tune RGB lighting effects for a personalized setup.

MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your Cosmic Byte CB-GK-31 Artemis keyboard:

- **Cleaning the Keyboard:**
 - Disconnect the keyboard from your computer before cleaning.
 - Use a can of compressed air to remove dust and debris from between the keycaps.
 - Wipe the keycaps and keyboard surface with a soft, slightly damp, lint-free cloth. Avoid excessive moisture.
 - For stubborn grime, a small amount of isopropyl alcohol on a cloth can be used, but avoid direct application to the switches.
- **Keycap Care:** The keyboard features scratch-resistant double-shot keycaps. While durable, avoid using abrasive materials for cleaning. If removing keycaps for deep cleaning, use a keycap puller to prevent damage.

- **Switch Care:** Avoid spilling liquids on the keyboard. If a switch feels sticky or unresponsive, it may be cleaned with compressed air or, if necessary, replaced due to the hot-swappable design.

TROUBLESHOOTING

If you encounter issues with your Cosmic Byte CB-GK-31 Artemis keyboard, try the following solutions:

Problem	Possible Solution
Keyboard is not responding.	<ul style="list-style-type: none">• Ensure the USB cable is securely connected to both the keyboard and the computer.• Try connecting the keyboard to a different USB port on your computer.• Restart your computer.• Test the keyboard on another computer to rule out system-specific issues.

Problem	Possible Solution
RGB lighting is not working or is incorrect.	<ul style="list-style-type: none"> Check the on-board lighting controls (Fn key combinations) to ensure lighting is enabled and set to a visible mode. If using the software, ensure it is running and that the correct lighting profile is selected. Try resetting the lighting settings within the software. Reinstall the keyboard software.
Certain keys are not registering or are double-typing.	<ul style="list-style-type: none"> Remove the keycap and switch for the problematic key. Inspect for any debris or damage. Reinstall the switch firmly. If the issue persists, consider replacing the switch with a new compatible Outemu switch. Ensure the keyboard firmware is up to date (check Cosmic Byte's official website).
